CUVETTE BUYING GUIDE

A comprehensive list of premium quality cuvettes for a wide variety of applications and instruments.

CUVETTES SPECIFICALLY FOR YOUR MAKE & MODEL

- Spectrophotometer cuvettes
- Fluorometer cuvettes
- Cuvette accessories
- Tablet dissolution & flow cells
- Sub-micro volume cuvettes
- Dye laser cells
- Plates & discs
- Microfluidic chips
- Flow channel cells
- Gas cells
- Custom manufacturing
- UV/VIS/NIR spectrophotometer calibration standards
- Fluorescence calibration standards
- Evacuable dies
- Refractometers
- and much more...

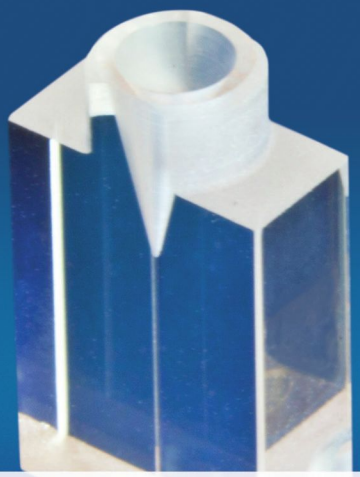
PRECISION QUARTZ GLASS MANUFACTURING

TABLE OF CONTENTS



About our cuvettes

Each cuvette is thoroughly inspected through our meticulous quality control system, against the industry's highest standards. Rest assured that each cuvette you order has passed this rigorous examination.

Our staff has been supplying reputable researchers and laboratories with standard and specialized cuvettes for many decades.

When you order from FireflySci, Inc., you are ordering from a well established, highly regarded cuvette company. Our cuvettes are 100% guaranteed to meet your quality standards in all regards: Transmission, assembly, matching – everything.

At FireflySci, Inc., quality is number one.

To our customers

We wish to thank you for your support, which clearly indicates your satisfaction with our products. We hope that this new catalog, with its many new, exciting products, will be of help in your professional work.

All our products are guaranteed and are offered at the lowest possible prices without compromising quality.

As one of the many scientists and professionals who now use our products, you know that FireflySci, Inc., specializes in the design and fabrication of the highest quality fire fused cuvettes available on the market today. Our aim is to provide you, our customers, with exactly the type of product your work requires.

FireflySci's scientists, engineers, designers and shop personnel have many years of experience in designing and fabricating cuvettes.

If the exact cell your work requires is not included in this catalog, please contact us. We will also fabricate non-standard cells to your specific requirements.

Your comments and suggestions are always welcome.

Sincerely yours,
The Staff at FireflySci, Inc.

Information for manufacturers

The FireflySci factory, has since become well known for its high quality silica glass products, ranging from raw materials to high precision final products. FireflySci has been recognized as a leader in the silica industry for its accumulated abilities, established and innovative technology, and superior quality. We have built reputable quality assurance systems to meet the high standards of our customers, and thusly acquired ISO9001 certification, as well as other domestic quality assurance certifications.

Manufacturers throughout analytical and diagnostic industries, demanding a reliable and technically aggressive silica glass company, have turned to FireflySci for their silica glass components.

Technology innovation and superior quality, combined with excellent service, continues to be the foundation of our philosophy.

Our precision and dedication to quality has allowed us to serve large, world class instrument manufacturers with high caliber optical components for decades.

To see what FireflySci, Inc., can do for your company, please call **+1-347-441-4277**

Contact Us / Customer Service

We can easily be reached for placing orders, requesting quotations, technical inquiries, customer service, and any other comments or questions you might have.

info@fireflysci.com

Mailing Address:

1014 E. 21st Street, Suite A
Brooklyn, NY 11210 USA

We can be reached via phone during the following hours: Monday through Friday, 9:00am - 5:00pm New York time

Ordering Information

Payment:
We accept Visa, MasterCard, and American Express. Please provide number, expiration date, name on card, billing address, and CID number.

We also offer Net 30 Days to established accounts. For an account with us, please send us 4 credit references. We can ship your orders via Net 30 Days once your references have been verified.

Special payment terms apply to international customers. Please inquire.

All prices are FOB/EXW Brooklyn, NY

Shipment, within the USA and Canada:
Our standard mode of shipment is UPS Ground (or UPS Standard to Canada). 1 Day, 2 Day, and 3 Day are also available. Collect shipments to a UPS, TNT, or FedEx account are also available. Collect shipments are shipped insured unless otherwise specified. Terms are FOB Brooklyn, New York.

Shipment, outside the USA and Canada:
Our standard mode of shipment depends on the destination country. We source from a number of carriers to find you the least expensive rates and most reliable service. Standard terms are FCA Brooklyn, New York.

Return policy:
Customers may return cuvettes for refund, exchange, or credit. Returns due to FireflySci error are completely refundable, including shipping.

If items are being returned due to customer error, refund, exchange, or credit can only be issued upon receipt and inspection of cuvettes. The items must be unused to be accepted.

Used cuvettes can also be returned. In these cases, no refund, exchange, or credit is issued until the cuvette has gone through our QC and cleaning departments, at which time a fee is calculated based on the contamination of the cuvette. In some cases, no refund, exchange, nor credit can be provided, and the cuvettes will be shipped back to you as is. Otherwise, a partial credit is applied.

Due to a low volume of returns, no RMA# Is necessary. Please call ahead before you mail the items back.

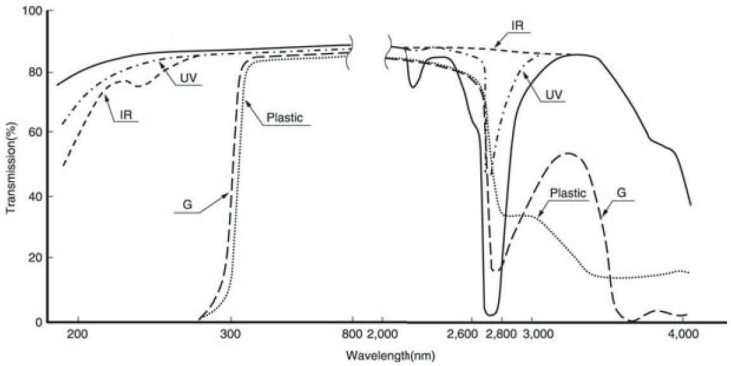
Material Information

All the cuvettes you order are automatically shipped in optically matched sets. If you want to purchase a new cuvette to match an older one, please let us know.

Also regarding our materials, the following information is available:

- Black quartz information
- Purity
- Chemical compatibility
- Thermal properties
- Fluorescence, refractive index, and other optical qualities

Usable Range & Matching Tolerances			
MATERIAL	**ABBREVIATION**	**USABLE RANGE**	**MATCHING TOLERANCE**
Optical Glass	G	340 - 2,500nm	1% at 350nm
UV Quartz	UV	190 - 2,500nm	1% at 220nm
IR Quartz	IR	220 - 3,500nm	1% at 2,730nm
Pyrex Glass		320 - 2,500nm	
Sapphire		250 - 5,000nm	



Light Path, Tolerances, and Other Specifications

Regarding general specifications, please note that each part number has its own tolerances. We can also provide information regarding window flatness, polish, and parallelism. Please contact us for this, as well as additional material data listed above.

Frequently Asked Questions

Q: I have a specific instrument, and I need to make sure the cuvettes in this catalog are compatible…

A: The cuvettes in this catalog are guaranteed to work in a myriad of different instruments. Call or email to request a conversion chart between the part numbers of your instruments' cuvettes and our cuvettes.

Q: Is AR coating available?

A. Yes. Please contact us and provide the following information:

1. What P/N do you need coated?
   If it is a custom item, please see page 7.
2. What wavelength are you working in?
3. What is your target percentage of transmission?
   For example, "98% at 350nm."
4. What quantity of the above P/N do you need coated?

Q: Do you manufacture cells for Circular Dichroism (CD)?

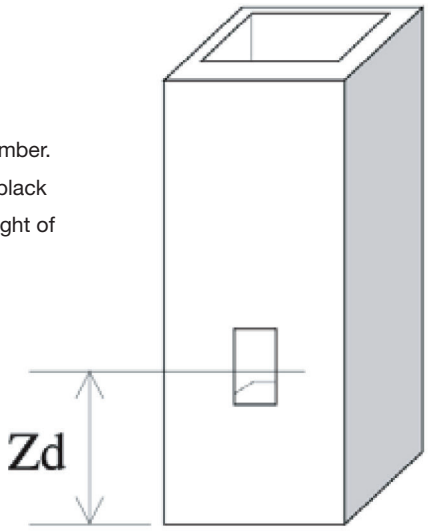
A: Yes. Please contact us, and let us know if you need a rectangular or circular cuvettes for your application. We will recommend certain parts to you, and provide more information regarding our cuvettes for CD applications.

Q: What is the Z-dimension (Zd) or Center Height?

A: The Z-dimension is the height from the bottom of the cuvette to the center of its sample chamber. In cases where the cuvette's polished window is very small (where usually the entire cuvette is black aside from the aperture window), the Z-dimension of the cuvette should be the same as the height of the instrument's light beam.

The Z-dimension is usually 8.5 or 15mm, depending on your instrument's manufacturer.

Only certain cuvettes depend on the correct Z-dimension to be used.
These cuvettes have Z-dimension (Zd) information provided in their data table.



Cleaning and Handling

Cuvettes must be scrupulously clean. Optical surfaces should not be touched as oil smudges are difficult to remove. Purity of solvents used for sample and cleaning is important. Only distilled water or spectrophotometric grade solvents should be used to avoid contamination from impure solvents. As soon as possible after use, cuvettes should be rinsed and soaked in distilled water.

For cleaning, use a mild detergent solution containing no lanolin, oils, or insoluble matter. To remove stubborn contaminants, cuvettes can be soaked for a few minutes in mild sulfuric acid. Never allow cuvettes to soak in hot concentrated acids, alkalis, or other agents which may etch the polished optical surfaces. After cleaning with detergent and/or acid, cuvettes should be thoroughly rinsed with distilled water. Avoid blowing the cuvette with air to dry them. It is better to speed evaporation by means of suction.

Please see page 33 for cuvette cleaners.

Please contact us if you need any further cleaning information.

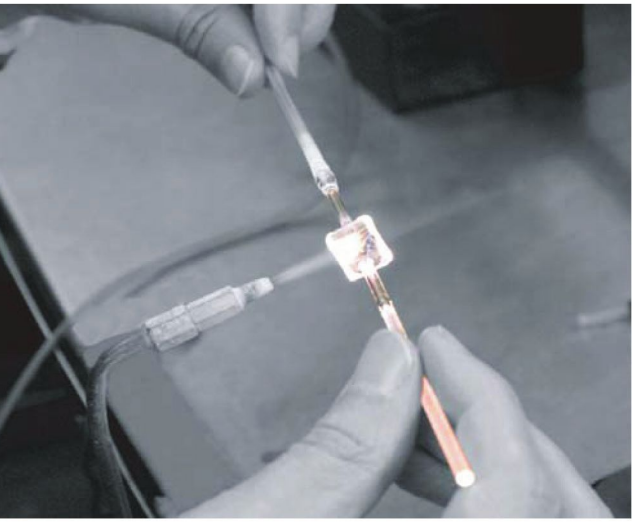
cuvette washer
page 50

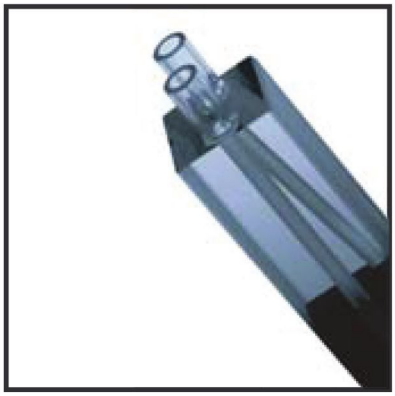


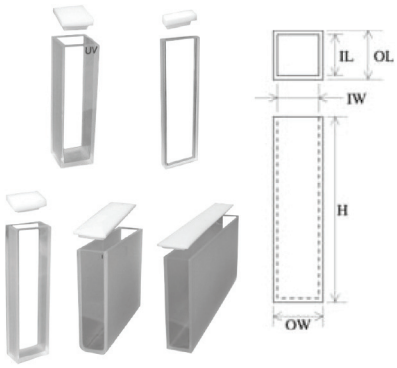
Custom Designs

In order to manufacture your custom quartz glass part, we need the following information:

1. Material (Glass, or other (please specify))
2. All relevant dimensions and dimension tolerances.
   If you do not provide tolerances, our standard tolerances will be used.*
3. All critical tolerances and critical areas.*
4. Which surfaces to be polished.
5. Please fax or email a sketch. A rough drawing is also fine.
6. Application information.
7. Quantities you need a quotation for.
8. Deadline for quotation and/or manufacturing, if applicable.

*We cannot be responsible for any dimensions not explicitly provided by the customer.





TYPE 1

Standard cuvette with PTFE cover

- Two windows polished

Polished = Optical polishing
L/P = Light Path

Outer Dimensions (mm)				Inside Dimensions (mm)			Material & Part Numbers

Micro Focus Cell

Ultra-micro low volume cell with a 1.9µl capacity

Outer Dimensions (mm)				Chamber Dimensions (mm)			Material & Part Numbers
L/P (mm)	LENGTH	WIDTH	HEIGHT	LENGTH	ZD (mm)	CAPACITY (µl)	UV
1	12.5	12.5	45.0	1.0	8.5- 20.0	1.9	MFC-1

INCLUDED IN THE KIT IS THE FOLLOWING:

- A 12.5x12.5mm micro focus adapter that fits into any spectrophotometer.
- A UV Quartz micro tray to inject a sample in.
- Spacers to adjust the micro focus adapter to the proper Z-Dimension in your spectrophotometer.
- Cleaning swabs.
- Instructions.

HERE IS A BASIC GUIDE TO USING THE MICRO FOCUS CELL CONVERSION KIT:

1. To use the conversion kit all you have to do is check the Z-dimension of your machine.
The Z-Dimension of the Micro Focus adapter is 8.5 mm so if you have a machine with an 8.5 or 20mm z-dimension you'll need to use the appropriate spacer.
2. Next insert the Micro Focus Adapter into the spectrophotometer. Pull out the UV Quartz micro chamber.
The micro chamber is a 1 mm lightpath cuvette that holds a sample of 1.9µl.
3. Inject your sample into the quartz chamber and insert this into the Micro Focus Adapter.
4. Run your experiment.
5. Celebrate how easy that was to do and how much money you saved.

APPLICATIONS FOR THE MICRO FOCUS CELL:

- DNA Measurement
- RNA Measurement
- DNA Quantification
- Nucleic Acid Analysis
- Protein Concentration
- All small volume applications (0.3-1.9µl)

- Only the Micro Focus Cell can offer these guarantees:
- Quick: Load and empty your sample into the cell without even removing it from the machine.
This equals consistent alignment through multiple tests.
- Guaranteed to work in your spectrophotometer (any Z dimension/center height is compatible) Leak proof design.

Our job is design and manufacture the most innovative and quality cuvettes. Your job is to use them and change the world: 0.1µl at a time. Let us know how else we can help.

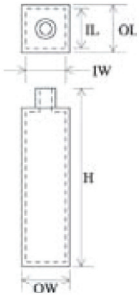
info@fireflysci.com 1-347-441-4277

TYPE 34S

Large Cylindrical Polarimeter Cell with Screw Caps

- Includes 2 SC2 open screw caps and two SC1 closed screw caps

Outer Dimensions (mm)				Inside Dimensions (mm)			Material & Part Numbers
L/P (mm)	LENGTH	HEIGHT	DIAMETER	DIAMETER	LENGTH	CAPACITY (ml)	UV
50	52.5	35.5	22.0	19.0	50.0	14.000	34SUV50
100	102.5	35.5	22.0	19.0	100.0	28.000	34SUV100



TYPE 41

Standard cuvette with screw cap

- Two windows polished
- Height includes threading, but not screw cap
- Cuvette comes with both open and closed screw caps
- Each cap contains a PTFE septa seal
- Suitable for anaerobic work

Outer Dimensions (mm)				Inside Dimensions (mm)			Material & Part Numbers	
L/P (mm)	LENGTH	WIDTH	HEIGHT	LENGTH	WIDTH	CAPACITY (ml)	G	UV

Water jacketed cylindrical cuvette with PTFE stopper

- Two windows polished
- Tubes to water jacket: OD5 x ID3 x L25mm
- Height is without inlet/outlet tubes

Outer Dimensions (mm)				Inside Dimensions (mm)			Material & Part Numbers	
L/P (mm)	LENGTH	WIDTH	HEIGHT	LENGTH	WIDTH	CAPACITY (ml)	UV	IR
5	7.5	23.0	32.0	5.0	13.0	0.660	50UV5	50IR5
10	12.5	23.0	32.0	10.0	13.0	1.320	50UV10	50IR10
50	52.5	23.0	32.0	50.0	13.0	6.600	50UV50	50IR50

TYPE 51H

Water jacketed cuvette with horizontal tubes

- Two windows polished
- Tubes to water jacket: OD4 x ID2 x L12.5mm
- Width is without tubes

Outer Dimensions (mm)				Chamber Dimensions (mm)				Material & Part Numbers	
L/P (mm)	LENGTH	WIDTH	HEIGHT	LENGTH	WIDTH	HEIGHT	CAPACITY (ml)	UV	IR
10	12.5	12.5	50.0	10.0	4.0	45.0	1.500	51HUV10	51HIR10

TYPE 51V

Water jacketed cuvette with vertical tubes

- Two windows polished
- Tubes to water jacket: OD4 x ID2 x L12.5mm
- Height is without tubes

Outer Dimensions (mm)				Chamber Dimensions (mm)				Material & Part Numbers	
L/P (mm)	LENGTH	WIDTH	HEIGHT	LENGTH	WIDTH	HEIGHT	CAPACITY (ml)	UV	IR
10	12.5	12.5	50.0	10.0	4.0	45.0	1.500	51VUV10	51VIR10

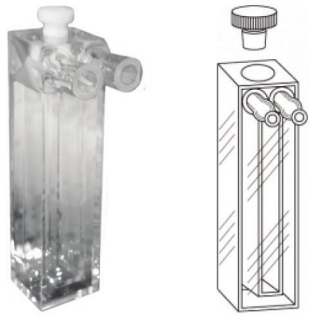
info@fireflysci.com 1-347-441-4277

TYPE 53

Water jacketed cuvette with PTFE stopper, 2.4ml

- Two windows polished
- Width is without tubes
- Tubes to water jacket: OD4 x ID2 x L12.5mm
- Height is without stopper

	Outer Dimensions (mm)			Chamber Dimensions (mm)				Material & Part Numbers	
L/P (mm)	LENGTH	WIDTH	HEIGHT	LENGTH	WIDTH	HEIGHT	CAPACITY (ml)	UV	IR
10	12.5	12.5	50.0	10.0	4.0	42.0	1.400	53UV10	53IR10



TYPE 54

Water jacketed cuvette with PTFE stopper, 1.2ml

- Two windows polished
- Length is without tubes
- Tubes to water jacket: OD4 x ID2 x L10mm
- Height is without stopper

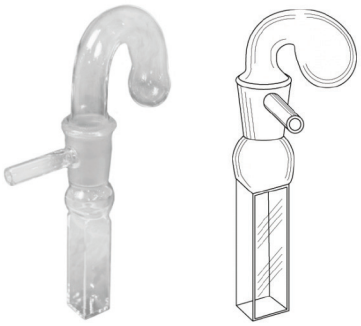
	Outer Dimensions (mm)			Chamber Dimensions (mm)				Material & Part Numbers	
L/P (mm)	LENGTH	WIDTH	HEIGHT	LENGTH	WIDTH	HEIGHT	CAPACITY (ml)	UV	IR
10	12.5	12.5	48.0	10.0	4.0	36.0	1.200	54UV10	54IR10

TYPE 26

Short anaerobic cuvette with glass pouch

- Two windows polished
- Height is without glass pouch
- Overall height is approximately 65mm

	Outer Dimensions (mm)			Chamber Dimensions (mm)				Material & Part Numbers	
L/P (mm)	LENGTH	WIDTH	HEIGHT	LENGTH	WIDTH	HEIGHT	CAPACITY (ml)	UV	IR
2	4.5	12.5	45.0	2.0	10.0	30.5	0.500	26UV2	26IR2
5	7.5	12.5	45.0	5.0	10.0	30.5	1.250	26UV5	26IR5
10	12.5	12.5	45.0	10.0	10.0	30.5	2.500	26UV10	26IR10



TYPE 28

Standard anaerobic cuvette with glass pouch

- Two windows polished
- Height is without glass pouch
- Overall height is approximately 125mm

	Outer Dimensions (mm)			Chamber Dimensions (mm)				Material & Part Numbers	
L/P (mm)	LENGTH	WIDTH	HEIGHT	LENGTH	WIDTH	HEIGHT	CAPACITY (ml)	UV	IR
2	4.5	12.5	84.0	2.0	10.0	44.0	0.700	28UV2	28IR2
5	7.5	12.5	84.0	5.0	10.0	44.0	1.750	28UV5	28IR5

info@fireflysci.com 1-347-441-4277

TYPE 71

Bubble forming anaerobic cuvette with glass pouch

- Two windows polished
- Overall height is approximately 102mm
- Height is without glass pouch

	Outer Dimensions (mm)			Chamber Dimensions (mm)				Material & Part Numbers	
L/P (mm)	LENGTH	WIDTH	HEIGHT	LENGTH	WIDTH	HEIGHT	CAPACITY (ml)	UV	IR
10	12.5	12.5	76.5	10	10	45.0	3.500	71UV10	71IR10

1-11 Tandem (Divided) Cuvettes

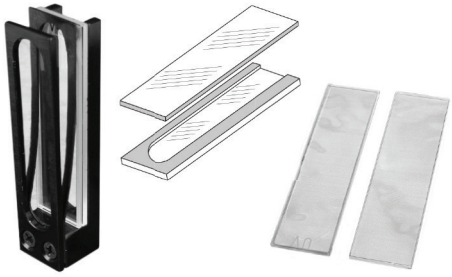
TYPE 25A

Tandem cuvette

- Two windows & partition polished
- Height of partition is approximately 37mm

	Outer Dimensions (mm)			Inside Dimensions (mm)			Material & Part Numbers	
L/P (mm)	LENGTH	WIDTH	HEIGHT	LENGTH	WIDTH	CAPACITY (ml)	UV	IR
10	12.5	12.5	45.0	2x4.5	10	2 x 1.300	25AUV10	25AIR10

1-12 Demountable Cuvettes



TYPE 19

U-demountable cuvette with removable window

- Two windows polished

	Outer Dimensions (mm)			Chamber Dimensions (mm)				Material & Part Numbers	
L/P (mm)	LENGTH	WIDTH	HEIGHT	LENGTH	WIDTH	HEIGHT	CAPACITY (ml)	UV	IR
0.05	2.55	12.5	45.0	0.05	10.0	41.5	0.020	19UV0.05	19IR0.05

2	4.5	12.5	45.0	2.0	10.0	38.0	0.720	20UV2	20IR2

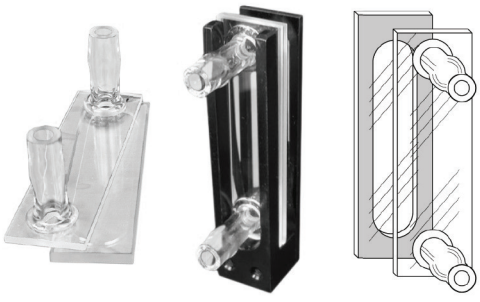
*A20 cell mount not included. See page 48

TYPE 42

Demountable Disc Circular Dichroism Cuvette

- Two windows optically polished
- Disc-shaped demountable spectrophotometer cuvette with removable window

	Outer Dimensions (mm)		Chamber Dimensions (mm)		Material & Part Numbers
L/P (mm)	LENGTH	WIDTH	WIDTH	CAPACITY (ml)	UV
0.1	2.6	22.0	16	0.02	42UV0.1
0.2	2.7	22.0	16	0.04	42UV0.2
0.5	3.0	22.0	16	0.08	42UV0.5
1	3.5	22.0	16	0.16	42UV1
2	4.5	22.0	16	0.32	42UV2



TYPE 49

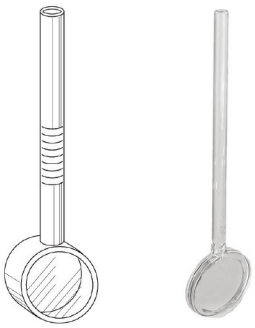
O-demountable cuvette with removable window

- Two windows polished
- Tubes are made of quartz
- Inlet/outlet tubes: OD5 x ID3 x L15mm
- Outside length does not include tubes

	Outer Dimensions (mm)			Chamber Dimensions (mm)				Material & Part Numbers	
L/P (mm)	LENGTH	WIDTH	HEIGHT	LENGTH	WIDTH	HEIGHT	CAPACITY (ml)	UV	IR
0.1	2.6	12.5	45.0	0.1	9.0	38.0	0.030	49UV0.1	49IR0.1
0.2	2.7	12.5	45.0	0.2	9.0	38.0	0.060	49UV0.2	49IR0.2
0.5	3.0	12.5	45.0	0.5	9.0	38.0	0.150	49UV0.5	49IR0.5
1	3.5	12.5	45.0	1.0	9.0	38.0	0.300	49UV1	49IR1
2	4.5	12.5	45.0	2.0	9.0	38.0	0.600	49UV2	49IR2

*A20 cell mount not included. See page 48

info@fireflysci.com 1-347-441-4277



TYPE 37

Micro cylindrical cuvette with graded seal tube

- Two windows polished
- Quartz or glass to glass graded seal tube: OD5 x ID3mm
- Overall height is approximately 92mm

	Outer Dimensions (mm)		Inside Dimensions (mm)			Material & Part Numbers		
L/P (mm)	LENGTH	DIAMETER	LENGTH	DIAMETER	CAPACITY (ml)	G	UV	IR
1	3.5	22.0	1.0	19.0	0.280	37G1	37UV1	37IR1

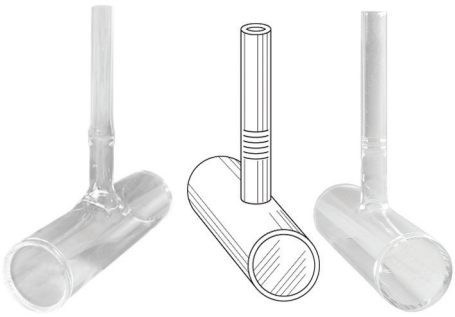
10	12.5	12.5	45.0	10.0	10.0	3.500	61UV10	61IR10



TYPE 504

Gas absorption cuvette with graded seal tube

- Two windows polished
- Quartz to glass graded seal tube: OD8 x ID6mm
- Overall height is approximately 84mm

	Outer Dimensions (mm)		Inside Dimensions (mm)			Material & Part Numbers	
L/P (mm)	LENGTH	DIAMETER	LENGTH	DIAMETER	CAPACITY (ml)	UV	IR
74	80.0	22.0	74.0	19.0	21.000	504UV74	504IR74

TYPE 505

Semi-micro cuvette with graded seal tube

- Two windows polished
- Quartz to glass graded seal tube: OD8 x ID6mm
- Base thickness is 3mm
- Overall height is approximately 125mm

	Outer Dimensions (mm)			Inside Dimensions (mm)			Material & Part Numbers	
L/P (mm)	LENGTH	WIDTH	HEIGHT	LENGTH	WIDTH	CAPACITY (ml)	UV	IR
10	12.5	12.5	45.0	10.0	4.0	1.400	505UV10	505IR10

info@fireflysci.com 1-347-441-4277

TYPE 64

Cryogenic cuvette with PTFE cover

- Two windows polished
- All joints are excessively fused to round corners
- Minimum working area of windows is 4mm wide

	Outer Dimensions (mm)			Inside Dimensions (mm)			Material & Part Numbers	
L/P (mm)	LENGTH	WIDTH	HEIGHT	LENGTH	WIDTH	CAPACITY (ml)	UV	IR
10	12.5	12.5	45.0	10.0	10.0	3.500	64UV10	64IR10

TYPE 65

Cryogenic cuvette with PTFE stopper

- Two windows polished
- All joints are excessively fused to round corners
- Minimum working area of windows is 4mm wide

	Outer Dimensions (mm)			Inside Dimensions (mm)			Material & Part Numbers	
L/P (mm)	LENGTH	WIDTH	HEIGHT	LENGTH	WIDTH	CAPACITY (ml)	UV	IR

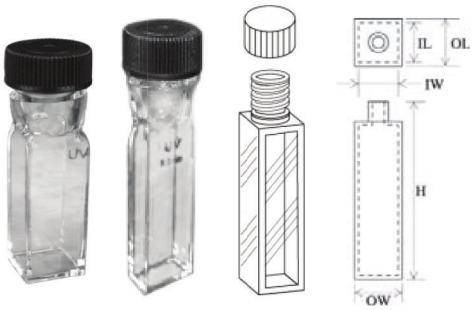
2-4 Screw Cap Fluorometer Cuvettes



TYPE 41FL

Standard fluorometer cuvette with screw cap

- Four windows and base polished
- Height includes threading, but not screw cap
- Cuvette comes with both open and closed screw caps
- Each cap contains a PTFE septa seal
- Suitable for anaerobic work and dye laser applications

Outer Dimensions (mm)				Inside Dimensions (mm)			Material & Part Numbers
L/P (mm)	LENGTH	WIDTH	HEIGHT	LENGTH	WIDTH	CAPACITY (ml)	UV

TYPE 608FL

HPLC UV Quartz Flow Cell

- Comes with stainless steel inlet/outlet pipes.
- Dimensions of tubing: Inlet (OD1.6 x ID0.25 x L100mm); Outlet (OD1.6 x ID0.5 x L100mm)
- All cells and tubing tested to 5 bars of pressure (75psi).
- In metal and black quartz housing
- Comes in 3 lightpaths- 1, 1.5 and 3mm
- Available in Z-Dimensions of 8.5 and 15mm
- Three windows optically polished

	Outer Dimensions (mm)			Chamber Dimensions (mm)					Material & Part Numbers

TYPE 8830

µ fluorescence flow cell

- Four windows polished

	Outer Dimensions (mm)			Chamber Dimensions (mm)					Material & Part Numbers
L/P (mm)	LENGTH	WIDTH	HEIGHT	LENGTH	WIDTH	HEIGHT	ZD (mm)	CAPACITY (µl)	UV
1	12.5	12.5	45.0	1.0	1.0	21.0	20.0	20	8830UV1

This cell has been designed to facilitate the monitoring of HPLC fractions whilst using a spectrofluorometer.

The sample cavity is constructed so that the sample volume is kept to a minimum (20µl nominal). The cell has a large aperture capable of accepting the full exciting and fluorescent radiation. A fluorescence free grade of fused silica has been carefully selected for the construction of the cell which is of a square cross section. The flat sides ensure that any scattering of the incident radiation is kept to a minimum but still allows maximum throughput.

The sample cavity is mounted in an aluminum alloy housing 12.5mm square. Both flow tubes are fitted to the upper face and are 1.5mm OD and 0.25mm ID by 75mm long.

This construction enables the cell to fit any cuvette holder designed for standard fluorescence cuvettes.

3-5 Spacers

Spacers are used to reduce volume and light path for standard 10mm l/p cuvettes such as Types 1 & 1FL.

This silica block with a 30mm optical portion is suspended from a flat cover by a fused member which is narrower than the block, to form an overflow chamber when placed in the cuvette.

Spacers cannot be used in a Type 5 cell. Also, please note that due to tolerances, the Type 1 or 1FL you plan to use with the spacer ought to be ordered with the spacer to ensure proper fit.

TYPE 527

Precision 2-way insert spacer

- All sides polished

	Outer Dimensions (mm)			Material & Part Numbers
L/P (mm)	LENGTH	WIDTH	HEIGHT	UV
1.00 & 5.00	9.00	5.00	46.50	527UV9X5
1.00 & 3.00	9.00	7.00	46.50	527UV9X7

PTFE COVERS

PART#	DESCRIPTION
A100	PTFE Cover for 100mm cells (Type 1-100mm)
A101	PTFE Cover for 1mm cells (Types 1-1mm, 52-10x1mm)
A102	PTFE Cover for 2mm cells (Types 1-2mm, 52-10x2mm)
A105	PTFE Cover for 5mm cells (Types 1-5mm, 1FL-5mm, 52-10x5mm)
A110	PTFE Cover for 10mm cells (Type 1-10mm, 1FL-10mm, 5, 64, 64FL, 508, 1P, 25A, 25AFL)
A120	PTFE Cover for 20mm cells (Type 1-20mm, 1FL-20mm)
A130	PTFE Cover for 30mm cells (Type 1-30mm, 1FL-30mm)
A140	PTFE Cover for 40mm cells (Type 1-40mm, 1FL-40mm)
A150	PTFE Cover for 100mm cells (Type 1-50mm, 1FL-50mm)
A305	PTFE Semi-Micro Cover for 5mm cells (Type 9-5mm, 9M-5mm)
A310	PTFE Semi-Micro Cover for 10mm cells (Type 9-10mm, 9M-10mm, 9FL-10mm)
A320	PTFE Semi-Micro Cover for 20mm cells (Type 9-20mm, 9M-20mm)
A330	PTFE Semi-Micro Cover for 30mm cells (Type 9-30mm, 9M-30mm)
A340	PTFE Semi-Micro Cover for 40mm cells (Type 9-40mm, 9M-40mm)
A405	PTFE Micro Cover for 5mm cells (Type 17-5mm, 18-5mm, 17M-5mm, 18B-5mm, 18BM-5mm, 18M-5mm)
A410	PTFE Micro Cover for 10mm cells (Type 17-10mm, 18-10mm, 17M-10mm, 18B-10mm, 18BM-10mm, 18M-10mm)
A420	PTFE Micro Cover for 20mm cells (Type 17-20mm, 18-20mm, 17M-20mm, 18B-20mm, 18BM-20mm, 18M-20mm)
A430	PTFE Micro Cover for 30mm cells (Type 17-30mm, 18-30mm)
A440	PTFE Micro Cover for 40mm cells (Type 17-40mm, 18-40mm)
A450	PTFE Micro Cover for 50mm cells (Type 17-50mm, 18-50mm, 18B-50mm)
AT4	PTFE Cover for Type 4
AT507	PTFE Cover for Type 507
AT9B10X1	PTFE Cover for Type 9B-10x1mm
AT9B10X3	PTFE Cover for Type 9B-10x3mm
AT9B10X5	PTFE Cover for Type 9B-10x5mm

PTFE STOPPERS

PART#	DESCRIPTION
B201	PTFE Stopper for 1 and 2mm cells (Type 21-1mm, 21-2mm)
B205	PTFE Stopper for 5mm cells (Type 21-5mm, 21FL-5mm, 29-5mm, 30-5mm, 82, 29BM 5mm, 29M-5mm, 30BM 5mm, 30M-5mm, 520M-5mm)
B210	PTFE Stopper for 10mm cells (Type 21-10mm, 21-20mm, 21-30mm, 21-40mm, 21-50mm, 21FL-10mm, 21FL-20mm, 21FL-40mm, 29-10mm, 29-20mm, 29-40mm, 30-10mm, 30-20mm, 30-40mm, 32-10mm, 35-10mm, 65, 66, 29BM-10mm, 29BM-20mm, 29BM-30mm, 29BM-40mm, 30BM-10mm, 30BM-20mm, 30M-10mm, 30M-20mm, 515A, 65FL)
B250	PTFE Stopper (Type 32-20mm, 34-50mm, 34-100mm, 35-20mm, 35-50mm)
BT50	PTFE Stopper for Type 50
BT53	PTFE Stopper for Type 53
BT54	PTFE Stopper for Type 54 and Type 54FL
BT607	PTFE Stopper for Type 607
D010	PTFE threaded stoppers for sub-micro cells

C010 C110

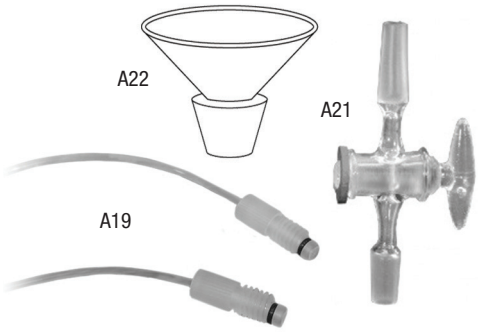
QUARTZ TOPS

PART#	DESCRIPTION
C010	Quartz Cap (Type 11-10mm, 11-40mm, 11-50mm, 13-10mm, 13-20mm, 13-40mm)
C110	Quartz Stopper for Type 31

SC1 SC3 SC2 SEPTA

SCREW CAPS

PART#	DESCRIPTION
SC1	Closed screw cap (comes with PTFE septa)
SC2	Open screw cap (comes with PTFE septa)
SC3	Mininert Screw Cap Valve
SEPTA	PTFE septa for closed and open screw caps (SC1 and SC2)

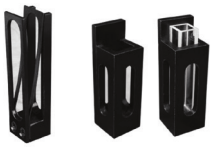


A22 A21 A19

SPECIAL TOPS

PART#	DESCRIPTION
A19	M6 Threaded Connectors for Tablet Dissolution Cells (T-601, 602, 605, 606)
A21	Stopcock - Will fit any of the stoppered cells in this catalog.
A22	Funnel - Will fit any of the stoppered cells in this catalog.

info@fireflysci.com 1-347-441-4277



A20 A23

A24

A25

A26

These cell mounts will fit into any standard spectrophotometer cell holder.
A23 can also be used in fluorometers.

PART#	DESCRIPTION
A20	Cell Mount for rectangular cells less than 5mm light path (Type 1-1mm, 1-2mm, 19, 20, 21-1mm, 21-2mm)
A23	Cell Mount suitable for Type 4
A24	Cell Mount suitable for Type 507 and Type 607)
A25	Spacer for 1mm, 2mm and 5mm lightpath cells
A26	Cell mount suitable for Type 42

5-3 Cases & Cell Rack

PART#	DESCRIPTION
CASEA4	Polyfoam case for 45mm high cells - holds 4 cells
CASEB4	Polyfoam case for 49-55mm high cells - holds 4 cells
CASEP2	Plastic (transparent) case to hold 2 cells up to 10mm
CASEP4	Plastic (opaque, black) case to hold 4 cells up to 10mm L/P each, or two 20mm L/P cells, or one 50mm L/P cell.
CASE G6	Plastic (opaque, black) case to hold 6 cells up to 10mm L/P each or 3 20mm L/P cells or two 50mm L/P cell
P66	12-HOLE CELL RACK: The rack is designed to hold 12 ten millimeter path length cells. It is manufactured in polyethylene to ensure that windows cannot be scratched or damaged when being placed in the rack.

5-4 Cuvette Washers

P65S

P65D

GASKET

STOPPER7

FULL KIT

PART#	DESCRIPTION
P65S	Single Cell Washer - This model is designed to wash one cell at a time. It comes with a rubber stopper for fitting into a size 7 standard vacuum flask. The cell is subjected to a minimum amount of handling with less risk of breakage or damage to optical faces. GASKET and STOPPER7 included in purchase. (Flask and pump not included.)
P65D	Double Cell Washer - This model is designed to wash two cells at a time and is extremely useful for matched pairs of cells, ensuring they are both subjected to the same washing treatment. It comes with a rubber stopper for fitting into a size 7 standard vacuum flask. The cells are subjected to a minimum amount of handling with less risk of breakage or damage to optical faces. GASKET and STOPPER7 included in purchase. (Flask and pump not included.)
GASKET	Small rubber gasket for P65S or P65D.
STOPPER7	Stopper for cell washers to fit size 7 vacuum flask.
Cuvette Washer Full Kit	Full kit for washing cuvettes -contains filtering flask, vinyl tubing, cuvette washer, gasket and stopper

info@fireflysci.com 1-347-441-4277

5-4 Cuvette Washers

CUVETTE CLEANING SOLUTIONS	
MFCSwab	Cleaning swabs for Micro Focus Cell and other Cuvettes
Cuvette Squeegee	Window washer for FireflySci cuvettes
Double-Sided Lens Cloth	Double-sided, high quality lens cloth for cleaning optical surfaces on cuvettes

5-5 Mixers/Stirrers

P72

P73 P67 P68 P69

PART#	DESCRIPTION
P67	STIRRING ROD: Manual stirring rod with flared end, manufactured in polyethylene for use in 10mm cuvettes.
P68	SEMI-MICRO CUVETTE ADD-A-MIXER: Manual mixer fits any semi-micro 10mm pathlength cuvette with a 4mm inside with or larger.
P69	CUVETTE ADD-A-MIXER: Manual mixer fits any macro cuvette with 10mm lightpath or larger.
P72	MINI CUVETTE STIRRER: Mini Spectrophotometer Precision Cell Stirrer: This PTFE magnetic centrifugal stirrer fits into cuvettes with smaller apertures and volumes and provides rapid vertical and horizontal mixing with a minimum of vortexing when placed on a magnetic stirring machine. Centrifugal pumping action generated by the cross channels in the upper face mixers without aeration. Photometric measurements can proceed uninterrupted while reagents are added. • Dimensions- 7 x 2mm • For use with narrow-necked and semi-micro cuvettes
P73	SPECTROPHOTOMETER PRECISION CELL STIRRER: The PTFE magnetic centrifugal stirrer fits into the standard 10mm light path spectral cell and provides rapid vertical and horizontal mixing with a minimum of vortexing when placed on a magnetic stirring machine. Centrifugal pumping action generated by the cross channels in the upper face mixes without aeration. Photometric measurements can proceed uninterrupted while reagents are added. 9.5mm diameter x 8mm high, the one-piece molded unit will not scratch cuvettes and has no crevices to trap dirt. May also be used in test tubes.
P82	ELECTRONIC CELL STIRRER: Stir cell content while measuring absorbance. Fits all standard spectrophotometers and fluorometers. The sample is mixed by a tiny magnetic stir bar which is placed at the bottom of your cell. A small electronic rotation magnet assembly is placed under the cell in the cell compartment. This raises the cell up 5mm which allows you to use less sample volume and will not interfere with your unit's operation. Speed of mixer's rotation is controlled by an external controller connected by a 36" long paper thin ribbon, allowing your instrument to close normally. Controller is 4" x 2.5" x 3" high (including speed controller knob). Magnetic stir bar fits any 10x10mm ID cell, and will stir up to 30mm in internal height. The bar is 8mm high x 9.5mm in diameter. Available for 110-120 or 220-240 VAC wall current. (220-240 VAC Par Number: P82220)

WHY VALIDATE AND CALIBRATE WITH FIREFLYSCI?

As the world's foremost spectrophotometer reference standard manufacturer, we have a dedicated staff and years of experience to back up our products. Our solid state UV/VIS/NIR reference standards are the most stable on the market and remain in spec long after many other manufacturer's standards go bad. Relying on our proprietary nanodeposition technology, you can rest assured that our solid-state standards will produce steady readings for years to come on your machines.
Other companies keep you bogged down with costly and recurrent recalibrations, which drain time and resources, putting a large drain on your QC department.

The Highest Quality, Most Cost-Effective and Speedy Recalibrations
Let's say that you have some filters from another company already that you'd like to hang onto and recalibrate. No problem. All you need to do is to contact us and let us know. Our average turnaround time is about 1-2 weeks. We will beat anyone's prices and you can proceed knowing that your filters are now backed up by our world class calibration lab.

Advantages at a Glance

1. FireflySci is the only company to offer a FREE performance verification service for your current calibration filters.
2. Our senior scientists have over 35 years of experience in metrology and quality control.
3. Unsurpassed calibration quality.
4. Unique products and functionality that no other company offers:
5. Combined wavelength/photometric accuracy reference standard (WAV-7 UV/VIS)
6. Combined photometric/stray light reference standards (FUV Dual Series)
7. Solid-state NIR wavelength reference standard (WAV-8 NIR)
8. Continuous photometric accuracy verification in the range of 200-3000nm (SPB Series)
9. Metal-on-quartz equivalents work on ANY machine regardless of optics (FUV Series, FUV Dual Series, FNIR-Series, SPB-Series)
10. Universal test plate for microplate readers that will work on any company's machines.
11. Can use solid state filters for years without having to recalibrate. In over 8 years of active duty, our filters have been proved to never go out of spec.
12. Flawless production record: not one return in over 8 years of operation as a result of a manufacturing defect.

info@fireflysci.com 1-347-441-4277

Save thousands of dollars a year by using our solid-state photometric accuracy verification calibration standards. Several of our solid state filters are NIST traceable reference standards that never need recalibration due to material aging.

HF Series: VIS Photometric Accuracy
Calibration Standards
(400-700nm)
(Optical Densities: 0.04 - 4.0au)

HF SERIES STANDARDS

Firefly's HF neutral density solid-state filter series tests photometric accuracy in the VIS range (400-700nm).

PRODUCT SPECS:

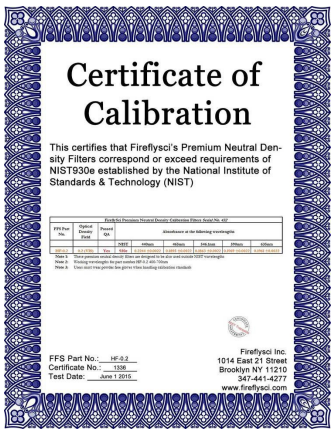
- Optical densities available: 0.04au, 0.2au, 0.3au, 0.5au, 0.7au, 1.0au, 1.5au, 2.0au, 2.5au, 3.0au, 4.0au
- Expanded uncertainties of each filter: HF-0.04 (+/- 0.0019au), HF-0.2 (+/- 0.0022au), HF-0.3 (+/- 0.0020au), HF-0.5 (+/- 0.0022au), HF-0.7 (+/- 0.0023au), HF-1.0 (+/- 0.0023au), HF-1.5 (+/- 0.0054au), HF-2.0 (+/- 0.0055au), HF-2.5 (+/- 0.0090au), HF-3.0 (+/- 0.0181au), HF-4.0 (+/- 0.0110au)
- Wavelength range: 400-700nm. Standard validation points included on the certificate of calibration are 440, 465, 546.1, 590, 635nm.
- External dimensions: 12.5x12.5x45mm

BENEFITS OF USING THE HF SERIES PHOTOMETRIC ACCURACY FILTERS:

- Firefly Unique Lifetime Warranty
- Highly accurate and consistent spectrophotometer calibration every time.
- Never has to be replaced.
- Never has to be recalibrated if used properly
- Scratch-resistant coating protects optical surfaces
- Can be used in any spectrophotometer (with standard 12.5x12.5x45mm holder)
- Surpasses NIST-930e requirements and tolerances.
- Full NIST traceability and compatibility.

INCLUDED WITH HF SERIES FILTERS:

- Instructional manual
- Certificate of calibration with NIST traceability
- Photometric data tables are available for qualified customers. Please contact us for more information.



Certificate of Calibration

This certifies that Fireflysci's Premium Neutral Density Filters correspond or exceed requirements of NIST930e established by the National Institute of Standards & Technology (NIST)

FFS Part No.: HF-0.2
Certificate No.: 1108
Test Date: June 1 2015

Fireflysci Inc
1014 East 21 Street
Brooklyn NY 11210

Sample certificate of calibration

PRODUCT SPECS:

- Optical densities: 0.04au, 0.2au, 0.3au, 0.5au, 0.7au, 1.0au, 1.5au, 2.0au, 2.5au, 3.0au, 4.0au
- Expanded uncertainties: FUV-0.04 (+/- 0.0019au), FUV-0.2 (+/- 0.0022au), FUV-0.3 (+/- 0.0020au), FUV-0.5 (+/- 0.0022au), FUV-0.7 (+/- 0.0023au), FUV-1.0 (+/- 0.0042au), FUV-1.5 (+/- 0.0054au), FUV-2.0 (+/- 0.0055au), FUV-2.5 (+/- 0.0090au), FUV-3.0 (+/- 0.0181au), FUV -4.0 (+/- 0.0110au).
- Wavelength range: 200-700nm. Standard peaks included on certificate of calibration are 250, 280, 340, 360, 400, 465, 500, 546.1, 590 and 635nm. FireflySci can provide alternate wavelengths in the 200-700nm range upon request.
- External Dimensions: 12.5x12.5x45mm

BENEFITS:

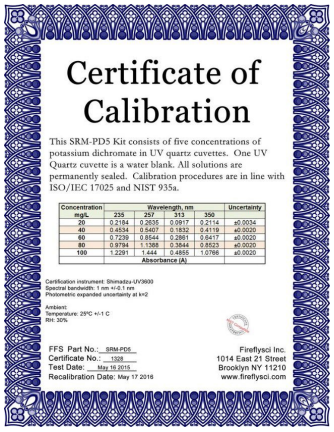
- Save thousands of dollars on recalibration fees and replacement filters.
- Save time by having standards in your lab where they are needed.
- Save on having to handle fragile and toxic liquid calibration standards.
- Give yourself peace-of-mind knowing that all our standards are 100% NIST Traceable.
- High durability with scratch-resistant coating that protects optical surfaces.
- Can be used in any spectrophotometer in your lab (with standard 12.5 x 12.5 x 45mm holder).

Potassium Dichromate UV/VIS Photometric Accuracy Liquid Standard- NIST 935 (235-430nm)

POTASSIUM DICHROMATE

Potassium Dichromate liquid photometric standards for validating UV/ VIS spectrophotometers.

Potassium Dichromate dissolved in Perchloric Acid (0.001N) is a tried and true method of verifying for absorbance accuracy (photometric) as well as linearity in the UV range. Producing several characteristic peaks throughout the UV range, Potassium Dichromate enables checking at 235nm, 257nm, 313nm, 350nm and 430nm. FireflySci produces its own blend in house, derived from the NIST SRM 935a guidelines and permanently seals the contents in a fire-fused quartz cuvette.



Certificate of Calibration

This SRM-PD5 Kit consists of five concentrations of potassium dichromate in UV quartz cuvettes. One UV Quartz cuvette is a water blank. All solutions are permanently sealed. Calibration procedures are in line with ISO/IEC 17025 and NIST 935a.

Concentration	Wavelength, nm				Uncertainty
mg/L	235	257	313	350	
20	0.2184	0.2635	0.0917	0.2114	±0.0034
40	0.4534	0.5407	0.1832	0.4119	±0.0020
60	0.7239	0.8544	0.2851	0.6417	±0.0020
80	0.9794	1.1388	0.3844	0.8523	±0.0020
100	1.2291	1.444	0.4855	1.0798	±0.0020
Absorbance (A)					

Certification instrument: Shimadzu-UV3600
Spectral bandwidth: 1 nm +/-0.1 nm
Photometric expanded uncertainty at k=2
Ambient:
Temperature: 25ºC +/-1 C
RH: 32%

FFS Part No.: SRM-PD5
Certificate No.: 1538
Test Date: May 16 2015
Recalibration Date: May 17 2016

Fireflysci Inc.

www.fireflysci.com

Sample certificate of calibration

CAPABILITIES:

- Verify for photometric accuracy and linearity in the UV range at the following wavelengths

235nm 350nm
257nm 313nm
430nm (only available with the 600mg/L concentration)

INCLUDED WITH POTASSIUM DICHROMATE LIQUID CALIBRATION STANDARD:

- Instructions are included with every Potassium Dichromate liquid filter
- Certificate of calibration with NIST traceability
- MSDS data for Potassium Dichromate

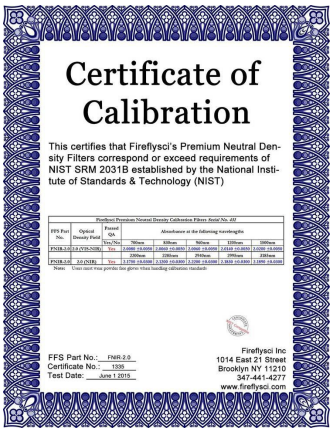
FNIR Series: NIR Photometric Accuracy Calibration Standards (700-3000nm) (Optical Densities: 0.04 - 4.0au)

FNIR-SERIES

NIST-traceable FNIR series standards for verifying photometric accuracy in the wavelength range of 700-3000nm.

PRODUCT SPECS:

- Optical densities: 0.04au, 0.2au, 0.3au, 0.5au, 0.7au, 1.0au, 1.5au, 2.0au, 2.5au, 3.0au, 4.0au.
- Expanded uncertainties: FNIR-0.04 (+/- 0.0019au), FNIR-0.2 (+/- 0.0022au), FNIR-0.3 (+/- 0.0020au), FNIR-0.5 (+/- 0.0022au), FNIR-0.7 (+/- 0.0023au), FNIR-1.0 (+/- 0.0042au), FNIR-1.5 (+/- 0.0054au), FNIR-2.0 (+/- 0.0055au), FNIR-2.5 (+/- 0.0090au), FNIR-3.0 (+/- 0.0181au), FNIR-4.0 (+/- 0.0110au).
- Wavelength range: 700-3000nm. Certified wavelength points include 700, 1100, 1700, 2700 and 3000nm. Firefly can provide alternative points in the 200-700nm range upon request or full scan data for informational purposes.
- External Dimensions: 12.5x12.5x45mm
- Fully NIST-traceable



Certificate of Calibration

Sample certificate of calibration

Superband Series: Full UV/VIS/NIR Photometric Accuracy Calibration Standards (200-3000nm) (Optical Densities: 0.04 - 4.0au)

SUPERBAND SERIES

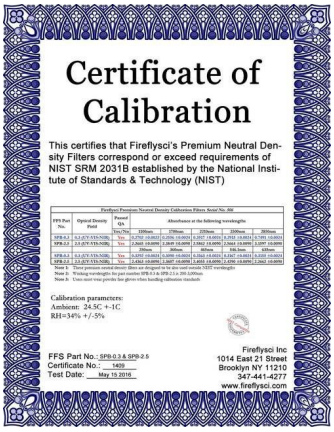
FireflySci is proud to announce the only calibration standard in existence that can verify photometric accuracy over a wavelength range of 200-3000nm.

CAPABILITIES:

- Photometric accuracy in the UV, VIS and NIR range (200-3000nm) at 10 certified wavelengths including: 250, 360, 465, 546.1, 635, 1100, 1700, 2210, 2500, 2850nm.

PRODUCT SPECS:

- Optical densities: 0.04au, 0.2au, 0.3au, 0.5au, 0.7au, 1.0au, 1.5au, 2.0au, 2.5au, 3.0au, 4.0au
- Uncertainties: SPB-0.04 (+/- 0.0019au), SPB-0.2 (+/- 0.0022au), SPB-0.3 (+/- 0.0020au), SPB-0.5 (+/- 0.0022au), SPB-0.7 (+/- 0.0023au), SPB-1.0 (+/- 0.0042au), SPB-1.5 (+/- 0.0054au), SPB-2.0 (+/- 0.0055au), SPB-2.5 (+/- 0.0090au), SPB-3.0 (+/- 0.0181au), SPB-4.0 (+/- 0.0234au).
- Wavelength range: 200-3000nm. FireflySci can provide certified calibration points anywhere in this range. Customers are able to choose points.
- External Dimensions: 12.5x12.5x45mm
- Fully NIST-traceable



Certificate of Calibration

Sample certificate of calibration

info@fireflysci.com 1-347-441-4277

NIST Traceable reference standards for verifying the wavelength accuracy of a UV/VIS spectrophotometer. All standards are stringently prepared according to NIST guidelines.

LIQUID HOLMIUM STANDARD

Liquid Holmium Perchlorate Wavelength Standard- NIST 2034 (240-640nm)

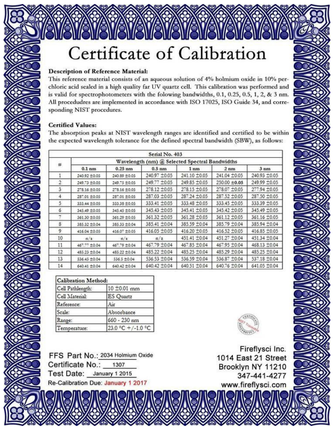
The Firefly Holmium filter is used to calibrate wavelength accuracy in the 240-650 nm range.

CAPABILITIES:

The Firefly Holmium wavelength filter has the following peaks:

- 240.8
- 277.8
- 287.1
- 361.1
- 416.4
- 451.2
- 485.2
- 536.5
- 640.5

Please note that this is a liquid calibration filter and does not come with the same Lifetime Warranty as Firefly's Solid State Standards. The Firefly liquid holmium filter must be recalibrated every year according to NIST guidelines.



Certificate of Calibration

Description of Reference Material:
This reference material consists of an aqueous solution of 4% holmium oxide in 10% perchloric acid sealed in a high quality far UV quartz cell. This calibration was performed and is valid for spectrophotometers with the folowing bandwidths, 0.1, 0.25, 0.5, 1, 2, & 3 nm. All procedudres are implemented in accordance with ISO 17025, ISO Guide 34, and corresponding NIST procedures.

Certified Values:
The absorption peaks at NIST wavelength ranges are identified and certified to be within the expected wavelength tolerance for the defined spectral bandwidth (SBW), as follows:

Serial No. 403						
#	Wavelength (nm) @ Selected Spectral Bandwidths					
	0.1 nm	0.25 nm	0.5 nm	1 nm	2 nm	3 nm

WAV-1 UV/VIS

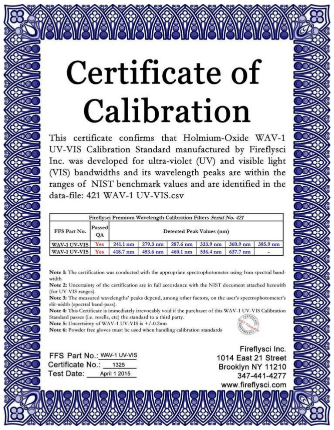
WAV-1 UV/VIS Advanced Holmium Oxide Wavelength Accuracy Standard (240-640nm)

The WAV-1 UV-VIS allows calibration of wavelength accuracy in the ultra-violet (UV) and visible (VIS) range. FireflySci offers the only holmium glass reference standard in the world that has the highly demanded wavelength peak of 241.5nm for verifications relating to DNA measurements and other applications.

CAPABILITIES OF WAV-1 UV/VIS:

We provide the following NIST-traceable peak values for the wavelength accuracy calibration of spectrophotometers:

- 241.5 nm
- 279.3 nm
- 287.6 nm
- 333.8 nm
- 360.8 nm
- 385.8 nm
- 418.5 nm
- 453.4 nm
- 459.9 nm
- 536.4 nm
- 637.5 nm



Certificate of Calibration

This certificate confirms that Holmium-Oxide WAV-1 UV-VIS Calibration Standard manufactured by Fireflysci Inc. was developed for ultra-violet (UV) and visible light (VIS) bandwidths and its wavelength peaks are within the ranges of NIST benchmark values and are identified in the data-file: 421 WAV-1 UV-VIS.csv

Fireflysci Premium Wavelength Calibration Filters *Serial No. 421*							
FFS Part No.	Passed QA	Detected Peak Values (nm)					
WAV-1 UV-VIS	Yes	241.1 nm	279.3 nm	287.6 nm	333.9 nm	360.9 nm	385.9 nm
WAV-1 UV-VIS	Yes	418.7 nm	453.6 nm	460.1 nm	536.4 nm	637.7 nm	-

Note 1: The certification was conducted with the appropriate spectrophotometer using 1nm spectral bandwidth
Note 2: Uncertainty of the certification are in full accordance with the NIST document attached herewith (for UV-VIS ranges).
Note 3: The measured wavelengths' peaks depend, among other factors, on the user's spectrophotometer's slit-width (spectral band-pass).
Note 4: This Certificate is immediately irrevocably void if the purchaser of this WAV-1 UV-VIS Calibration Standard passes (i.e. resells, etc) the standard to a third party.
Note 5: Uncertainty of WAV-1 UV-VIS is +/-0.2nm
Note 6: Powder free gloves must be used when handling calibration standards

Sample certificate of calibration

info@fireflysci.com 1-347-441-4277

Stray light is defined as light that is detected by the spectrophotometer but does not belong to the given bandwidth of the sample being measured. Often the result of light scattering, diffraction or errors with the instrument, stray light can cause a variety of distortions and errors in analysis.

In order to measure stray light, standards are needed that absorb all light of the wavelength at which the measurement is to be performed and then cut off at a specified wavelength."

UV Stray Light Liquid Calibration Standards (200-390nm)

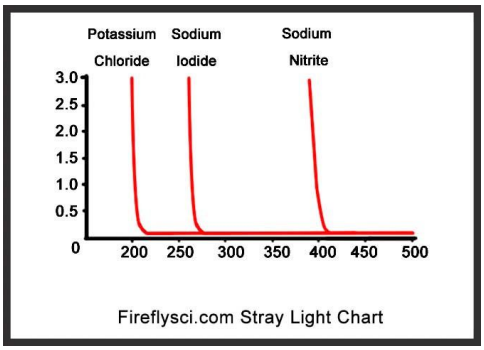
UV STRAY LIGHT LIQUID CALIBRATION STANDARDS

UV Stray Light Cut-off Filters ranging from 200-390nm.

CAPABILITIES:

The Firefly Stray Light cut off filters can check for stray light at various wavelength cut-offs in the UV range:

- Potassium Chloride: 200nm
- Sodium Iodide: 220nm
- Potassium Iodide: 260nm
- Sodium Nitrite: 390nm



Fireflysci.com Stray Light Chart

Sample certificate of calibration

FUV Dual Series: UV/VIS Photometric Accuracy & Stray Light Calibration Standards (200-700nm) (Optical Densities 0.04-4.0au)

FUV DUAL SERIES

Firefly's FUV Dual Series filters allow you to verify photometric accuracy and stray light in the range of 200-700nm. Includes certified values for both the front and back of the filter for determining stray light.

PRODUCT SPECS:

- Optical densities: 0.04au, 0.2au, 0.3au, 0.5au, 0.7au, 1.0au, 1.5au, 2.0au, 2.5au, 3.0au, 4.0au
- Expanded uncertainties: FUV-0.04D (+/- 0.0019au), FUV-0.2D (+/- 0.0022au), FUV-0.3D (+/- 0.0020au), FUV-0.5D (+/- 0.0022au), FUV-0.7D (+/- 0.0023au), FUV-1.0D (+/- 0.0042au), FUV-1.5D (+/- 0.0054au), FUV-2.0D (+/- 0.0055au), FUV-2.5D (+/- 0.0090au), FUV-3.0D (+/- 0.0181au), FUV-4.0D (+/- 0.0110au).
- Wavelength range: 200-700nm. Standard wavelengths included on certificate of calibration are 250, 280, 340, 360, 400, 465, 500, 546.1, 590 and 635nm. FireflySci can provide alternate peaks in the 200-700nm range upon request.
- Includes photometric data for both the front and back side of the filter.
- External Dimensions: 12.5x12.5x45mm
- Fully NIST-traceable

NIR Liquid Stray Light Liquid Calibration Standards (800-2000nm)

NIR STRAY LIGHT

A variety of NIST-traceable proprietary blends for checking the stray light of a spectrophotometer in the NIR range from 800-2000nm.

CAPABILITIES:

The Firefly Stray Light cut off filters can check for stray light at various wavelength cut-offs in the NIR range:

- 800nm
- 1000nm
- 1250nm
- 1370nm
- 1550nm
- 1950nm

Spectral Bandwidth Calibration

Spectral Bandwidth (SBW) refers to the physical slit-width of the spectrophotometer's monochromator, which has a direct impact on the resolution of the instruments. Spectral resolution is the ability to resolve two neighboring peaks. Reconciling the resolution is an integral component in getting accurate wavelength and photometric readings on your spectrophotometer. This is a requirement for several pharmacopoeias include European Pharmacopoeia (EP) and United States Pharmacopoeia (USP).

Toluene in Hexane Spectral Bandwidth Reference Standard

TOLUENE IN HEXANE

Toluene in Hexane standard for resolving the spectral bandwidth of a UV/VIS spectrophotometer.

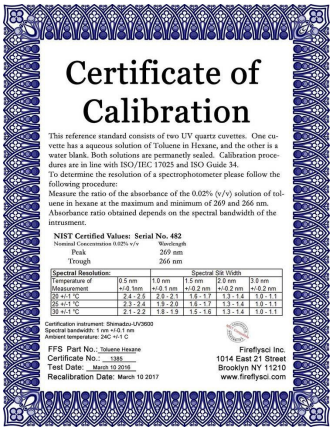
PRODUCT SPECS:

Firefly's Toluene in Hexane Spectral Bandwidth Reference Standard is a set containing:

- High-purity solution of 0.02% Toluene in Hexane
- High-purity Hexane blank

SUGGESTED USE:

- The EP recommends comparing the ratio of the peak maxima at 269nm and the minimum at 266nm to determine the spectral resolution of your spectrophotometer.
- Determine the resolution by running the toluene in hexane against the hexane blank between 265-270nm and calculate the peak minima and maxima.
- Calculate the ratios of the peak to the trough and compare these results with the reference values.
- Please note that this is a liquid calibration filter and does not come with the same Lifetime Warranty as Firefly's Solid State Standards. The Firefly Toluene in Hexane filter must be recalibrated every year according to NIST guidelines.



Certificate of Calibration

This reference standard consists of two UV quartz cuvettes. One cuvette has a aqueous solution of Toluene in Hexane, and the other is a water blank. Both solutions are permanently sealed. Calibration procedures are in line with ISO/IEC 17025 and ISO Guide 34.
To determine the resolution of a spectrophotometer please follow the following procedure:
Measure the ratio of the absorbance of the 0.02% (v/v) solution of toluene in hexane at the maximum and minimum of 269 and 266 nm.
Absorbance ratio obtained depends on the spectral bandwidth of the instrument.

NIST Certified Values: Serial No. 482

Nominal Concentration 0.02% v/v	Wavelength
Peak	269 nm
Trough	266 nm

Spectral Resolution:	Spectral Slit Width				
Temperature of Measurement	0.5 nm +/-0.1nm	1.0 nm +/-0.1 nm	1.5 nm +/-0.2 nm	2.0 nm +/-0.2 nm	3.0 nm +/-0.2 nm
22 +/-1 °C	2.4 - 2.5	2.0 - 2.1	1.6 - 1.7	1.3 - 1.4	1.0 - 1.1
25 +/-1 °C	2.3 - 2.4	1.9 - 2.0	1.6 - 1.7	1.3 - 1.4	1.0 - 1.1

Reference kits for NIST, NRC, US Pharmacopoeia and European Pharmacopoeia spectrophotometer validation. All standards are NIST traceable and prepared using NIST guidelines. Custom kits are available upon request.

NIST 930e VIS Photometric Accuracy Neutral Density Kit (10%T, 20%T, 30%T) (400-700nm)

NIST 930E EQUIVALENT KIT

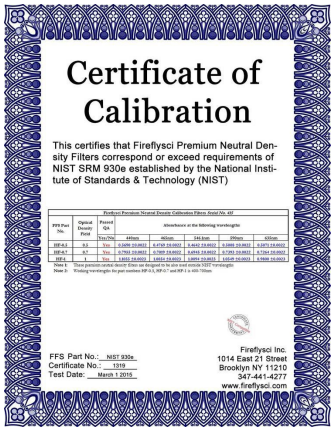
FireflySci's equivalent of the NIST SRM 930e calibration reference kit for testing photometric accuracy in the VIS range (400-700nm).

THIS KIT INCLUDES THE FOLLOWING FILTERS:

- HF-1 (10%T)
- HF-0.7 (20%T)
- HF-0.5 (30%T)
- A30 Blank holder
- Case P4

PRODUCT SPECS:

- Optical densities of the filters: HF-1 (10%T); HF-0.7 (20%T); HF-0.5 (30%T)
- Wavelength range: 400-700nm (this kit can be used for any wavelength within this range)
- Tolerances: HF-0.5 (+/-0.0022au); HF-0.7 (+/- 0.0023au); HF-1.0 (+/- 0.0023au)
- External dimensions of individual filters: 12.5x12.5x45.0mm
- Fully NIST-traceable.



Certificate of Calibration

This certifies that Fireflysci Premium Neutral Density Filters correspond or exceed requirements of NIST SRM 930e established by the National Institute of Standards & Technology (NIST)

FFS Part No.: NIST 930e
Certificate No.: 1319
Test Date: March 1 2015

Sample certificate of calibration

NIST 1930 VIS Photometric Accuracy Neutral Density Kit (1%T, 3%T, 50%T) (400-700nm)

NIST 1930 EQUIVALENT KIT

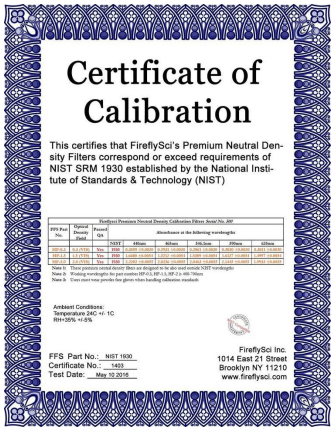
Firefly's equivalent of the NIST SRM 1930 calibration reference kit for testing photometric accuracy in the VIS range (400-700nm).

THIS KIT INCLUDES THE FOLLOWING FILTERS:

- HF-2.0 (1%T)
- HF-1.5 (3%T)
- HF-0.3 (50%T)
- A30 Blank holder
- Case P4

PRODUCT SPECS:

- Wavelength range: 400-700nm (this kit can be used for any wavelength within this range).
- Tolerances: HF-0.3 (+/- 0.0020 au); HF-1.5 (+/-0.0054au); HF-2 (+/-0.0055au)
- External dimensions of individual filters: 12.5x12.5x45.0mm



Certificate of Calibration

NIST 2930 VIS Photometric
Neutral Density Kit
(0.1%T, 0.3%T, 90%T)
(400-700nm)

NIST 2930 EQUIVALENT KIT

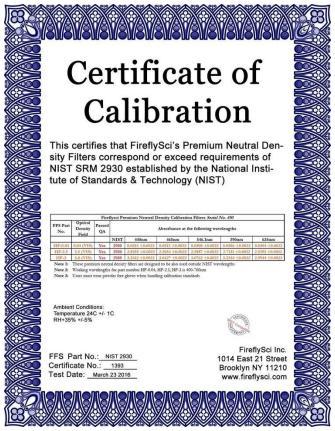
Firefly's equivalent of the NIST SRM 2930 calibration reference kit for testing photometric accuracy in the VIS range (400-700nm).

THIS KIT INCLUDES THE FOLLOWING FILTERS:

- HF-3.0 (0.1%T)
- HF-2.5 (0.3%T)
- HF-0.04 (90%T)
- A30 Blank holder
- Case P4

PRODUCT SPECS:

- Wavelength range: 400-700nm (this kit can be used for any wavelength within this range)
- Tolerances: HF-0.04 (+/- 0.0020 au); HF-2.5 (+/- 0.0090au); HF-3 (+/- 0.0181au)
- External dimensions of individual filters: 12.5 x 12.5 x 45.0 mm



Certificate of Calibration

This certifies that FireflySci's Premium Neutral Density Filters correspond or exceed requirements of NIST SRM 2930 established by the National Institute of Standards & Technology (NIST)

Ambient Conditions:
Temperature 24C +/- 1C
RH<30% +/-5%

Photometric Linearity
Potassium Dichromate Kit
(235-430nm)

PHOTOMETRIC LINEARITY (POTASSIUM DICHROMATE)

Potassium dichromate linearity and photometric accuracy kit for use with many global pharmacopoeia requirements.

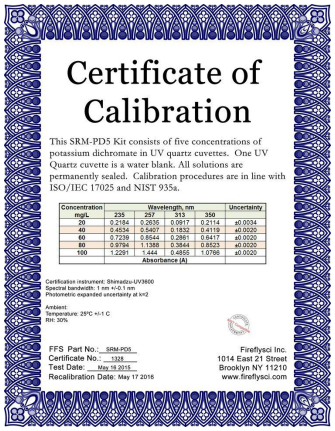
PRODUCT SPECS:

- SRM-PD5 Potassium Dichromate Reference Kit contains 5 Concentrations (20mg/L, 40mg/L, 60mg/L, 80mg/L, 100mg/L) and one Perchloric Acid blank.
- SRM-PD6 Kit contains 6 concentrations (20mg/L, 40mg/L, 60mg/L, 80mg/L, 100mg/L, 600mg/L) and one Perchloric Acid Blank. This kit is for use in European Pharmacoepia validations.
- Custom concentrations available on request.

CAPABILITIES:

Verify for photometric accuracy and linearity in the UV range at the following wavelengths

- 235nm
- 257nm
- 313nm
- 350nm
- 430nm (only with the 600mg/L concentration)



Certificate of Calibration

This SRM-PD5 Kit consists of five concentrations of potassium dichromate in UV quartz cuvettes. One UV Quartz cuvette is a water blank. All solutions are permanently sealed. Calibration procedures are in line with ISO/IEC 17025 and NIST 935a.

Concentration	Wavelength, nm				Uncertainty
mg/L	235	257	313	350	
20	0.2184	0.2635	0.0917	0.2114	±0.0034

NIST 2031 UV/VIS
Photometric Accuracy Kit
(10%T, 30%T, 90%T)
(200-700nm)

NIST 2031 EQUIVALENT KIT

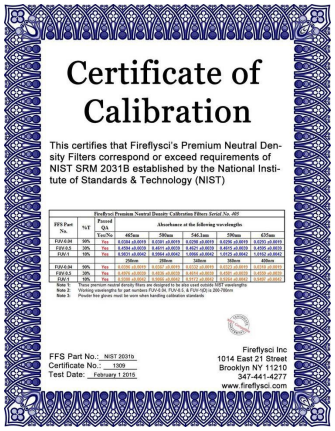
Firefly's upgraded and improved version of the NIST-2031 UV/VIS photometric accuracy kit.

THIS KIT INCLUDES THE FOLLOWING FILTERS:

- FUV-0.04 (90%T)
- FUV-0.5 (30%T)
- FUV-1.0 (10%T)
- A30 Blank Holder
- Case P4

PRODUCT SPECS:

- Optical densities: 0.04au (90%), 0.5au (30%), 1.0au (10%)
- Wavelength Range: 200-700 nm (this kit can be used for any wavelength within this range)
- Tolerances: FUV-0.04 (+/-0.0019 au); FUV-0.5 (+/- 0.0039au); FUV-1 (+/- 0.0042au)
- Wavelength range: 200-700nm. Standard certified calibration points included on the certificate of calibration are 250, 280, 340, 360, 400, 465, 500, 546.1, 590, 635nm. Firefly can provide alternative points in the 200-700nm range upon request or full scan data for informational purposes.
- External Dimensions: 12.5x12.5x45mm



Certificate of Calibration

This certifies that Fireflysci's Premium Neutral Density Filters correspond or exceed requirements of NIST SRM 2031B established by the National Institute of Standards & Technology (NIST)

FFS Part No.: NIST 2031b

FNIR Photometric
Accuracy & Linearity Kit
(10%T, 20%T, 30%T)
(700-3000nm)

FNIR KIT

Kit of three filters for validating photometric accuracy and linearity in the range of 700-3000nm

THIS KIT INCLUDES THE FOLLOWING FILTERS:

- FNIR-1.0 (10%T)
- FNIR-0.7 (20%T)
- FNIR-0.5 (30%T)
- A30 Blank Holder
- Case P4

PRODUCT SPECS:

- Optical densities: 1.0au (10%T), 0.7au (20%T), 0.5au (30%T)
- Wavelength Range: 700-3000nm. Certified wavelength points include 700, 1100, 1700, 2700 and 3000nm. Firefly can provide alternative points in the 700-300nm range upon request or full scan data for informational purposes.
- Tolerances: +/-0.0022 au
- External Dimensions: 12.5x12.5x45mm
- Fully NIST-traceable

Superband UV/VIS/NIR Photometric
Accuracy & Linearity Kit
(10%T, 30%T, 90%T)
(200-3000nm)

SUPERBAND KIT

Kit of three filters and a blank for validating photometric accuracy and linearity in the range of 200-3000nm

THIS KIT INCLUDES THE FOLLOWING FILTERS:

- SPB-0.04 (90%T)
- SPB-0.5 (30%T)
- SPB-1.0 (10%T)
- A30 Blank Holder
- Case P4

PRODUCT SPECS:

- Optical densities: 0.04au (90%T), 0.5au (30%T), 1.0au (10%T)
- Wavelength Range: 200-3000nm. Certified wavelength points include 250, 280, 340, 546.1, 590, 635, 1100, 1700, 2700 and 3000nm. Firefly can provide alternative points in the 200-3000nm range upon request or full scan data for informational purposes.
- Tolerances: +/-0.0022 au
- External Dimensions: 12.5x12.5x45mm

Sample certificate of calibration

VIS Photometric & UV/VIS
Wavelength Accuracy Kit

VIS PHOTOMETRIC & UV/VIS WAVELENGTH KIT

Standard calibration kit for checking photometric accuracy in the range of 400-700nm and wavelength accuracy in the range of 241-637nm.

THIS KIT INCLUDES THE FOLLOWING FILTERS:

- HF-0.2 (60%T)
- HF-0.5 (30%T)
- HF-1.0 (10%T)
- WAV-1 UV/VIS Solid State Holmium Oxide Filter
- A30 Blank holder
- Case G6

PRODUCT SPECS:

- Tolerance for photometric accuracy filters: +/- 0.0022 au
- Tolerance for wavelength accuracy filters: +/- 0.2nm
- External dimensions of individual filters: 12.5 x 12.5 x 45.0 mm

European Pharmacopeia
Full Compliance Kit

EP KIT

Liquid kit for ensuring that your spectrophotometer is in line with European Pharmacopoeia requirements.

INCLUDED:

- Potassium Dichromate (60mg/L, 600mg/L) with Blank
- Holmium Oxide in Perchloric Acid with Blank
- Potassium Chloride with Pure Water Blank
- Toluene in Hexane with Hexane Blank

PRODUCT SPECS:

- Check for stray light at wavelength cut-off of 200nm
- Check for spectral bandwidth resolution at 266nm and 269nm
- Check for photometric accuracy at 235nm, 257nm, 313nm, 350nm and 430nm
- Check for wavelength Accuracy at 241.15nm, 287.15nm, 361.5nm and 536.3nm

info@fireflysci.com 1-347-441-4277

US Pharmacopoeia Photometric Linearity, Wavelength Accuracy & Stray Light Kit

USP KIT

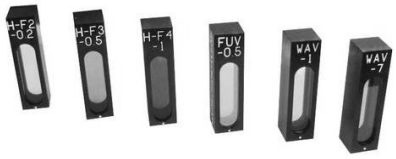
Liquid kit for ensuring that your UV/VIS spectrophotometer is in full compliance with US Pharmacopeoia standards.

INCLUDED:

- Potassium Dichromate (20mg/L)
- Potassium Dichromate (60mg/L)
- Potassium Dichromate (100mg/L)
- Potassium Dichromate Blank
- Holmium Oxide in Perchloric Acid
- Potassium Iodide with Pure Water Blank

CAPABILITIES:

- Check for stray light at wavelength cut-off of 260nm
- Check for photometric accuracy at 235nm, 257nm, 313nm and 350nm
- Check for wavelength accuracy at 241.15nm, 287.15nm, 361.5nm and 536.3nm



Full UV/VIS Photometric Accuracy, Wavelength & Stray Light Calibration Kit

FULL UV/VIS KIT 4

Broad range solid-state standard kit for checking photometric accuracy, wavelength accuracy and stray light in the UV and VIS range.

THIS CALIBRATION KIT CAN TEST THE FOLLOWING:

- Photometric Accuracy in the UV and VIS range (HF-0.2, HF-0.5, HF-1.0, FUV-0.5)
- Wavelength Accuracy in the UV and VIS range (WAV-1 UV/VIS, WAV-7 UV/VIS)
- Stray Light Performance in the UV and VIS range (FUV-0.5)

Ultimate UV/VIS/NIR Photometric, Wavelength & Stray Light Calibration Kit

ULTIMATE UV/VIS/NIR KIT

Broad range solid-state standard kit for checking photometric accuracy, wavelength accuracy and stray light in the UV, VIS AND NIR range.

For use with research-grade UV/VIS/NIR spectrophotometers.

THIS CALIBRATION KIT CAN TEST THE FOLLOWING:

- Photometric Accuracy in the UV, VIS and NIR range (SPB-0.2, SPB-0.5, SPB-1.0)
- Wavelength Accuracy in the UV, VIS an NIR (WAV-1 UV/VIS, WAV-7 UV/VIS, WAV-8 NIR)
- Stray Light Performance in the UV, VIS and NIR range (SPB-1.0D)

info@fireflysci.com 1-347-441-4277

NIST-traceable reference standards for validating fluorescence spectrophotometers

PURE WATER FLUORESCENCE STANDARD

Pure Water Fluorescence Reference Standard (250-600nm)

Firefly's ultra-pure water reference standard for validating a fluorescence spectrophotometer

CAPABILITIES:

- Validation of a fluorescence spectrophotometers in the range of 250-600nm.
- Contains two characteristic emission peaks at 397 and 600nm. These are caused by excitations of 350nm and 500nm respectively.

PRODUCT SPECS:

- Firefly Unique Lifetime Warranty
- Highly accurate and consistent calibration every time.
- Can be used in any fluorescence spectrophotometer (with standard 12.5 x 12.5 x 45 mm holder)
- Full NIST traceability and compatibility.

INCLUDED WITH SRM-H2O FLUORESCENCE STANDARD:

- Instruction manual
- Certificate of calibration with NIST traceability

QUININE SULFATE

Quinine Sulfate Fluorescence Reference Standard- NIST 936a (375-675nm)

Firefly's mixture of Quinine Sulfate in perchloric acid for validating a fluorescence spectrophotometer.

CAPABILITIES:

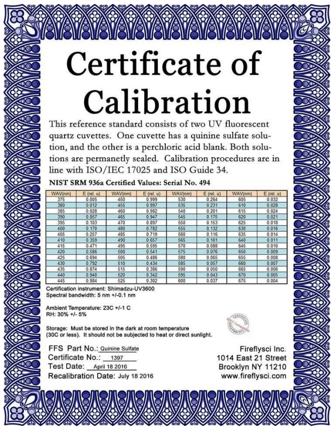
- Validation of fluorescence spectrophotometers in the range of 375-675nm
- Contains a characteristic emission peak of 450nm by which to calibrate the instrument.

PRODUCT SPECS:

- Firefly Unique Lifetime Warranty
- Comes in a solution of quinine sulfate in 0.105 mol/L of perchloric acid. Comes with an optional perchloric acid blank.
- Highly accurate and consistent calibration every time.
- Can be used in any fluorescence spectrophotometer (with standard 12.5 x 12.5 x 45 mm holder)
- Full NIST traceability and compatibility.

INCLUDED WITH SRM-QS FLUORESCENCE STANDARD:

- Instruction manual
- Certificate of calibration with NIST traceability
- MSDS data for quinine sulfate.



Certificate of Calibration

This reference standard consists of two UV fluorescent quartz cuvettes. One cuvette has a quinine sulfate solution, and the other is a perchloric acid blank. Both solutions are permanetly sealed. Calibration procedures are in line with ISO/IEC 17025 and ISO Guide 34.

NIST SRM 936a Certified Values: Serial No. 494

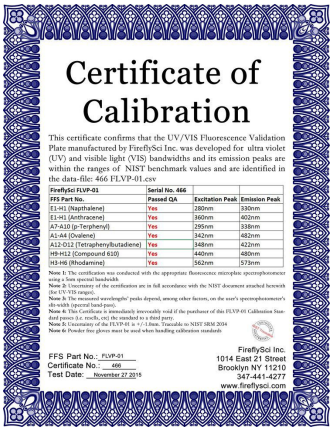
Sample certificate of calibration



Certificate of Calibration

This certificate confirms that the UV/VIS Fluorescence Validation Plate manufactured by FireflySci Inc. was developed for ultra violet (UV) and visible light (VIS) bandwidths and its emission peaks are within the ranges of NIST benchmark values and are identified in the data-file: 466 FLVP-01.csv

FireflySci FLVP-01	Serial No. 466		
FFS Part No.	Passed QA	Excitation Peak	Emission Peak
E1-H1 (Napthalene)	Yes	280nm	330nm
E1-H1 (Anthracene)	Yes	360nm	402nm
A7-A10 (p-Terphenyl)	Yes	295nm	338nm
A1-A4 (Ovalene)	Yes	342nm	482nm
A12-D12 (Tetraphenylbutadiene)	Yes	348nm	422nm
H9-H12 (Compound 610)	Yes	440nm	480nm
H3-H6 (Rhodamine)	Yes	562nm	573nm

Note 1: The certification was conducted with the appropriate fluorescence microplate spectrophotometer using a 5nm spectral bandwidth.
Note 2: Uncertainty of the certification are in full accordance with the NIST document attached herewith (for UV-VIS ranges).
Note 3: The measured wavelengths' peaks deposed, among other factors, on the user's spectrophotometer's slit-width (spectral band-pass).
Note 4: This certificate shall be immediately irrevocably void if the purchaser of this FLVP-01 Calibration Standard passes (i.e. resells, etc) the standard to a third party.
Note 5: Uncertainty of the FLVP-01 is +/-1.0nm. Traceable to NIST SRM 2034
Note 6: Powder free gloves must be used when handling calibration standards

UV/VIS FLUORESCENCE VALIDATION PLATE

UV/VIS fluorescence validation plate for microplate readers.

CAPABILITIES:

- Validation of fluorescence spectrophotometers in the UV/VIS range (290-562nm)

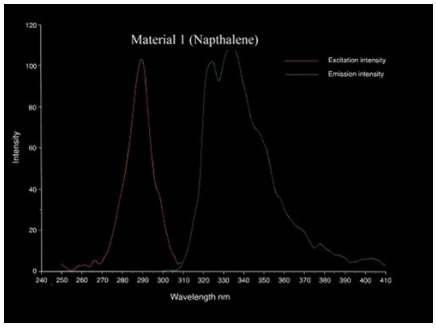
PRODUCT SPECS:

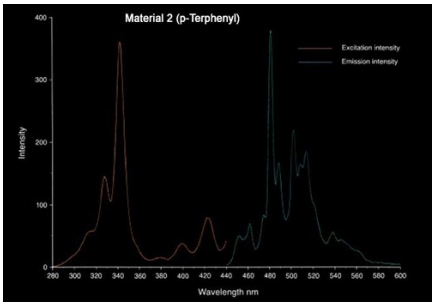
- External dimensions of individual wells: 6.6mm per well
- Total dimensions for 96 well plate: 85x125x12.5mm
- Contains a mix of Anthracene, Compound 610, Napthalene, Ovalene, Terphenyl, Tetraphenylbutadiene, and Rhodamine fluorescent material embedded in PMMA.
- NIST Traceability, ensuring the highest reliability in validation of measurements.

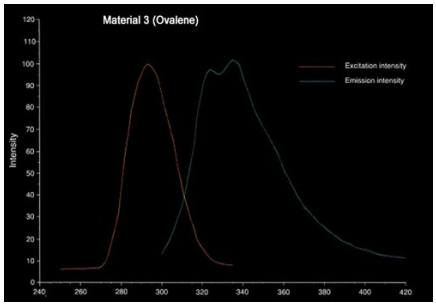
CONTENTS OF FLVP PLATE:

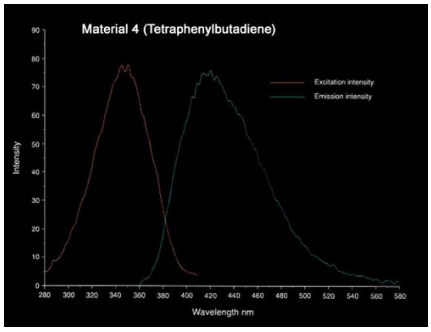
1. Wells E1-H1- Mix of **Napthalene** (approximate molar concentration 6X10-5, excitation wavelength 290 nm, emission wavelength 330 nm); corrected excitation 280 nm and emission 330 nm (SBW=5nm) and **Anthracene** (approximate molar concentration 1X10-5, excitation wavelength 360 nm, emission wavelength 402 nm); corrected excitation 360 nm and emission 402 nm (SBW=5nm)
2. Wells A7-A10- **p-Terphenyl** (approximate molar concentration 5X10-7, excitation wavelength 295 nm, emission wavelength 338 nm) ; corrected excitation 295 nm and emission 338 nm (SBW=5nm)
3. Wells A1-A4- **Ovalene** (approximate molar concentration 2X10-7, excitation wavelength 342 nm, emission wavelength 482 nm); corrected excitation 342 nm and emission 482 nm (SBW=5nm)
4. Wells A12-D12- **Tetraphenylbutadiene** (approximate molar concentration 3X10-7, excitation wavelength 348 nm, emission wavelength 422 nm); corrected excitation 348 nm and emission 422 nm(SBW=5nm)
5. Wells H9-H12- **Compound 610** (approximate molar concentration 1X10-6, excitation wavelength 440 nm, emission wavelength 475 nm); corrected excitation 440 nm and emission 480 nm (SBW=5nm)
6. Wells H3-H6- **Rhodamine** (approximate molar concentration 2X10-7, excitation wavelength 562 nm, emission wavelength 573 nm); corrected excitation 562 nm and emission 573 nm (SBW=5nm)

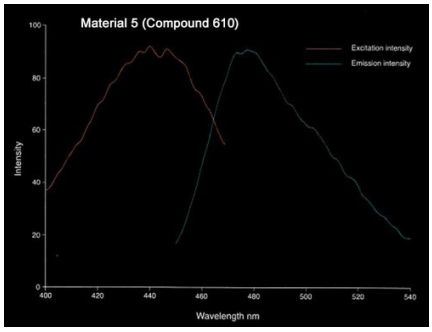
Sample scan charts:

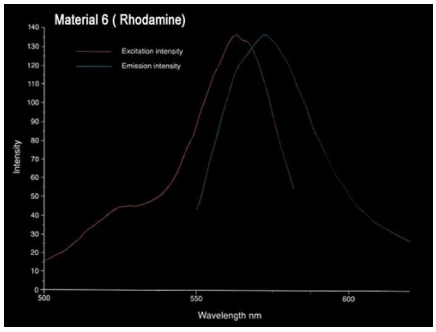


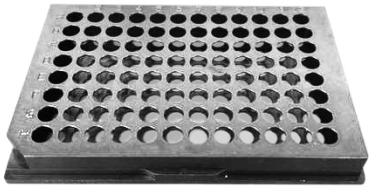












FireflySci is currently offering a full range of 96 well test plate reference standards including adapters that enable our UV/VIS calibration standards to be used. Test plates cover absorbance, fluorescence and luminescence.

96 WELL PLATE CUVETTE ADAPTER

Cuvette adapter for microplate readers.

CAPABILITIES:

- Enables the user to use any of our cuvette-shaped calibration standards in a 96 well plate form
- You can use the following standards in this adapter: photometric accuracy, wavelength accuracy, stray light, spectral resolution.

PRODUCT SPECS:

- Made with anodized aluminium for improved performance and resilience.
- Total dimensions for 96 well plate: 85x125x12.5mm
- Patent-pending design

VIS PHOTOMETRIC & UV/VIS WAVELENGTH VALIDATION PLATE

VIS photometric and wavelength validation plate for microplate readers.

THIS CALIBRATION PLATE INCLUDES THE FOLLOWING WELL STANDARDS (COVERING 16 WELLS IN TOTAL):

- HF-0.2 (60%T)
- HF-0.5 (30%T)
- HF-1.0 (10%T)
- WAV-1 UV/VIS Solid State Holmium Oxide

CAPABILITIES:

- Photometric accuracy in the VIS range (400-700nm)
- Wavelength accuracy in the UV and VIS range (241.5-637.5nm)

PRODUCT SPECS:

- Tolerance for photometric accuracy filters: +/- 0.0022 au
- Tolerance for wavelength accuracy filters: +/- 0.2nm
- External dimensions of individual wells: 6.6mm per well
- Total dimensions for 96 well plate: 85x125x12.5mm

UV/VIS PHOTOMETRIC & UV/VIS WAVELENGTH ABSORBANCE PLATE

UV/VIS photometric and wavelength validation plate for microplate readers.

THIS CALIBRATION PLATE INCLUDES THE FOLLOWING WELL STANDARDS:

- FUV-0.04 (90%T)
- FUV-0.5 (30%T)
- FUV-1.0 (10%T)
- WAV-1 UV/VIS Solid State Holmium Oxide

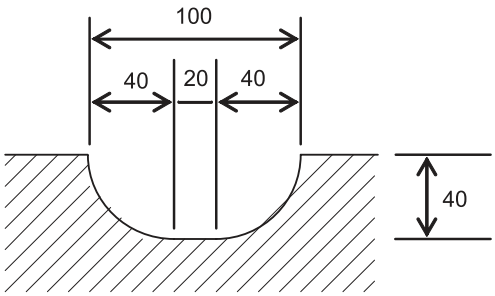
CAPABILITIES:

- Photometric accuracy in the UV/VIS range (200-700nm)
- Wavelength accuracy in the UV and VIS range (241.5-637.5nm)

PRODUCT SPECS:

- Tolerance for photometric accuracy filters: +/- 0.0022 au
- Tolerance for wavelength accuracy filters: +/- 0.2nm
- External dimensions of individual wells: 6.6mm per well
- Total dimensions for 96 well plate: 85x125x12.5mm

info@fireflysci.com 1-347-441-4277



(units in μm)

Common Specifications:

- Outer Dimensions: 32 x 65 x t3.8mm
- Material: UV Grade (Synthetic Silica Glass)
- Grooving Method: Wet Etching
- Cross section fluid path (see diagram above)

Most microfluidic chips are custom manufactured. In addition to custom manufacturing, we offer the standard chip configurations as described below. These configurations may offer a starting point upon which modifications can be made. We also offer nanoport assemblies for these chips.

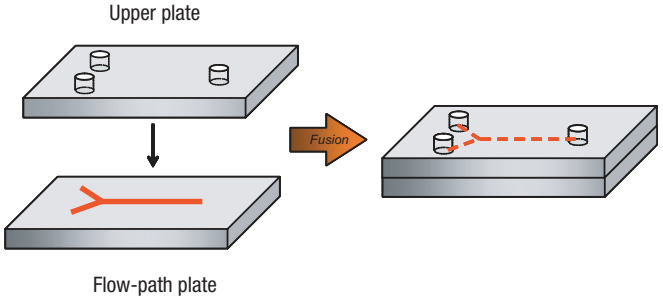
MODEL NAME	FLUID PATH LAYOUT	FLUID PATH LENGTH
YSY-01		28 mm
YLY-01		100 mm
SSS-01		55 mm
TST-101		55x20 mm

7-2 Custom Microfluidic Chips

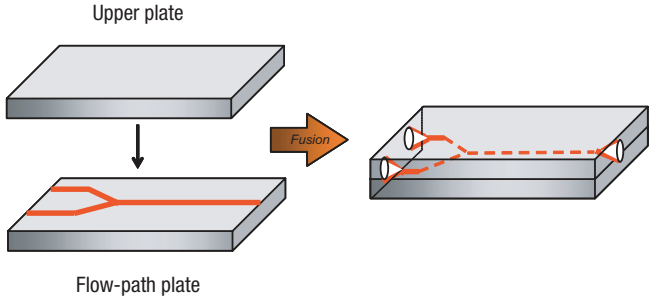
STRUCTURE AND ASSEMBLY

Thermal Fusion: Using special thermal processing, each plate is fused together to create one solid plate. No adhesives are used.

Inlet & Outlet on Top

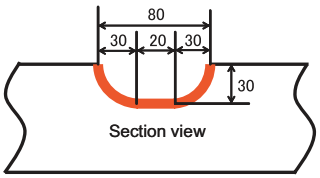


Inlet & Outlet on Sides

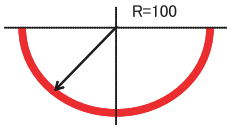


info@fireflysci.com 1-347-441-4277

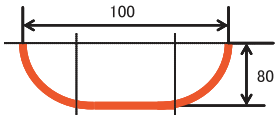
EXAMPLES:



Wet Etching



Machining



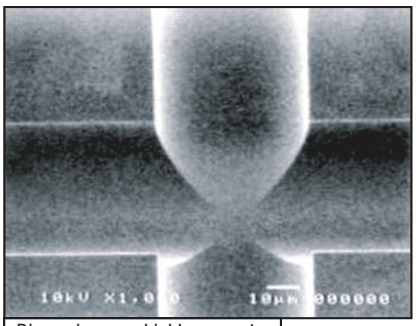
Shot Blast

GROOVING METHODS

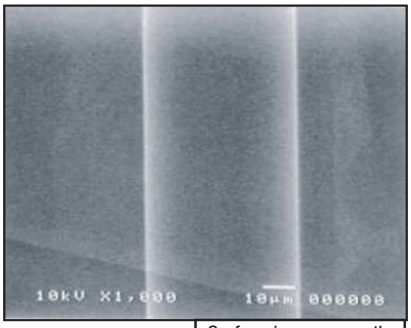
Characteristics of Groove				
Grooving Method	Width (μm)	Depth (μm)	Surface Roughness (μm)	FEATURES
Wet Etching*	50 ~ 100	5 ~	Ra @ 0.1	High transparency Excellent precision in dimensions Complicated flow-path layout available
Machining	100 ~ 300	20 ~	Ra @ 0.2	Low cost Fair transparency Excellent precision in dimensions Straight flow-path layout
Shot Blast	100 ~	50 ~	Ra @ 0.7	Low cost Complicated flow-path layout available

*WET ETCHING TECHNOLOGY

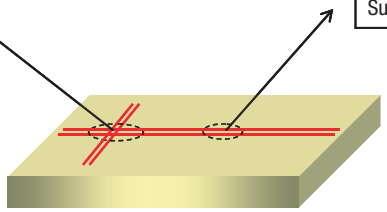
SHAPE OF ETCHED GROOVE



Dimensions are highly accurate.



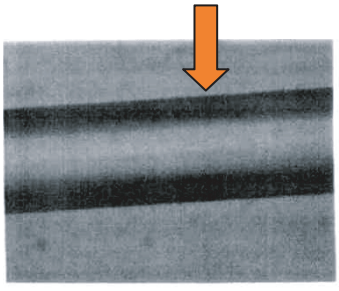
Surface is very smooth.



FLOW-PATH CHARACTERISTICS:

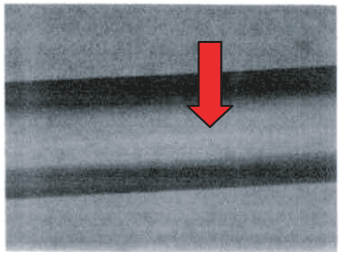
Less defects on the edge of the flow path

No waves on the flow path surface

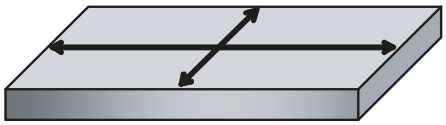


SAMPLE A
60 μm width,
20 μm depth

SAMPLE B
65 μm width,
20 μm depth



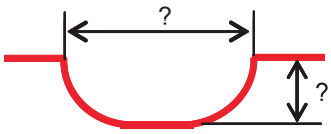
info@fireflysci.com 1-347-441-4277



SUBSTRATE SIZE AND MATERIAL

Up to 90 x 90mm is available for the substrate's size.

Our standard material is fused silica (UV Quartz). For details regarding fused silica transmission, absorption, purity, and other properties, please contact us.



Please specify groove size (depth and width).

Please specify flow-path layout (examples above).

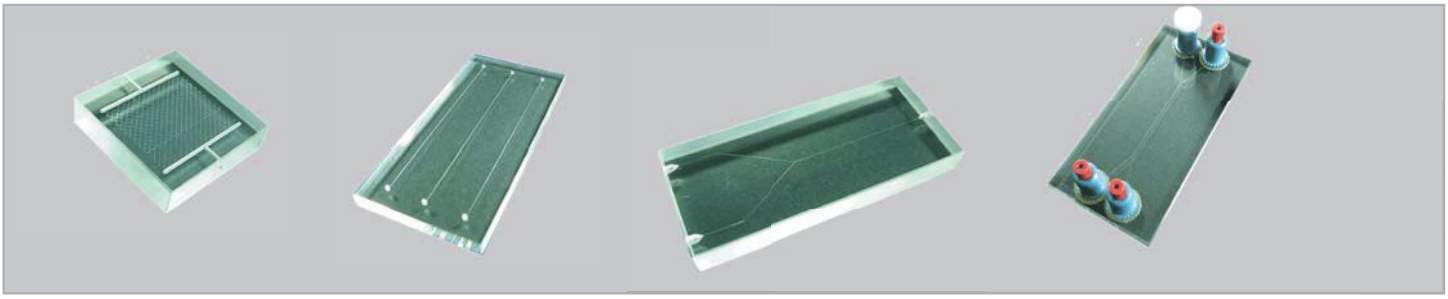
PROTOTYPE SPECIFICATIONS

In order to manufacture a protoype, please provide the following information:

1) Substrate size
2) Grooving Method: This will be chosen based on the following:
   a) Groove size (depth & width)
   b) Flow-path layout
   c) Surface roughness
   d) Specification tolerances
   e) Required quantity
   f) Application information (if available)

GENERAL INFORMATION

- FireflySci manufacturing methods guarantee precision down to the smallest micron.
- Production of raw material as well as microchip completion is done within Fireflysci.
- Technical support is available from each level of FireflySci or the life of your product.
- Quality is guaranteed based on ISO 9001 International Standards.



info@fireflysci.com 1-347-441-4277

8-1 Standard Flow Channel Cell

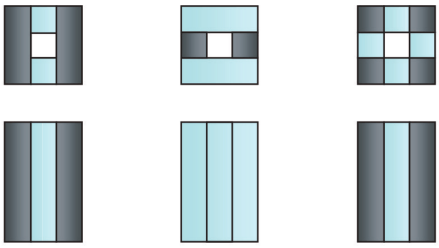
TYPE 526

Standard flow channel cell

- Four windows polished
- Both ends open

Outer Dimensions (mm)				Inside Dimensions (mm)			Material & Part Numbers
L/P (mm)	LENGTH	WIDTH	HEIGHT	LENGTH	WIDTH	CAPACITY (µl)	UV
0.25	4.25	4.25	20.00	0.25	0.25	10	526UV0.25

8-2 Custom Flow Channel Cells



Optical Features:

Material: Synthetic Silica Glass
Usable Range: 190-2,500nm

Applications:

Particle Counter & Analyzer
Blood Cell Counter & Analyzer

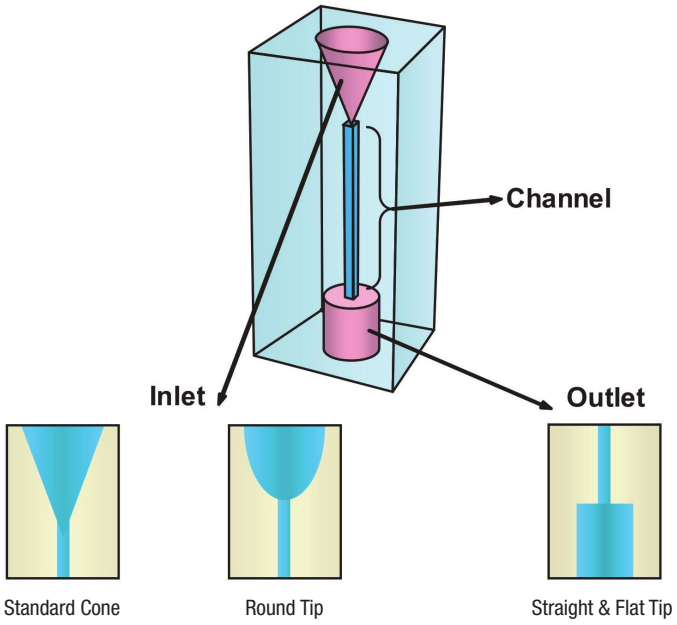
Variations:

Single Cone
Double Cone
Polished Cone
Anti-Reflection Coating
Aluminum Coating… and more

Available Size:

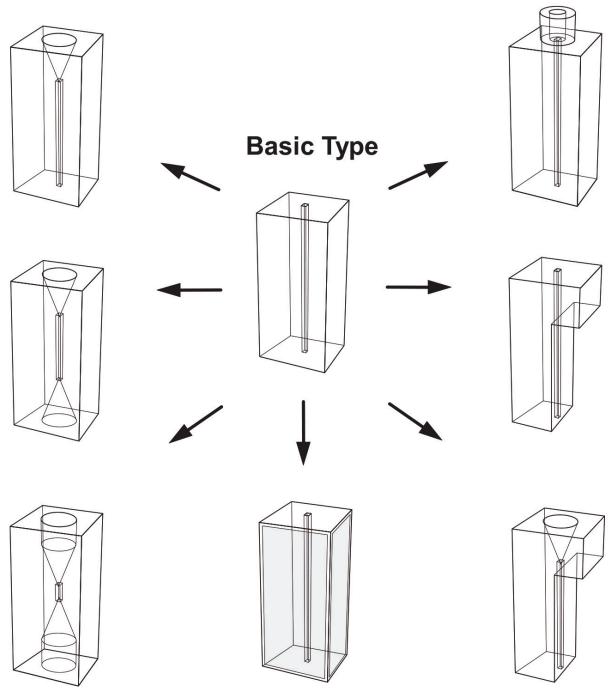
Channel Size: 50µm~
Channel Length: 100µm ~
(cone head to cone head)

EXAMPLE OF A TYPICAL DESIGN



Method: Thermal fusion or optical contact bonding
Size: 50 µm ~
Accuracy: ± 10 µm standard (± 5 µm available)

EXAMPLE OF SOME POSSIBLE MODIFICATIONS



In constructing flow channel cells, four quartz blocks are fused together. Variations using black quartz are also available, as shown above.
For a quotation or if you have any questions, please send your drawing or idea to info@fireflysci.com, or fax it to +1-347-554-8048.

Evacuable KBr Dies

KBr Disc Technique: This widely practiced method consists of grinding and mixing a sample with dry KBr or KCl powder, which is then compressed within an evacuated Die to produce a transparent disc, since KBr and KCl are transparent from the ultra-violet well into the infrared. The method may be used for investigation in the ultra-violet and the visible, as well as the infrared region.

Dies suitable for producing discs of 3, 5, 6, 8, 10, 13, and 16mm diameter are available as standard within the size range of the KB series. Non-standard sizes are available on request.

All dies in the KB series are constructed entirely of stainless tool steel, and parts are precision machined. Pellets are optically flat and mirror polished. Tungsten carbide pellets and component parts can be supplied to special order.

Dies are supplied with black anodised sleeves.

Spares for KBr Dies

PART#	DESCRIPTION
KB-30	Set of 1 pellet for KB-3
KB-03	Plunger pellet for KB-3
KB-003	2 sets of O-rings for KB-3
KB-50	Set of 2 pellets for KB-5
KB-05	Plunger for KB-5
KB-005	2 sets of O-rings for KB-5
KB-60	Set of 2 pellets for KB-6
KB-06	Plunger for KB-6
KB-006	2 sets of O-rings for KB-6
KB-80	Set of 2 pellets for KB-8
KB-08	Plunger for KB-8
KB-008	2 sets of O-rings for KB-8
KB-100	Set of 2 pellets for KB-10
KB-010	Plunger for KB-10
KB-0010	2 sets of O-rings for KB-10
KB-130	Set of 2 pellets for KB-13
KB-013	Plunger for KB-13
KB-0013	2 sets of O-rings for KB-13
KB-160	Set of 2 pellets for KB-16
KB-016	Plunger for KB-16
KB-0016	2 sets of O-rings for KB-16
KB-SE	Spare extractor ring for the above dies
KB-3	KBr Die for 3mm Disc
KB-5	KBr Die for 5mm Disc
KB-6	KBr Die for 6mm Disc
KB-8	KBr Die for 8mm Disc
KB-10	KBr Die for 10mm Disc
KB-13	KBr Die for 13mm Disc
KB-16	KBr Die for 16mm Disc
KB-13ST	KBr Die Starter Kit for 13mm Disc
KB-16ST	KBr Die Starter Kit for 16mm Disc

info@fireflysci.com 1-347-441-4277

Evacuable XRF Dies

X-Ray Disc Technique: The BKX series of x-ray dies provides a standard size range producing discs of 20, 25, 32, 35, and 40mm diameter for x-ray fluorescence study of powders and materials. Certain powders which are normally difficult to pelletize without the addition of a binding agent may be successfully pressed within a thin walled plastic ring.

Tungsten carbide plungers and pellets also available.

Spares for X-RF Dies

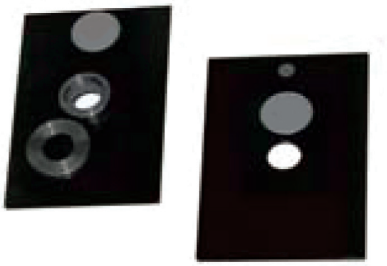
PART#	DESCRIPTION
KBX-200	Set of 2 pellets for KBX-20
KBX-020	One only plunger for KBX-20
KBX-0020	2 sets of O-rings for KBX-20
KBX-250	Set of 2 pellets for KBX-25
KBX-025	One only plunger for KBX-25
KBX-0025	2 sets of O-rings for KBX-25
KBX-320	Set of 2 pellets for KBX-32
KBX-032	One only plunger for KBX-32
KBX-0032	2 sets of O-rings for KBX-32
KBX-350	Set of 2 pellets for KBX-35
KBX-035	One only plunger for KBX-35
KBX-0035	2 sets of O-rings for KBX-35
KBX-400	Set of 2 pellets for KBX-40
KBX-040	One only plunger for KBX-40
KBX-0040	2 sets of O-rings for KBX-40
KBX-SE	Spare extractor ring for the above dies
KBX-20	Evacuable die for 20mm disc
KBX-25	Evacuable die for 25mm disc
KBX-32	Evacuable die for 32mm disc
KBX-35	Evacuable die for 35mm disc
KBX-40	Evacuable die for 40mm disc

Evacuable 8mm Spanner Die

This KBr Spanner Die is used to produce small numbers of 8mm diameter KBr Discs when a standard die and hydraulic press cannot be justified. The sample is squeezed between the optically polished faces of two 9/16 UNF bolts in the evacuable die body. Moisture is removed from the sample by evacuation. Pressure is then applied by tightening a spanner each end, on the bolts relative to each other. On removal of the bolts, the sample disc remains in the die body. A slide holder is supplied for holding the die body in the FTIR instrument.

PART#	DESCRIPTION
KB/SD-1	Spanner die complete with bolts, seals, & slide holder
KB/SD-2	Spanner die with bolts and seals
KB/SD-3	Spare set of bolts
KB/SD-4	Set of spanners
KB/SD-5	Spare seals
KB/SD-6	Slide holder

info@fireflysci.com 1-347-441-4277



KBr Disc Holders with Rectangular Mounting Plate

Other sizes available on request.

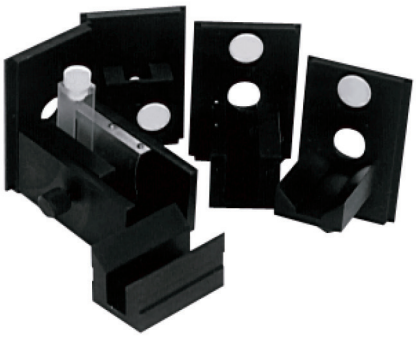
PART#	DESCRIPTION
KB-DH3	For 3mm disc
KB-DH5	For 5mm disc
KB-DH10	For 10mm disc
KB-DH13	For 13mm disc
KB-DH16	For 16mm disc
KB-DHM13	Magnetic holder for 13mm disc
KB-FH	Magnetic film holder 20mm aperture

Reflex Evacuable 13mm KBr Minidie (Uni-Die)

Simple, three–piece construction, manufactured from hardened stainless steel. The stepped end pellets are optically polished and there are O-rings on each end for vacuum seal. This can be used with any standard hydraulic press. The pellet is formed in the body and held in the 3” x 2” V-mount for analyzing. After analysis, the sample is washed out and the die is ready for re-use.

PART#	DESCRIPTION
KB/UD-1	Minidie complete with 3”x2” V-mount
KB/UD-2	Set of spare stepped pellets (2)
KB/UD-3	Spare 3”x2” V-mount slide holder
KB/UD-4	Spare set of O-rings (4)

info@fireflysci.com 1-347-441-4277



PART#	DESCRIPTION
CHR1/50	Rectangular cuvette holder for cells 1-50mm p/l
CHR1/100	Rectangular cuvette holder for cells 1-100mm p/l
CHC10/50	Cylindrical cuvette holder for cells 10-50mm p/l
CHC10/100	Cylindrical cuvette holder for cells 10-100mm p/l
CHM12.5	Micro cuvette holder for cells 10mm p/l
CHU1/100	Universal cuvette holder for rect & cyl cells 10-100mm

100mm Stainless Steel Gas Cell for FTIR

Gas cell is constructed in 316 S.S.
O-rings are used in each end to seal windows with anodized aluminium caps.
Two nupro plug valves are connected via S.S. tubes to body of gas cell.
Window size: 38mm diameter x 6mm, clear aperture 25mm diameter.
Volume is 50cc. Valve outlet connection 1/4" (6.35mm) swagelok.
Two 1/4" (6.35mm) S.S. tubes with rifle ends are supplied for connecting with laboratory tubing.
Slide plate holder with captive screw to lock cell on holder.
Gas cell is supplied with slide plate holder in presentation case.
Windows are not included. **Part number: GC-10SS**

100mm PTFE Gas Cell for FTIR

Gas cell is constructed in PTFE. O-rings are used in each end to seal windows with anodized aluminium caps.
Two PFA valves are connected to body of gas cell.
Window size: 38mm diameter x 6mm, clear aperture 25mm diameter.
Volume is 50cc. Valve outlet connection 1/4"(6.35mm).
Two 1/4"(6.35mm) PTFE tubes with rifle ends are supplied for connecting with laboratory tubing.
Slide plate holder with captive screw to lock gas cell on holder.
Gas cell is supplied with slide plate holder in presentation case.
Windows are not included. **Part number: TGC-10**

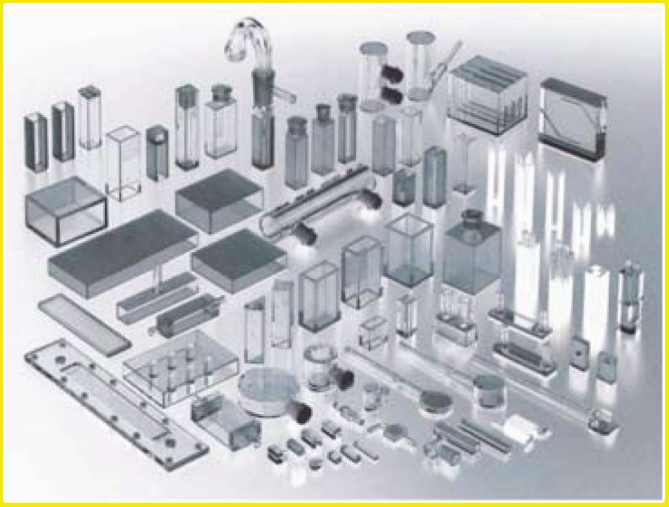
About the cuvettes in this catalog...

When you order from FireflySci, Inc., you are ordering from a well established, highly regarded cuvette company. Our cuvettes are 100% guaranteed to meet your quality standards in all regards: Transmission, assembly, matching – everything.

At FireflySci, Inc., quality is number one.



Also inside...

Evacuable dies
