

Air & Sea Forwarding

Shipsparses Management

Expertise in marine logistics and forwarding of spare parts. Developed an unique system with storage hotels which are strategically located in several countries, where spare parts may be consolidated for further delivery to vessels.

Communication

Electronic reporting and integrated with purchase systems and dedicated to clients to coordinate and follow up all instructions. Through website system clients are able to view stocklist, check orders in process, receive preadvise, trace shipments etc.

Transport

All kind of transports are arranged: airfreight, seafreight, onboard delivery by supply vessels. Always the most cost effective and safe mode of transport to meet any delivery deadline.

Logistics

Monitoring that the amount of individual shipments arriving at destination through are reduced by consolidation. All spares arriving at our terminals will be barcoded with vesselname, repacked if required and reported to owner as on hand by means of stocklist.
