

High-Visibility PPE Cleaning

TERSUS provides unprecedented cleaning power for technical military gear. Without water, heat, or harsh chemicals, TERSUS rejuvenates ballistic protection by removing oils and odors. This makes the gear more comfortable and durable over the long term.

Improve soldier comfort & preserve safety features

Maintain shape and fit for proper functionality

No color fading preserves authentic military colors

Restore water & oil repency

The Problem

Due to on-going gear shortages and budget challenges, substantial quantities of dirty, odorous, and stiff ballistic vests are returned to service without cleaning. If washed, water and other solvents undermine the protective properties of the inner ballistic panels; shrinkage, fading, and diminished outer fabric integrity also occur. To ensure proper fit and function of ballistic vests, effective, regular service is necessary.

TERSUS Kevlar Cleaning

Ballistic protection is preserved while cleaning both the inner ballistic panels and the outer cover simultaneously.

No water

30-60% less energy use

Short cycle times
