

GeTS

GLOBAL eTRADE SERVICES

SINGLE WINDOW FOR GLOBAL TRADE COMPLIANCE CONNECTIVITY

WHAT IS GLOBAL eTRADE SERVICES (GeTS)?

Navigating and meeting the complexity of regulatory requirements in international trade is never an easy task; especially so when traders need to move many different types or combinations of cargo across multiple Customs and borders.

Traders need an easier and more efficient way to navigate in international trade.

GeTS has a comprehensive suite of services that helps traders meet regulatory and compliance requirements from Government agencies and trade associations around the world. Based on a SaaS model, GeTS is centered on a Single Window (SW) that facilitates global trade with Compliance Connectivity, eAdvisory and Data Analytics suite of services. All these services can be subscribed on the fly and scaled accordingly, and delivered through Cloud to enable a high level of system uptime.

GeTS **Compliance Connectivity Services** facilitate trade declarations, cargo manifests submissions, import/export permits applications, and electronic Certificate of Origin (eCO) applications to government agencies and trade associations globally.

GeTS **eAdvisory Services** consolidate import and export regulatory/compliance related information for various countries onto a single platform. Traders using eAdvisory Services such as HS (Harmonised System) Codes auto classification makes it easier for traders to identify the correct HS code for traded goods. In addition, FTA Analyser (Duty Optimisation) assists traders to capitalise on various Free Trade Agreements for import duty savings and other benefits.

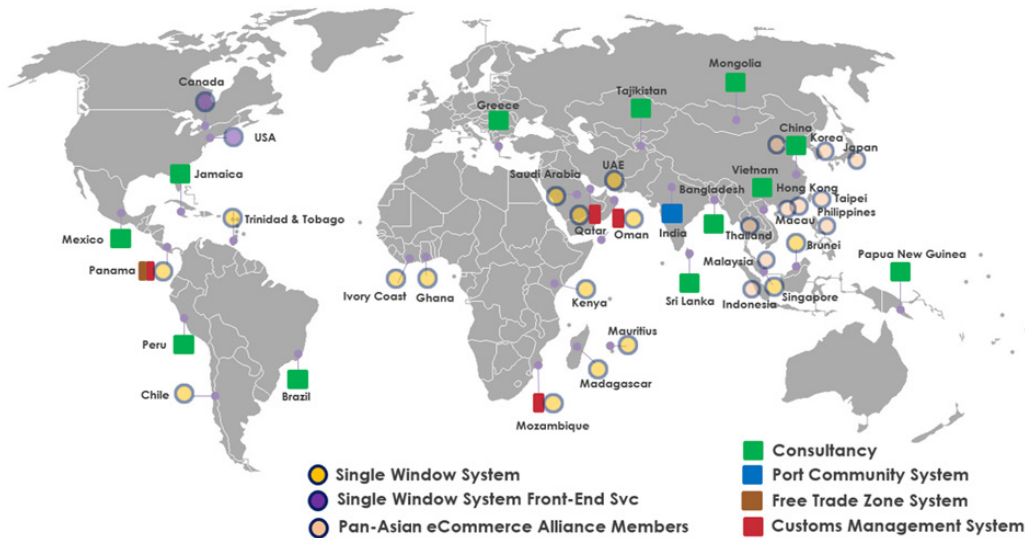

GeTS' **value added service suite** ranges from Business Process Outsourcing (BPO) for traders that require electronic submission of trade declarations or manifest information on their behalf to integrating services with customers' existing ERP, FMS, and TMS systems.

Apart from offering services to end-customers, GeTS also partners eLogistics solution providers such as Freight Management System and Transport Management System service providers to enhance their service offerings to their user communities.

GeTS amalgamates Crimsonlogic's more than 25 years of experience and know-how in trade facilitation in more than 16 countries, with a broad and diverse customer base spanning across Asia, Middle-East, Africa, Latin America, and the United States. GeTS customers include international Freight forwarders, NVOCCs, Shippers and Consignees.

GeTS ADVANTAGE

SW implementations in 14 countries	Pan-Asian e-Commerce Alliance with 11 countries	Deep Domain knowledge in trade compliance	Strong brand among industry players
------------------------------------	---	---	-------------------------------------

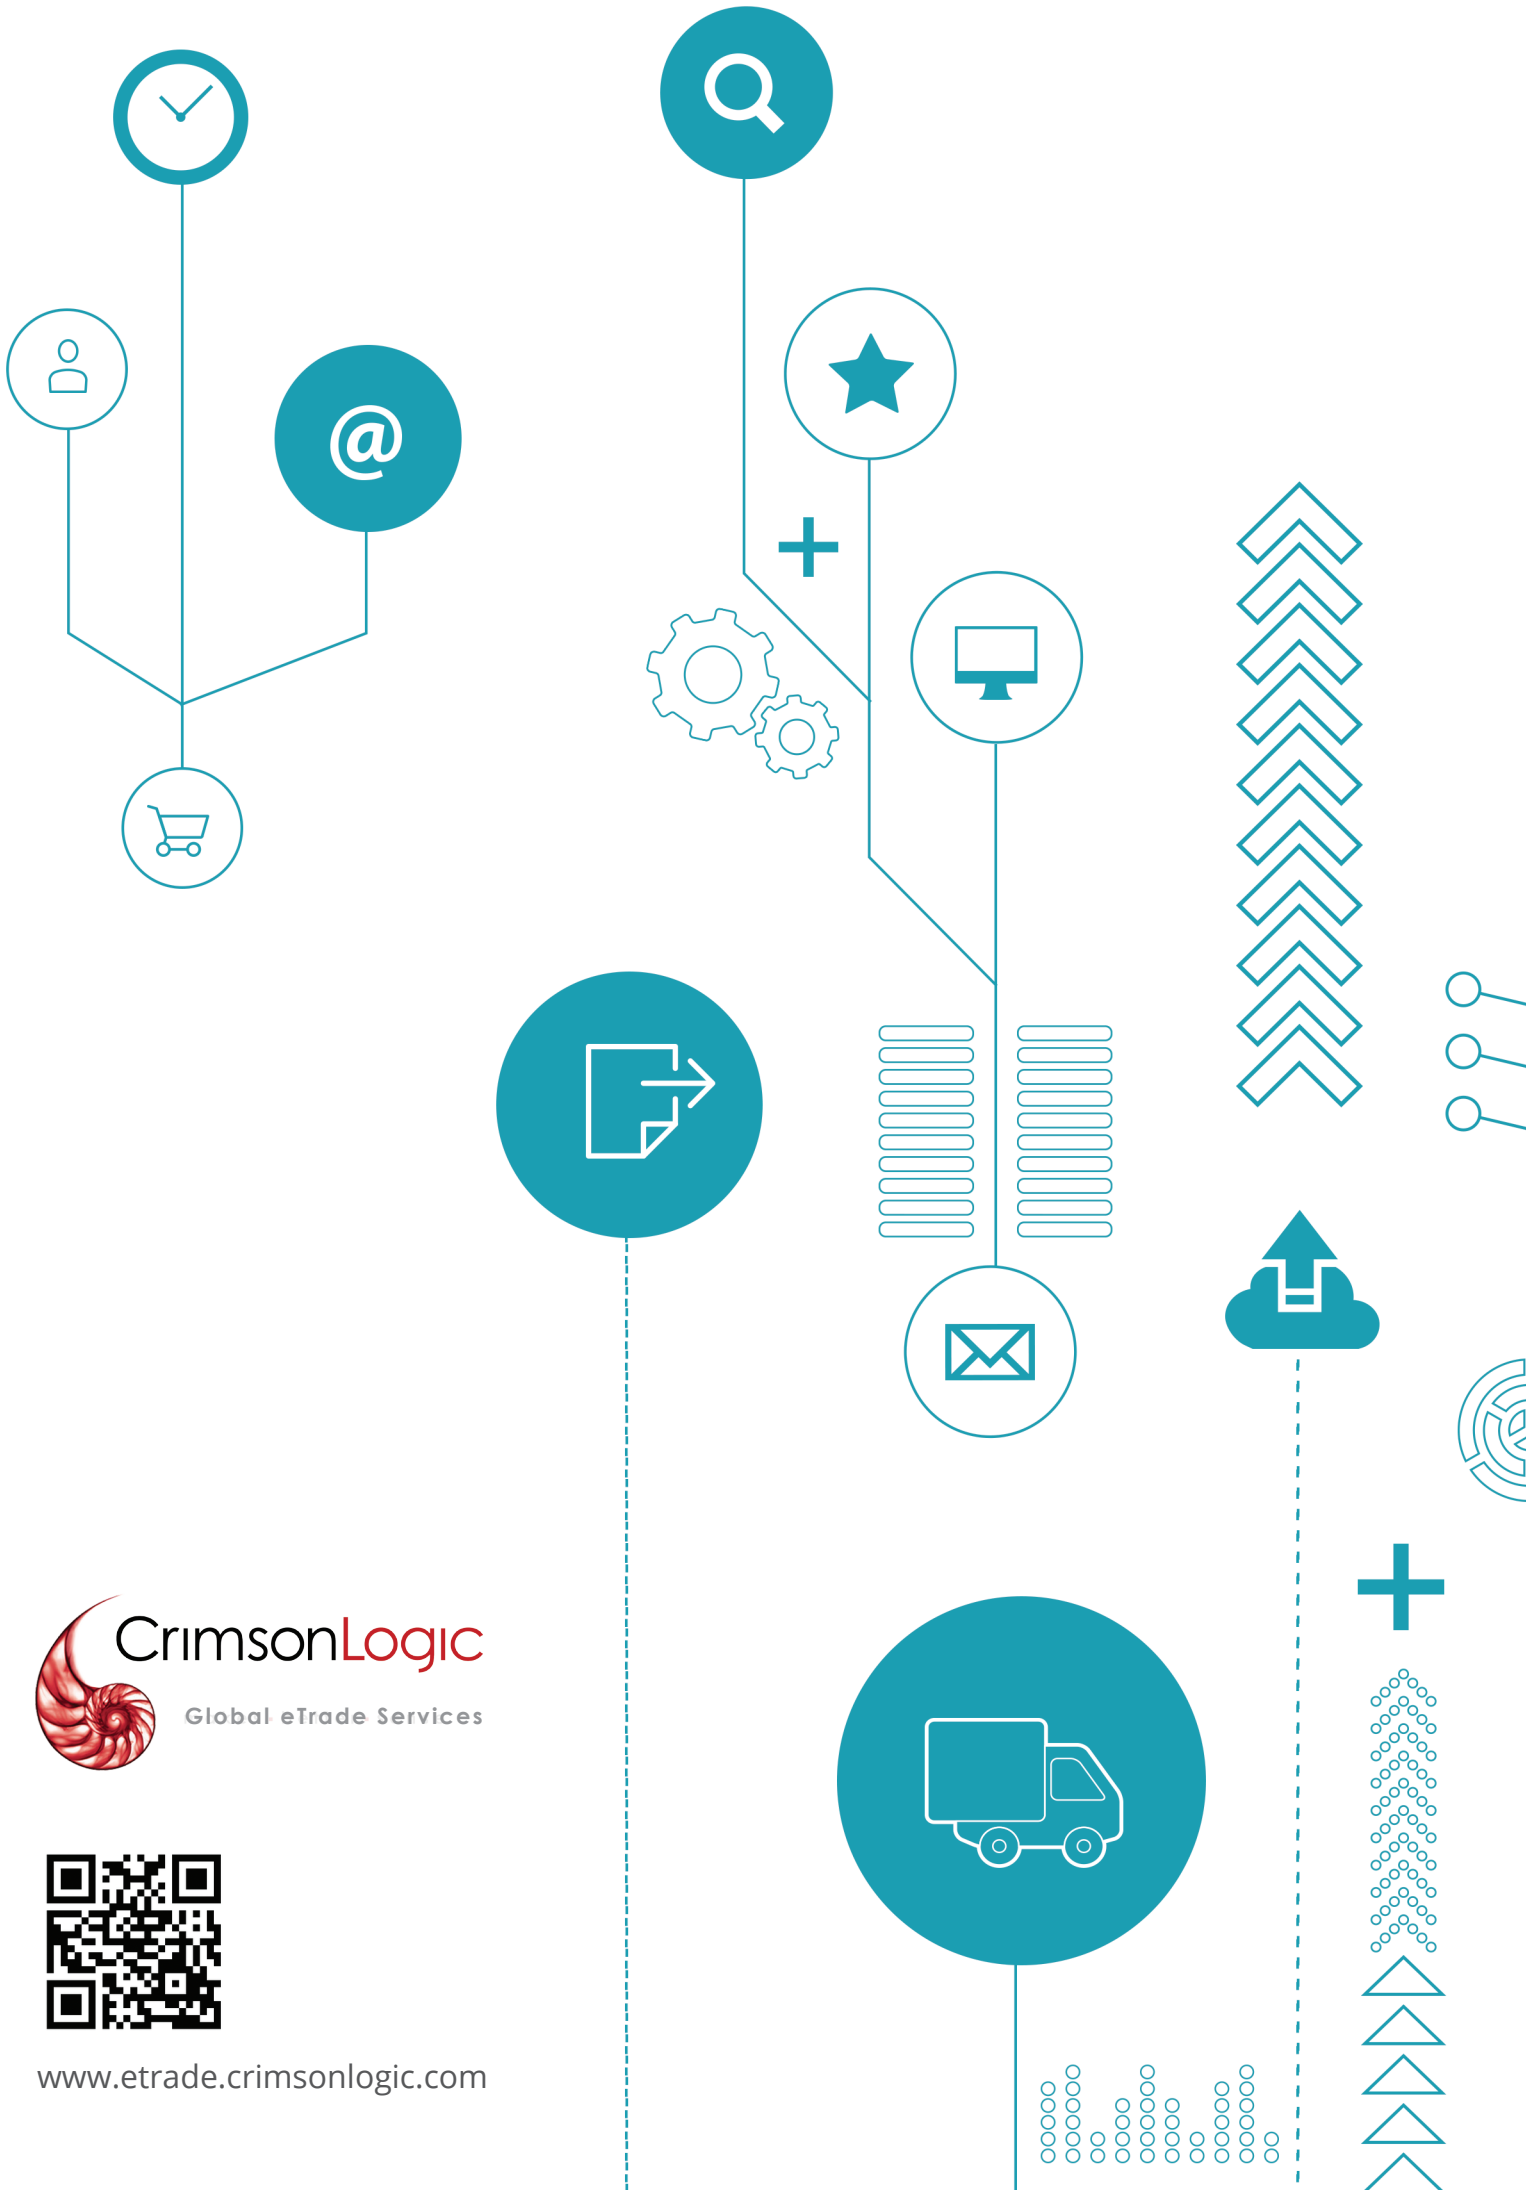

GeTS MISSION AND VISION

Accelerate cross-border trade and to be the leading Single Window for global trade compliance connectivity by 2018.
