

EDDYBOY

Product brochure

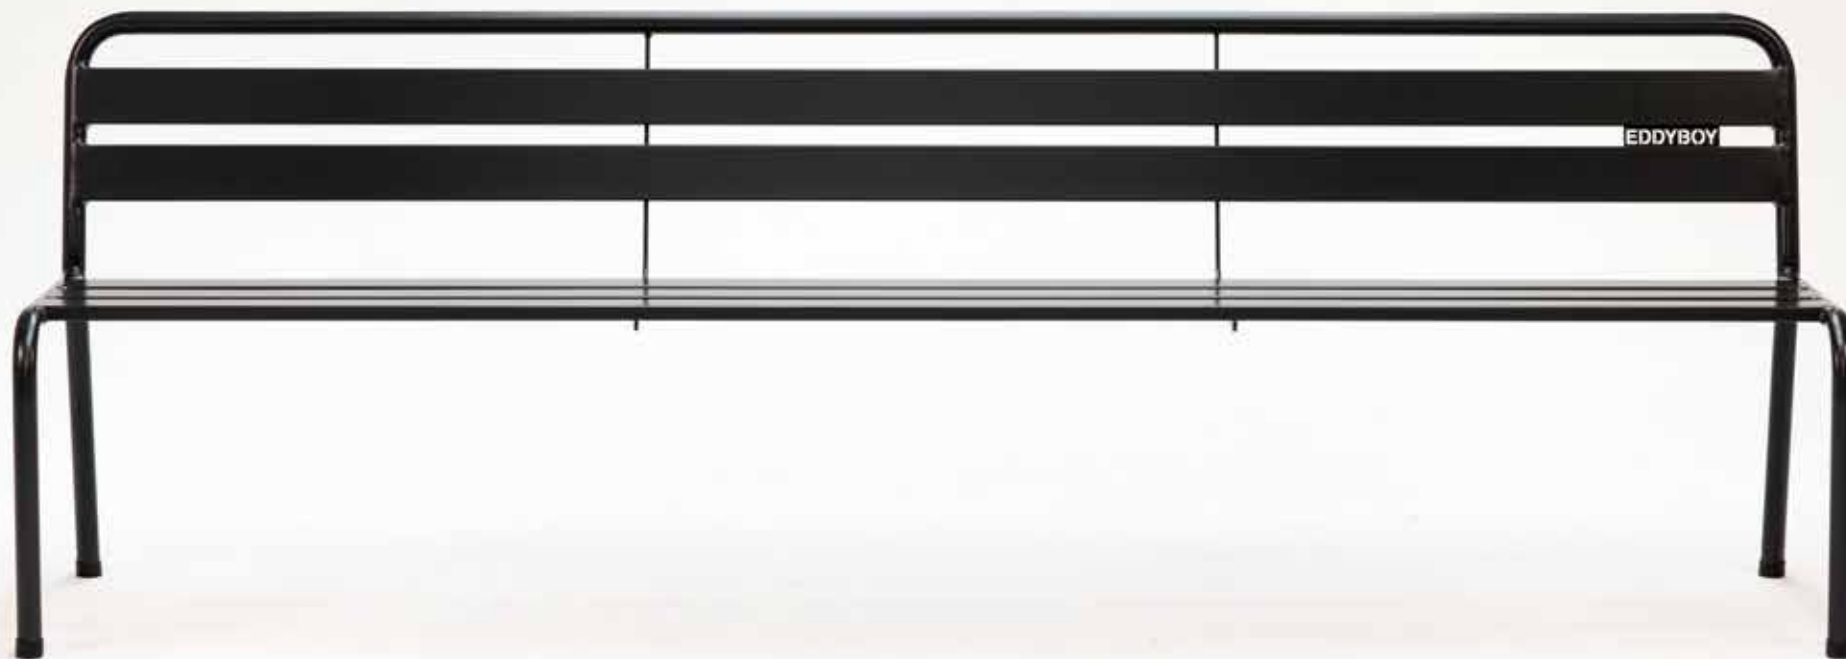

EDDYBOY the four seasons bench

The EDDYBOY is the ultimate atmosphere bringer during chilly summer evenings or cold winter days. Make yourself comfortable on the bench and enjoy its nice radiant heat until the late hours.

You can also daydream next to the atmospheric glow of crackling flames. And what about some barbecuing, wokking or roasting marshmallows over the fire? Nothing beats sitting outside watching real flames.

EDDYBOY bench

The EDDYBOY terrace bench brings durable warmth and comfort when it gets colder outdoors. The heated bench makes it possible to sit outside much longer. That way, garden and patio become an extension of our house, so we can spend more time there as well. This innovative seat makes for extra moments of fun during any social occasion.

melon yellow (RAL 1028)

usage

- EDDYBOY C/H: 0.925 kW/hr (pump and central heater)
- EDDYBOY hot tub: 25 W/hr (pump) - heat recovery from hot tub
- EDDYBOY dishwasher: 25 W/hr (pump) - heat recovery from dishwasher

Comparison with other terrace heaters:

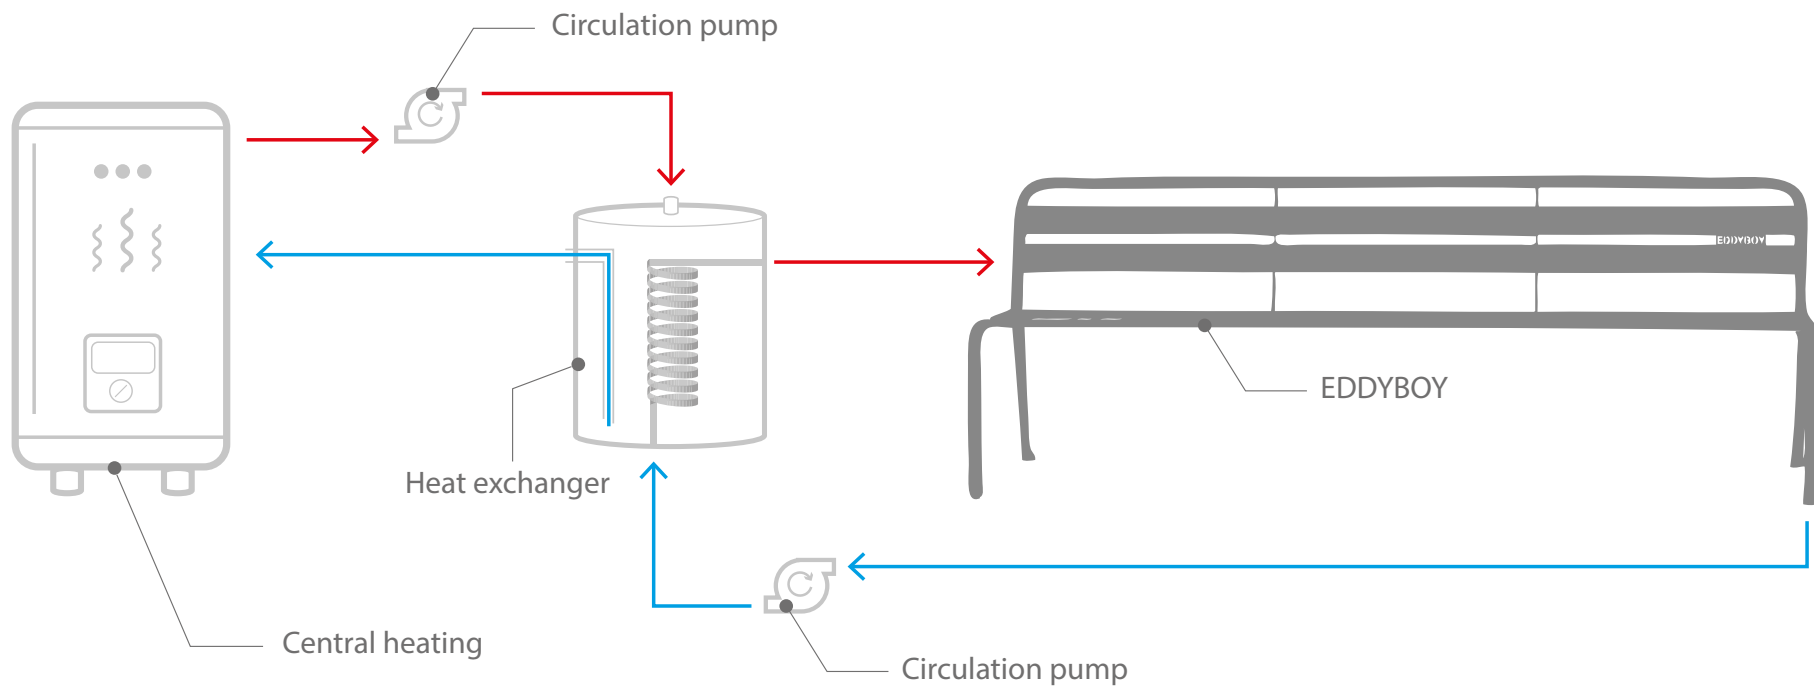

| Heating type | Consumption/ hr | Cost price/kWh | Expenses/8h/day | Expenses/200 days/year |
|---|--------------------|----------------|-----------------|------------------------|
| Butane heaters "Patio heater" | 12 kWh | € 0.09 | € 8.64 | € 1728 |
| Electric heaters "Infrared heater" | 2.5 kWh | € 0.22 | € 4.40 | € 880 |
| EDDYBOY C/H "Terrace bench" | 0.9 kWh | € 0.08 | € 0.58 | € 116 |
| EDDYBOY connected to central heating, energy prices on 01/04/2015 | | | | |

installation central heating

The bench is indirectly connected to the central heating via a frost protected heat exchanger.

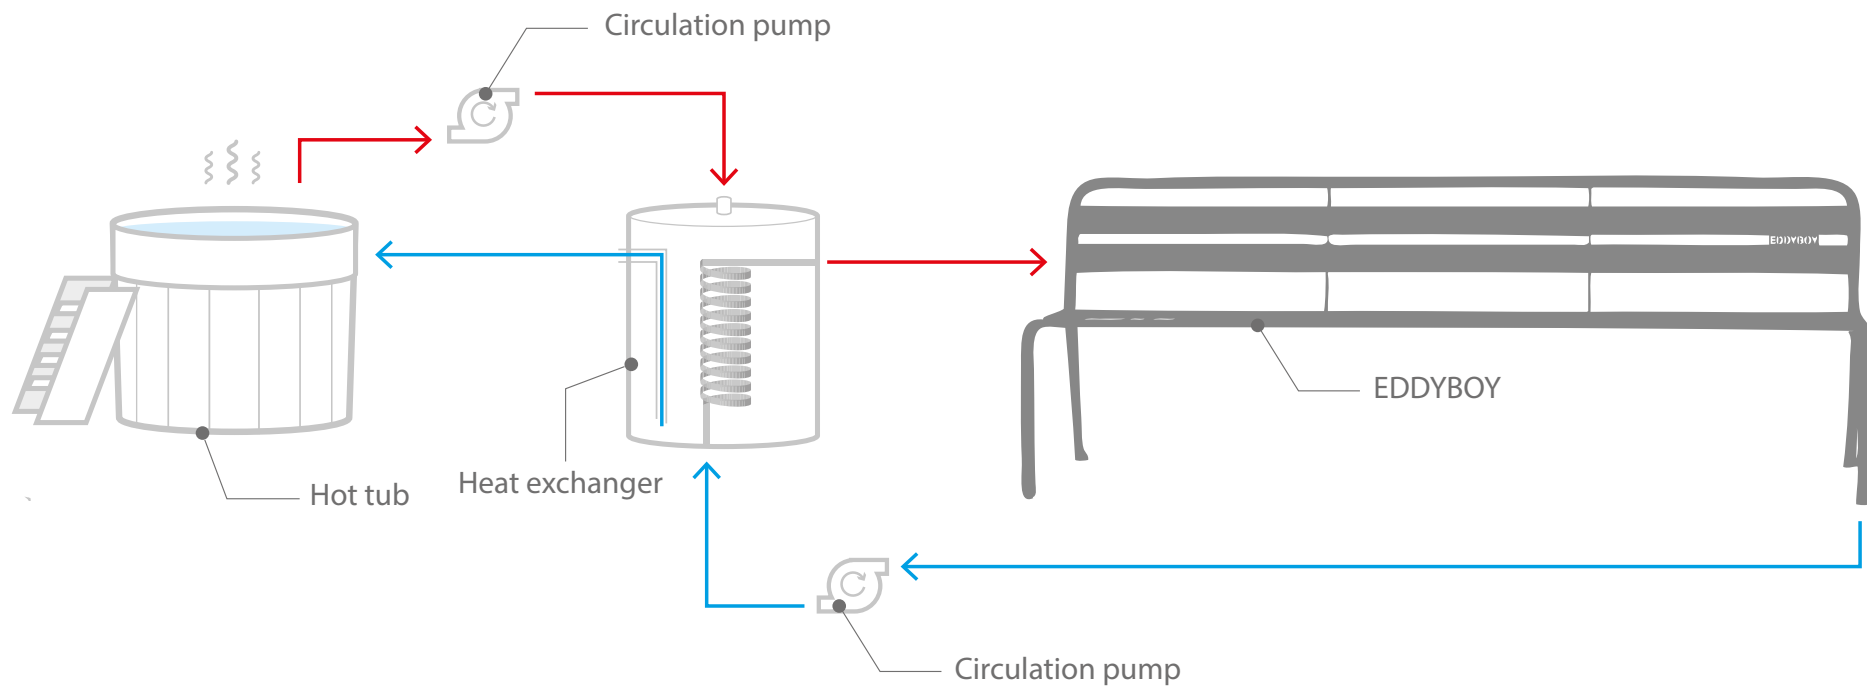

The EDDYBOY can be turned on or off with a simple switch.

Its core values are plug and play, low energy consumption, easy maintenance, reliability and vandalism resistance.

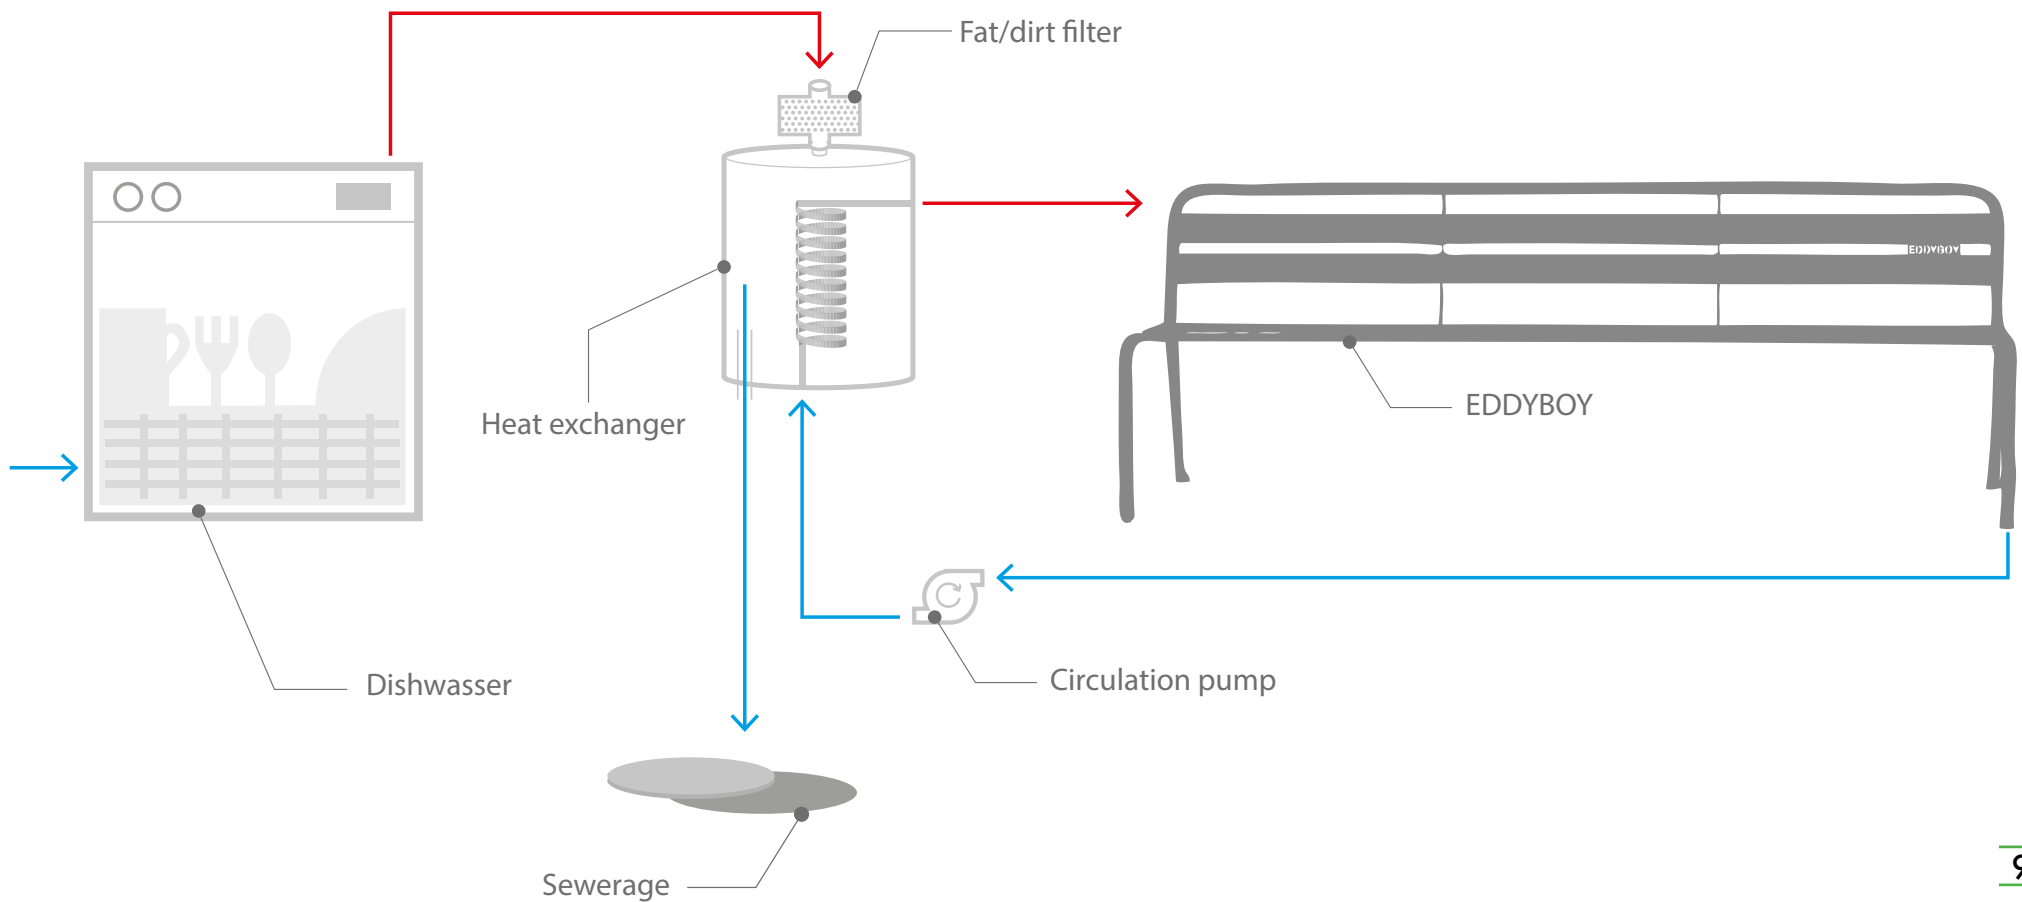

installation hot tub/pool/ sauna

After a hot tub is used, its heated water is replaced for hygienic reasons. Because of this, liters of warm water are lost on a daily basis. By recuperating this heat, you can enjoy the EDDYBOY for hours on end.

installation catering dishwasher

Specifically for catering businesses, a possibility is being sought to reuse the warmth of dishwashers' wastewater - that is otherwise irretrievably lost - for the heating of benches.

usage

- Use the on/off switch.
- The temperature of the bench is adjustable via a thermostatic tap.
- Depending on the environment temperature and the intensity of the fire, the bench heats up to 30° C in 10 to 30 minutes.

maintenance

- After installation, the bench should be annually vented and possibly refilled. Its system can be filled with an antifreeze product to protect it against frost.
- All EDDYBOY products are made of metal, have undergone an anti-rust treatment and are powder coated for all weather circumstances. This guarantees a long lifespan and makes the EDDYBOY as good as maintenance free.

delivery time

Delivery time for all EDDYBOY products is 6 to 8 weeks.
