

Pilot Tactical Aggressive Growth Strategy

November 2017

THE HUYGENS APPROACH

We offer tactical investment strategies designed to grow assets during both rising and steeply falling U.S. equity market regimes.

Our approach is to shift between offensive and defensive portfolios of ETFs in response to our proprietary measures of market stress.

During low-stress periods, the strategy gives slightly leveraged exposure to a growth portfolio via highly liquid U.S. equity index ETFs. When equity market stress rises, we reposition the portfolio to add U.S. government bond exposure and reduce equity exposure.

We offer clients daily liquidity and full transparency by providing our strategies in separately managed accounts.

OUR PROPRIETARY INVESTMENT SYSTEM

All of our tactical strategies are powered by our proprietary decision engine, which incorporates insights into behavioral finance and equity market dynamics learned from well-known academic research, augmented with Huygens's own research. Our system is a data-driven tool for identifying and reacting to periods of market stress.

Indicator State _____ Implication _____

Offense Bullish equity market sentiment prevailing
Defense Market stress rising; volatility likely
Caution Market in transition

Our indicator is updated once each day, after market close, allowing us to respond quickly to changing market conditions. Any portfolio repositioning required is effected the next day.

THE PILOT TACTICAL AGGRESSIVE GROWTH STRATEGY AIMS TO DELIVER HIGH RISK-ADJUSTED ASSET GROWTH WITH DOWNSIDE PROTECTION

FIRM OVERVIEW

Huygens (pronounced ‘HI-guns’) was formed in 2011 with a mission to provide clients with systematic, intuitive, and liquid means of gaining equity exposure with downside risk protection. The firm is a New York-registered investment adviser, and a CFTC- and NFA-registered commodity trading advisor. As of October 31st 2017, Huygens had \$2.5 million of AUM. Huygens has received working capital and other forms of support from Klingenstein, Fields & Co., a \$3B+ wealth management firm founded in New York in 1989.

WALTER C. VESTER, CHIEF EXECUTIVE OFFICER - Walter’s background combines years of experience in fundamental equity investing, alternative investing, and stochastic algorithm development. Before founding Huygens in 2011, he was a Managing Director in Blackstone’s Private Equity group, and was an equity research analyst at AllianceBernstein before that. Early in his career Walter designed algorithms for secure digital communication systems at Harris Corporation’s Advanced Communication Systems Group. He has multiple US & UK patents. Education: BS, Computer and Systems Engineering, Rensselaer Polytechnic Institute (1991); MS, Applied Physics and Electrical Engineering, Case Western Reserve University (1993); MBA, finance, the Wharton School of University of Pennsylvania (2001). Walter has Series 3 and 65 licenses.

ADAM R. SPILKA, CHIEF OPERATING OFFICER - Adam has extensive experience in the legal, compliance, enterprise risk and corporate governance aspects of the financial services industry. Before joining Huygens in 2012, he was General Counsel and Corporate Secretary of Artio Global Investors, a publicly-traded asset management firm. Before that he was Senior Vice President and Corporate Secretary of AllianceBernstein, where he headed the corporate practice group and served as Conflicts Officer. Prior to that he was Vice President and Counsel at Equitable Life, and a corporate associate at Debevoise & Plimpton. Adam has a J.D. (cum laude) from Benjamin N. Cardozo School of Law (1987) and a B.A. in Art History from Columbia College of Columbia University (1982), and Series 3 and 65 licenses.

Investment details:

Investment structure	Separately managed account
Minimum commitment	\$20,000
Management fee	1.25%
Lockup	None – daily liquidity

Custodian / administrator	Interactive Brokers
Legal advisors	Alston & Bird
Reporting	Monthly (daily access)

Endnotes:

1. Hypothetical performance results determined for the months January 1992 through June 2014 using the S&P low volatility index, Russell 2000 index, and Bloomberg and Barclays Capital 10-yr US Treasury indices, since the ETFs tracking them were not available for the entire hypothetical period. Results assume \$50,000 beginning balance; all trades placed at market open; 2 bps transaction costs on all trades; 1.25% management fee. All hypothetical results in this presentation reflect the current version of our proprietary decision engine.
2. Actual performance shown for the Pilot Tactical Aggressive Growth Strategy is based on proprietary and client account performance, which reflects the pro-forma impact of a 1.25% management fee.

Any investor, whether through a managed account or participation in any collective investment vehicle sponsored by Huygens Capital LLC, must be able to bear the risks involved and must meet the specific suitability requirements relating to such investment. In addition, this document does not constitute an offer to sell, or the solicitation of an offer to purchase any interest in Huygens Capital itself.

Huygens Capital LLC does not provide accounting, tax, or legal advice to its clients and all potential investors are strongly urged to consult with their own advisors concerning their individual situations. This material was not intended or written to be used as a substitute for any investor to conduct its own due diligence in connection with making any investment decision. Federal and state tax laws are complex and constantly changing.

Definitions

Benchmarks and financial indices are shown for illustrative purposes only, may not be available for direct investment, are unmanaged, assume reinvestment of income, do not reflect the impact of any management or incentive fees and have limitations when used for comparison or other purposes because they may have different volatility, credit, or other material characteristics (such as number and types of instruments). The Russell 2000® Index measures the performance of the small-cap segment of the U.S. equity universe. The Russell 2000 is a subset of the Russell 3000® Index representing approximately 10% of the total market capitalization of that index. It includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership. The Russell 2000 Index is constructed to provide a comprehensive and unbiased small-cap barometer and is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small-cap opportunity set. The S&P 500® Low Volatility Index measures performance of the 100 least volatile stocks in the S&P 500. Constituents are weighted relative to the inverse of their corresponding volatility, with the least volatile stocks receiving the highest weights. The Barclays Capital US Treasury Bond 10yr term index measures the performance of government bonds issued by the US Treasury. The Term indices only include bonds near to their original term, rather than selecting all bonds in a maturity range, and use the standard market capitalization weighting methodology to weight the bonds. Term Indices have a very similar yield, duration and risk/return characteristics to standard maturity based indices but are more compact and tend to be more liquid than their maturity band equivalent.

Use of Hypothetical Results

HYPOTHETICAL PERFORMANCE RESULTS HAVE MANY INHERENT LIMITATIONS, SOME OF WHICH ARE DESCRIBED BELOW. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. IN FACT, THERE ARE FREQUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL PERFORMANCE RESULTS AND THE ACTUAL RESULTS SUBSEQUENTLY ACHIEVED BY ANY PARTICULAR TRADING PROGRAM. ONE OF THE LIMITATIONS OF HYPOTHETICAL PERFORMANCE RESULTS IS THAT THEY ARE GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. IN ADDITION, HYPOTHETICAL TRADING DOES NOT INVOLVE ACTUAL TRADING OR THE TAKING OF FINANCIAL RISK, AND NO HYPOTHETICAL TRADING RECORD CAN COMPLETELY ACCOUNT FOR THE IMPACT OF FINANCIAL RISK IN ACTUAL TRADING. FOR EXAMPLE, THE ABILITY TO WITHSTAND LOSSES OR TO ADHERE TO A PARTICULAR TRADING PROGRAM IN SPITE OF TRADING LOSSES ARE MATERIAL POINTS WHICH CAN ALSO ADVERSELY AFFECT ACTUAL TRADING RESULTS. ALSO, BECAUSE THESE TRADES HAVE NOT ACTUALLY BEEN EXECUTED, THESE RESULTS MAY HAVE UNDER- OR OVER-COMPENSATED FOR THE IMPACT, IF ANY, OF CERTAIN MARKET FACTORS, SUCH AS LACK OF LIQUIDITY. THERE ARE NUMEROUS OTHER FACTORS RELATED TO THE MARKETS IN GENERAL OR TO THE IMPLEMENTATION OF ANY SPECIFIC TRADING PROGRAM WHICH CANNOT BE FULLY ACCOUNTED FOR IN THE PREPARATION OF HYPOTHETICAL PERFORMANCE RESULTS AND ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS.
