TALLER

About TALLER R

Taller R is a design studio based in Mexico City. We specialize in furniture, home accessories and interior design. It is our belief that conceptual interior design emerges from understanding the relationship between a specific design and the individuals who will eventually make use of the product, inevitably leading to a more intimate, objective and original result. With this approach, each of Taller R's pieces is carefully designed bearing in mind a specific purpose and taking into account our clients lifestyle; for this reason, we like to think of ourselves as "Furniture Tailors."

Taller R responds to a need, offering a connection between the designed space and its inhabitants through customized furniture. We feel propelled by the idea that our pieces are that final link that will enable our customers to seize and conquer spaces.

We have a great passion towards craftsmanship. We know that style can not be bought, it has to be created and transformed with time, and we contribute to this process with different objects that become part of our client's history.

Form, dimensions, materials and high quality labor are the elements that shape us as tailors of excellent furniture and accessories that reflect the craftsmanship.

We are brandless ideas, we are ideas with a soul.

MARTINA STOOL

Martina is the consequence of Taller R's take on one of Mexico's most emblematic designs: the Acapulco Chair. The seat is woven with PVC cord over a powder coated steel structure, which makes it ideal for both, indoors and outdoors. The versatility of its color combinations allows it to become a vibrant accent piece that stands out in every environment.
