

DON'T MANAGE THE TECHNICAL DETAILS ON YOUR OWN

ISM offers an enterprise data storage model that means you can let go of those details while gaining storage provided like a utility, with improved availability, performance, and reporting, as well as speed to value and cost-effectiveness.

WHAT DO I GET?

- Enterprise-level data storage from flash or spinning disk, custom to your application performance requirements in a cost-effective manner, where you pay only for what you use
- State of the art storage technology, including installation, configuration, upgrades, and patching
- Storage virtualization and enhanced copy capabilities (Global Mirror and Flashcopy)
- On-demand, secured shared IBM infrastructure
- 24/7 storage monitoring and alerting
- TotalStorage Reporting capability
- Data flashcopies to support development and testing

WHY SHOULD I CARE?

- Flexibility to select the best match of performance and price from various tiers of disk to match your application requirements
- Keep your data safe with fully redundant tiered storage infrastructure and security health checks
- Rest easy knowing ISM software and hardware is regularly refreshed and enhanced so you're always up to date
- Benefit from ISM's ability to draw from the IBM Global Services skill pool
