**Random Hacks of Kindness**

*Hacking for Humanity*

An opportunity to partner with Australia's leading hackathon for social good

# what is RHoK?

RHoK runs **hackathons** for charities, community groups and social enterprises all over Australia

The RHoK community has developed **open source technology solutions** for more than 50 purpose driven organisations since 2011

We are a **learning laboratory**. It's a place to experience what good innovation, agile development and collaboration actually looks and feels like

# what people say about us

## partner

### Daryl Wilding-McBride
CTO, DiUS Computing

We chose to join RHoK because we wanted to give back to the communities in which we live. Unexpectedly, we also found value in opportunities to connect with like-minded people with varied skills, and from diverse organisations. Sometimes those organisations are competitors in the commercial world, but with RHoK we are brought together to solve common problems.

## changemaker

### Kate Austin
CEO, Pinchapoo

Knowing NOTHING about hackathons or technology in general, I threw myself into the world of RHoK only to find the most remarkable organic experience. What was created in 24 hours was not only a tech solution for our charity, but new friendships and belonging to a network of energetic, talented people willing to give of themselves endlessly for the greater good.

## hacker

### Victoria Cullen
Founder at Cullen & Irwin

RHoK is a great petri dish of learning. You meet extremely talented people with different skills and get to watch how they work. It gives me a chance to contribute to projects I care about, rather than just handing over a few dollars, and I get the chance to meet awesome like-minded individuals and learn cool stuff in the process. You also learn how much caffeine is still not enough caffeine!

# contact

Let's catch up for a cup of coffee, or a phone call about how your organisation might become a part of the RHoK community.

We'd love to hear from you.
