

*Does your air-conditioner struggle
or cost too much to run?*

*Rest easy
with our
FREE
a/c home audit service*

**Optimum Home
Solutions**

Simple, Affordable, Effective.
The Optimum way to run your home

Who is OHS?

Optimum Home Solutions (OHS) has been established to provide home owners with affordable solutions to home air-conditioning problems. We understand that air-conditioning replacement can be costly, and sometimes unnecessary, so we have developed effective and reliable solutions to improve the performance and reduce the running costs of your existing home system.

What do we do?

We will audit your home air-conditioning system and provide a comprehensive report showing the percentage of energy savings, system capacity increase and reduction in greenhouse gas emissions we can achieve with your existing unit.

After the audit process, an OHS staff member will contact you to discuss the report and your results. Our staff will clearly explain your problem and provide the best solutions and budget options specific to your home and your requirements. Each home will be different, so whether fixing air leaks or improving ductwork, we will recommend a solution that will work for you, your budget and your system.

With OHS, you can rest easy and save money.
