Are you:

- \* A manager who needs access to the best available science?
- \* A scientist who wants to share a new finding?
- \* A member of the public who wants know more about fire?

## CALIFORNIA FIRE SCIENCE CONSORTIUM

Connecting you  
to a world of fire  
science

## What we've done

- ◇ Coordinated Peer-Review of the BOF/ CAL FIRE Vegetation Treatment Program EIR (2014)
- ◇ Hundreds of research briefs and over thirty webinars produced on topics from fire policy to ecology to WUI
- ◇ Field trips that reach hundreds of individuals a year
- ◇ Monthly newsletter that reaches over 1,600 individuals
- ◇ Supporter of Prescribed Fire Councils including TREX (Prescribed Fire Training Exchanges) and other partners

A picture may tell a thousand words but a field visit can make those words memorable ...and it's a great way to get outside!

## What we have

Our mission is to be an inclusive, neutral, customer-driven collaborative group that facilitates the flow of fire science information and dialogue. Whether you're a science producer or a science consumer, we're here to help.

Here are just some resources we provide:

**Research briefs and synthesis-** 1-2 page highlights from journal articles and reports

**Webinars-** Spend an hour learning about a topic that interests you— all from the convenience of your office

**Fieldtrips/Trainings-** Get out and see the landscapes while networking

**Newsletter-** Keep up to date on upcoming events and new resources by signing up for our monthly newsletter

**Databases—** Downloadable (.ris) citation databases by topic

**Blog-** Stories on events and topics

**Social media updates-**

Twitter

Facebook

## Who We Are

An often-heard phrase is "use the best available science." But managers often don't know what information is already available nor the quality and applicability of that research to their management plans and projects.

Another problem is the research may not be integrated in a context meaningful to management. And while the research may be of the highest quality and peer-reviewed, demonstration of science findings in the field is often lacking.

The California Fire Science Consortium (as part of the Joint Fire Science Program's Fire Science Exchange Network) strives to accelerate the awareness, understanding, and adoption of wildland fire science information by federal, tribal, state, local, and private stakeholders within ecologically similar regions.
