THE SUMMER OPPORTUNITY GAP

TWO-thirds of the achievement gap is a result of unequal summer opportunity.

For every line of text read by a low-income student, a higher-income peer has read three.

Children are more at risk of weight gain when they aren’t in school in the summer.

THE GT SUMMER ACADEMY

Our students average 2 months of summer growth in reading level.

Small class sizes ensure individual attention. We cap classes at 12.

Our computer science curriculum is new, exciting, and relevant.
