8. Motion: Support for Consolidated Rental Car Facility / Air Pollution Reduction / Electric Vehicle Availability (CF 19-1586). Proposes to increase to 80% of car rentals are electric, and add charging stations in the city (museums, malls, destinations). **Other items (may or may not be considered at this meeting, pending time availability):**

10. Administrative:
   a. What does “we need housing” mean?
      i. Is it an excuse for developers to build as big as possible?
      ii. Does every project “need” to be as big as possible while providing miniscule open space and minimal landscaping? Or, should housing be built that blends with the neighborhood, does not impose on the older housing stock, yet still increase the unit count?
   b. Role of PLUM:
      i. Rubber-stamp for Planning Dept. and approve all project as long as they “comply” with zoning in our opinion (though only the Planning Dept. can determine that)? Or, shall we defend the long-time neighbors and character of the community by supporting reasonable, smart growth?
         1. See Exhibit: Letter from Gloria Campbell.
      ii. Is the minimally-required amount of required affordable housing OK for density bonus and TOC projects, or should we request more?
c. NC reputation with Planning Dept. – do they actually hold NCs in low regard if NCs place conditions/restrictions on projects to improve the project and protect the neighborhood?
   i. Which planners say the WLASNC requests unreasonable design revisions, and which planners hold them in low regard because of community input?

d. Role of NC involvement: Desire of land owner vs. desire of community. NC is one of several community groups who can influence city.

e. What does it mean when developers say “The Council Office supports it”?
   i. Examples of 1735 Westgate Ave. small lot subdivision and 1702 Granville Ave. small lot subdivision.

f. What does it mean when developers say “The Planning Dept. supports it” for small lot subdivisions?
   i. Consequential items (height, FAR, setbacks, open space) vs. non-consequential items (design, articulation, color).

g. Philosophy of PLUM and basis of decisions: Rubber stamp for Planning Dept., defer to developers for design decisions, vs. push back for better projects for community?
   i. Facts vs. speculation (i.e. hearsay).
   ii. City prohibition on decisions based on financial impact on owner, developer and neighbors.
   iii. Minutiae of Planning/Zoning Code vs. concept/vision of best way to integrate with existing neighborhood.

h. Items of consideration:
   i. Condominiums vs. apartments.
   ii. Sales prices and rents.
   iii. Types of retail.

   e. Motion: PLUM shall recommend that the NC require commercial uses within 200 ft. of residences to reduce nighttime noise after 10:00 pm to 35 decibels and/or prevent noise from leaving the site (per DBS code).
   f. Motion: Housing Committee proposal for addition of a “penalty of perjury” clause to forms required for demolition, giving the city the ability to punish developers who mislead planners about the project’s compliance with the rent stabilization ordinance. Prohibit condominium conversions unless neighborhood vacancy rate is 5% or more (see exhibit).
   g. Motion: Request status of Quimby/Parks funds available for NC district and possible uses (pocket parks, playground equipment, sports fields, Civic Center).
   h. Motion: CD11 and DOT shall audit parking meter revenue and designate traffic-calming and other projects to fund.

The Chili Bowl - 12244 W. Pico Blvd. – Historic Preservation

On Dec. 5, the Cultural Heritage Commission voted to take the nomination for the Chili Bowl restaurant building in West Los Angeles under consideration. The Los Angeles Conservancy nominated this rare and early example of Programmatic architecture in October, and the property recently sold to a new owner applied for a demolition permit on November 4. There is a hold on permit activity while the nomination is pending.

SurveyLA identified the Chili Bowl as eligible for landmark designation at the national, state, and local levels in Los Angeles’s citywide survey, SurveyLA. The Chili Bowl in West Los Angeles is one of the oldest surviving examples of Programmatic architecture in L.A. Because so few examples remain today, Programmatic buildings are considered a rare resource type.

The building is one of five remaining former Chili Bowl structures from entrepreneur Arthur Whizin’s Chili Bowl restaurant chain, which numbered 18 locations in Los Angeles County at its height in 1941-1942. Of the surviving Chili Bowls, the West Los Angeles location is the most intact and has operated nearly continuously as an eatery. The current tenant, Shunji Japanese restaurant, has operated out of the former Chili Bowl since 2012.

Urban Design report: PLUM will invite Mr. Kaliski and Mr. Leitner to future meeting

Urban Studio: John Kaliski, Martin Leitner, architects

Report: Community Design Overlay plans can be used to encourage / mandate attractive and functional urban design on the main streets in many neighborhoods of urbanized Los Angeles, including West L.A. (Wilshire, Santa Monica, Olympic, Pico).

Design of Toluca Lake CDO plan was funded by the NC.

Design elements:
1. Buildings that face the street.
2. Density that is designed well (architectural aesthetics, massing/ articulation, varied setbacks by floor, window/doors, awnings).
4. Residential, if per code parking.
5. Townhouses are buffer/transition to houses.

Lessons:
1. Cannot use CDO to change Zoning/Land uses, best used for design-only issues.
2. Use as part of Specific Plan, which is a legally binding document that codifies land uses.
3. Must explicitly preserve R1 houses in order to implement the CDOs that introduce Residential and higher densities.
4. No transitions between Residential land uses are in code.
5. CD offices prefer business-like and constructive collaboration.
6. Defensive design works, and it can be part of a comprehensive plan to reduce crime.
   a. Elements include placing windows/doors/entrances at ground level to allow for “natural surveillance” and promote activity along the street frontage.
   b. Parking should be “wrapped” by residential uses on the ground floor.
      Ground floor parking along the frontage creates dead spaces and allows criminals to loiter and burglarize cars and buildings.
7. Wide sidewalks are important to stimulate pedestrian activity, and should be at least 12 ft., preferably 15 ft. wide.
