

## Announcing IQWST Concept Builders

Four new supplements for IQWST enable teachers to teach all key content areas in middle school science. With these supplements, IQWST addresses all NGSS Disciplinary Core Ideas.

### **IQWST Concept Builders include:**

- Human Impacts on Earth's Systems
- Earth and Space Science
- Macroevolution
- Engineering Design

### **The Human Impacts, Macroevolution and Earth and Space Science supplements include:**

- Approximately 2 weeks of activities (9-10 activities across 3-4 lessons, designed for ten 50-minute class periods).
- 1 kit with the materials for all activities in the supplement

### **Across the Engineering Design supplement, all of the NGSS Engineering PEs are addressed. It can be used with or without IQWST. The supplement includes:**

- 12 engineering activities – one to support the scientific principles addressed in each of the 12 IQWST units.
- 12 readings, each of which connects in-class activities to life outside the classroom and the type of engineer (mechanical, biomedical, civil, etc.) who would do the kind of work.
- 12 kits—one for each activity—to allow schools to purchase kits for the corresponding IQWST units that they are using.

### **Components**

- Teacher Edition (with answers for SE and for discussion questions)
- Student Edition
- Kit(s)

### **Pricing**

- TE books: \$49.99
- SE books: \$3.49
- SE 8 pack: \$24.99
- SE 8 pack (color): \$34.99
- Kit price: varies based on materials.
