Summer Hummer Mail Order Thank You/Wish you were here... Special Offering!

This is our time of year to send off our email offering of plants at special prices to say thank you for ordering in the past and to encourage you to yes, ORDER AGAIN NOW! Some plants are offered at very reduced retail prices and others are too few in numbers to list on the website. Most are new offerings and some are just plain really great plants we think you will find well worth adding to your collection.

Epidendrum parkinsonianum

We have offered this species before, but now have a limited number of these 8" hanging baskets. All have between 5-6 of our seed raised flowering size plants to make a spectacular specimen. Meant to hang upside-down to accommodate the pendant growing habit, they create a beautiful effect even when plants are not in bloom. These will just get more fantastic with each year of growth.

Plants are well established – summer bloomers and FRAGRANT.

Last time at this price.

\$75.00

Sedirea japonica

One of our all time favorite species. From Japan, the plant resembles a miniature Phalaenopsis and produces nice sprays of pistachio-green flowers which have the most intriguing lemon scent. Cool to warm temps are fine. Nice flowering size plants, bloom season is springtime.

\$15.00

Paph. Prince Edward of York 'Bravo'
X
rothschildianum 'Summer Heat'

\$20.00

Seedlings of special character which will have many large flowers held on tall sprays. This breeding is the most spectacular of all Paphiopedilum breeding. Near flowering size seedlings, bred by Norito Hasagawa, Near flowering size.

Blc. Satomi 'Yosooi'
X
Pot. Jump For Joy 'Rounder'

\$15.00

A super opportunity to purchase some Cattleya seedlings with award quality expectations. This cultivar of our hybrid, Pot. Jump For Joy (pictured) is one of the finest standard pink cattleyas that we know of. Here it is crossed with a proven parent from Japan to produce super nice light pink flowers. Near flowering size seedlings.

Paphiopedilum delenatii vini

\$50.00

A fantastic, showy variety of this well known Vietnamese species. The color of these types are intensely dark colored with near purple pouches. These are still quite rare in the trade. We offer beautiful community pots with 20+ seedlings. Limited

Sarcochilus package

\$25.00

Super nice seedlings of these wonderful hybrids of Australian natives. The package includes one seedling of (Kurumba 'Amigo' X Sweetheart 'Edith') and one seedling of (Kulnura Fancy 'Red Edge early' X Kulnura Firemist 'On Arch'). These should produce beautiful red to dark pink patterned flowers. Near flowering size.

Dendrobium Star King 'Irvine'

Beautiful flowering size meristems of this new fantastic Dendrobium. This was the most popular and showy plant for us in this year's Spring shows. These Australian Dendrobiums are well known for their ease of culture and their extremely floriferousness. They are also capable of doing well under both hot and cold temperatures.

\$25.00

Laelia anceps (Rosminah X Marblehall Imperialis)

A very desirable crossing of two really good varieties of Laelia anceps, the nicest of the Mexican Laelias. 'Rosminah' is a very showy dark and splashed petal form cross with a huge shapely soft pink tetraploid with exceptional shape. Near flowering size.

\$25.00

Cyrtorchis Hendrik van der Hoeven (chailuna X arcuata)

Wonderful seedlings of this unusual African hybrid. The first plants bloomed this year and were really beautiful. It caused quite a sensation when viewed on Facebook. Attractive branching plants when mature. Adults carry numerous spikes. Spikes carry 5-7 starry crystalline white flowers that are fragrant at night. Grow warm. Near flowering size.

\$20.00

Cattleya tigrina (leopoldii) (Super Dark X Carnival)

Seedlings of one of our favorite Cattleya species. The species from Brazil creates quite stir when in bloom usually in June-July for us. Flowers will be deep mahogany some with heavy spotting. They produce a fantastic sweet fragrance.

The flowering heads can carry up to twenty flowers.

Near flowering size.

\$15.00

Laelia Santa Barbara Sunset 'Showtime' HCC/AOS

New! This is by far the most famous of L. anceps hybrids having been collected for the last 40 years. We have made new meristems from the original plant. Long spikes of coral orange flowers reminiscent of the L. anceps parent. Grows quickly into large showy specimens.

Near flowering size.

\$15.00

Cymbidium Monterey Sunset 'New Horizon'

Showy bright orange standard cymbidium which makes a spectacular specimen plant with many spikes. The color is a true bright orange not often seen in Cymbidiums.

Flowering size.

\$20.00

Lc. Miss Wonderful 'Imperialis' AM/AOS

We love this plant. It is a robust grower that blooms very easily. Striking splash petaled flowers that are about 6 inches across. They have the character of their . anceps parent.

These are a Cal-Orchid exclusive meristem. These are great plants in spike

\$20.00

Blc. Young-Min Orange 'Golden Satisfaction'

\$25.00

Cattleyas are a very special part of our nursery and this is one of our best for color and performance. It is a reliable bloomer for the winter-early spring season. The flower opens lighter orange and then ripens to a strong pumpkin orange. Really show stopping. Largest size we've ever offered of this hybrid.

Catasetum Orchidglade 'Jack of Diamonds' AM/AOS

\$20.00

If you are going to grow a Catasetum, why not go for one with really good color? Even though it has been in the trade for many many years, this classy cultivar has everything going for it: size, shape, color, flower count. Near flowering size. Florida growers take note!

Dendrobium Shining Pink

\$35.00

This new and exclusive introduction from Japan is fantastic. Farmeri-thrysiflorum X farmeri. You won't see this anywhere outside of Japan, but boy is it showy. So easy to grow-intermediate conditions.

Neostylus Pinky 'New Star'

\$20.00

Everyone seems to gravitate to the Neofinetia hybrids that have spots and dots. This is the newest of the spotted hybrids, so make space for another pot! yes, fragrance is here and clean purple-red highlights.

Mediocalcar decorata 'Party Time' AM/AOS

\$20.00

Seedlings of this New Guinea species. Plants grow a dense mat of succulent like foliage that is very attractive in its own right, but then the flowers come along and cover the whole thing with 'Chinese lantern' appearing flowers the color of candy corn. Could you want anything more cool? They love good quality water.

Leptotes bicolor 'Hamana' BM/JOGA

\$25.00

Here is a neat mini that has captivated the attention of growers everywhere over the past few years. From Brazil, sub-tropical to coastal lowlands. Does very nicely on mounts or in pots, and just cranks out buds in the spring like you won't believe!

This cultivar is of superior size and color, hence the recognition from the demanding judges in Japan.

Slc. California Song 'Strawberry Parfait' BM/JOGA

\$35.00

A new and fantastic miniature Cattleya hybrid from Japan. Slc. Mini Song x Slc. California Apricot) Extremely limited unfortunately. We call these 'micro-minis'. Plants are in 2.75" pots.

Cymbidium Australian Midnight
'Tionee' HCC/AOS

\$40.00

And now for something different. A canaliculatum hybrid, so if you want these nearly black beauties to bloom do not grow them where it gets cold. Florida growers will see them flourish into great specimen plants with gorgeous pendulous spikes.

Flowering size plants in gallon pots. Great opportunity.

To order, call us at 805 967 1312 or send your Email to calorchid@cox.net with your name and phone number and we will call YOU to finalize the order.

We will pull your plants then ship your order the week of July 17th. Hope this helps all our loyal customers who can't come to the sale!
Offer expires July 16, 2017
