

VideoTracker[®]

global protection
for your premium content

From ultra HD movie content to premium TV and live events, VideoTracker[®] provides critical protection to ensure exclusive delivery of your audiovisual content to theaters, set-top-boxes and smart devices anywhere in the world.

The advancements of mobile Internet technology provides consumers easy access to premium video content, thus increasing the possibility of unauthorized distribution of your high-value intellectual property.

Vobile offers comprehensive protection solutions to minimize risks throughout the distribution value chain.

Product Advantages

Comprehensive coverage

Monitors all video sharing sites and protocols worldwide including live, streaming, direct download, social media, linking sites, search engines, P2P and mobile apps.

Compliance enforcement

Identifies and sends takedown notices to the core infrastructure distributing infringing content, accelerating the shutdown process and disabling access to unauthorized content.

Network forensic analysis

Massive-scale platform identifies and analyzes infringing content worldwide, providing an unmatched level of analytic reporting options.

Rapid content processing

Advanced machine learning technology helps identify infringing content in real-time enabling you to take data-driven actions faster.

Key Features

- Monitors all video sharing sites including; Search Engines, UGC, P2P, Cyberlocker, Hybrid, Linking and Live Streaming.
- Identifies copies instantly using advanced discovery techniques without completely relying on metadata or tags.
- Accurately flags infringing copies of content using our patented VDNA digital fingerprinting technology.
- Powerful, intuitive web-based interface is optimized for efficient enforcement workflow.
- Flexible reporting provides pre-defined and custom reports of online assets across sites, over time.
- Archives evidence files in secure datacenter storage accessible 24x7 to customers.
