

Bert Ruiter Orchids

Bert is a world class breeder of cymbidiums. Facebook has featured many of his spotted and gorgeous color forms ofnow is your chance to actually purchase what the rest of the cymbidium world has only seen in photographs on line.

This is a chance of a lifetime offering of select seedlings and special meristems from one of the premier Cymbidium nurseries in Holland. Many of these plants have never been seen in outside of the Netherlands before. All plants are offered on a first come first served basis. Plants were shipped direct to Cal-Orchid in May, and were immediately potted. This is a special event and a one-time offer. Weekend attendees get first pick. On site sales are on a cash basis. Mail orders will be via credit card. Plants for shipping will be pulled and shipped the week after the sale. Email Cal-Orchid to reserve plants.

Bert Ruiter is a second generation Cymbidium cut flower grower from Horn in the Netherlands. Seeking information to improve his cut cymbidium culture, Bert became interested in the Cymbidium species in the 1990's. Gradually he has transformed his nursery into the leading blooming potted plant operation in Holland. He is particularly dominant in the vibrant Portuguese market from November through Mother's Day. Bert produces the greatest variety of cymbidiums in Europe; from large exhibition standards down to compact minis with a particular emphasis on unusual colors, spotted types and the full range of devonianum-influenced pendulous lines. He is an annual visitor to the Santa Barbara International Orchid Show and this will be his first ever visit to the Summer Hummer and his first comprehensive offering from Ruiter Orchids exciting seedling and meristem stock.

Seedlings, single growth, bulb and growth
