Class Descriptions

Advanced Acting Technique

Featuring a vast array of techniques designed to train the young actor at the highest possible level and to prepare them for the challenges of the modern acting industry. Judging by its reputation and success rate, we think you'll find these unique classes to be second to none.

Meisner Intensive

Taught at the world's most renowned acting conservatories, the technique of Sanford Meisner is the foundation of our school's curriculum. Students will study this cutting edge technique at the highest level. They will walk away from this class with more confidence in themselves and in their work. The Meisner Intensive is our longest running and most successful class and has served as a roadmap of discovery for generations of our students.

Playwriting/Screenwriting

In this class students will come to understand what it takes to develop and write original scripts at a professional level. They will learn what is important to include in a script, how to work with actors and directors, and how to market completed scripts.

Acting for Film

This class we will concentrate on applying the skills learned in technique classes. Students will become comfortable in front of the camera by actually acting on film. They will spend time on-camera and garner footage they can use to put together a reel.

Stage Combat

This class will teach basics of hand-to-hand combat and some sword play. Students will learn how to fight properly and safely on stage and film which culminates in a choreographed fight scene.
