#### Released Statement on DACA Support

We at Compass Academy are gravely concerned by the harmful action to repeal Deferred Action for Childhood Arrivals (DACA), as this decision stands counter our most fundamental values and beliefs, along with our steadfast commitment to support the success of all learners and leaders in our community.

Compass Academy stands firmly in support of Dreamers and their families and we understand their fundamental role in enriching our communities and nation.

As a part of Denver Public Schools, Compass Academy upholds the district's practice of not collecting or maintaining information of our students' immigration status, as outlined in "The Safe and Welcoming School District

Resolution." <<https://www.dpsk12.org/wp-content/uploads/Board-Resolution-FINAL-with-amendment-English.pdf>> We also recognize that many of our students and families may be experiencing increased anxiety as a result of the decision to repeal. We are working to provide additional support for those who are affected, including organizing events where families can get information about changes to the program and access resources.

Compass Academy will continue to ensure that Dreamers-and all of our students-are equipped with the necessary academic and social-emotional skills to succeed in school and beyond. We urge our leaders in Congress to enact a permanent solution to protect Dreamers and their families. Compass Academy leaders will share with members of Congress the impact of this repeal on the community and we will do everything we can to ensure that Dreamers can continue to learn, thrive and contribute to our country.
