

Teacher Training

Author: Lucille Cedercrans

About: This is the first part of a course that outlines a new approach to both education and getting better at living life. This work is not published, and with good reason is not available except through taking a course with a teacher trained in the very concepts and techniques found in the course. It is a group study: it is best studied within a group and as a group. Most if not all who have taken this course would agree that it is life changing. Star and I are involved in our third time taking this course, and it has been new and fresh each time. We will be spending about a year and a half with the group meeting once a week to complete the course. Participants are certified at the end of this course.

Availability: Only one lesson at a time from a trained teacher.

Course Status: We are facilitating this course on Thursdays at 10:00 am Mountain Time, USA. **We plan to start a new class this summer, on Mondays at 10:00 am Mountain Time, (Denver) USA.** The prerequisite for this course is to have taken Nature of the Soul with a trained teacher in a group. The group alignment in this course is so strong as to sometimes stir up long dormant emotional-mental forms. Participants must be familiar with the processes of transmutation in order to have a sense of how to deal with these stimulated forms. If you are interested in this course please use the Contact Page to let us know.

Excerpt:

First, the Initiatory process is a process of self-initiated growth which is three-fold in nature. It involves (1) the expansion of consciousness (2) the precipitation of consciousness into a point of focus, and (3) the embodiment of that consciousness, as intelligent activity in the daily life

and affairs. The second statement: that the Initiatory process is carried out by the total consciousness of the One Life, involving therefore each unit of the One Life.

Now, if you have clearly followed the foregoing instruction, you have arrived at the point of realization wherein you begin to observe that which we are as group consciousness which includes as well the five kingdoms in Nature, plus the identified focus within each of the three vehicles of appearance.

To give you some grasp of the technique which is utilized for the purpose of a realization of integration, that is, an experience in consciousness of integration, consider Humanity with its many members, each one thinking of himself as "I". As this chorus of voices sounds forth (and I refer not to the exoteric sound, but to the esoteric sound) as this chorus of voices sounds forth, what is the sound that is heard? The total sound is, again, the "I" consciousness identifying itself, always the same in each instance, regardless of the degree of awareness included within that identified focus.

When the moment comes for the Over-Soul of Humanity to impact upon the consciousness imprisoned within the many forms, this concept of the One Life, it will be through a vertical descent of that which produces the sounding of that identification in each case. Do you grasp the meaning of this concept? The Over-Soul descending into each point of identified focus to proceed as the One Life within its many forms. The response within each so-called 'individual' point of focus (when that response is made) can only be a realization of the One Life, or the one identification.

As disciples, conditioning the body of Humanity through the reception of this vertical impact, your opportunity at this moment is to proceed within your own group life to sound forth this note of identification, realizing that this vertical descent is now being made. Then sound forth that note from within the totality of the many apparently separated spheres, or points of focus, and proceed as the One Life within its many forms.

Remember that we have said before that Humanity is the Planetary throat centre; that centre through which the Logoic word 'I AM' sounds forth, that centre of consciousness through which the Planetary Logos, the sum total of consciousness upon and within this planet, who is an identified Life; that centre through which He works out, or through which He incorporates into His own instrument the higher concepts of Truth relating to the Cosmic Life that are making an impact upon Him; that it is via Humanity that His lower bodies, His form nature and the consciousness imprisoned therein, are brought into alignment with that Cosmic centre which is His source.

As you begin to identify as the One Life within that group consciousness with which you are now individually identified, realize the correspondence to take place within the body of Humanity. Each time you think "I", each time you identify, hear, contact and sense every other focused consciousness which is thinking and constantly projecting this sound; realize that it is One Life.
