

# The Collective

## Womaniesta

**Women owned businesses are an unstoppable force for good.** We affirm the power of the individual woman and the collective to create deep and lasting change that honors the sacred nature of all life.

**There is real potency in dreaming a new dream** for ourselves and the world. As we dream, we also speak and act with courage and conviction to make our dream manifest.

**The time is ripe to consciously move beyond scarcity** and connect with the true nature of wealth within and all around. There are abundant resources for all businesses, all beings, and the earth to thrive. We affirm, in fact, all must thrive for one to thrive.

**There are no pre-existing conditions that can stop us from living the life we are here to live or doing the work that is ours to do.** Now is the time to look to the horizon and create the world we wish to live in.

**We are all connected: all boats rise together** and as such, we know that when we invest in the rise and restoration of one, we support the whole.

**It is our choice to devote the sacred resources of time, creative energy, love, attention and money to creating the world we wish to live in.** We make heartfelt choices to direct our inner and outer sources of abundance in ways that create wealth for all as well as strengthen and renew the web of life.

**We are wisdom keepers: we know the great strength and capacity of a woman's heart to hold and transform.** Therefore, we refuse to look away, but instead we will witness the great beauty of this world as well as the tragedy, knowing that the things we refuse to see, we cannot change.

**We stand in the center of our true nature** to claim personal authority as agents of our individual destiny and the destiny of the world.

**Individually, we are powerful. Together, we are unstoppable.**
