

## ANY DISEASE

All of the Juice Plus+ Research encompassing 35 scientific peer reviewed medical journal publications, applies to ALL diseases! Decreased free radicals = ALL cells in body are damaged less and less which = less damage to DNA, the template of all new cells = healthier cells as cells die and regenerate = balanced immune system = less chronic systemic inflammation = improved cardiovascular output, less constriction of vessels = total body getting healthier. This is basic cellular health. Cells turn into tissues turn into organs and organ systems. We don't have to equate each research piece to a specific disease. As cells improve, so does the entire body.
