“The Solution to One Coat Stucco”

Mission Statement

EZ Wall Premix, Inc. is in business to provide for the needs of our customers and our employees, while recognizing our responsibility to the communities in which we operate. EZ Wall Premix is committed to providing our customers with a quality product at a competitive price which, together with excellent service and support, will assist them in maximizing their profitability.

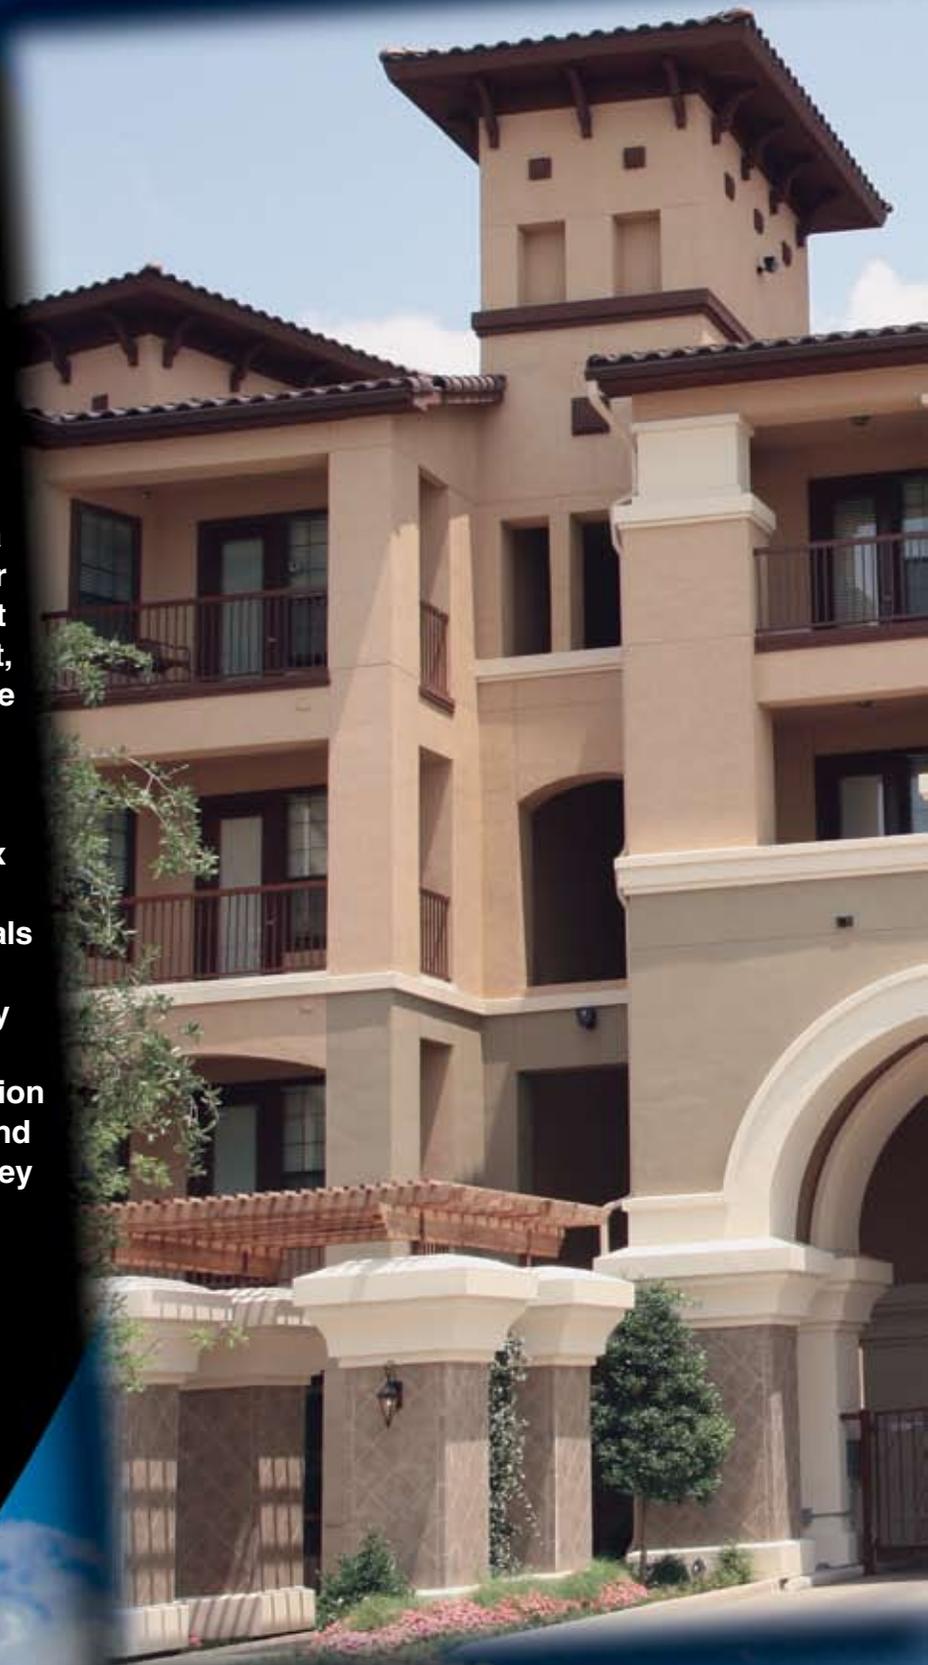

The success of EZ Wall Premix, Inc. is a result of understanding the needs of our customers and reflects our commitment to: innovative research and development, safety code testing, and the maintenance of a local manufacturing facility.

As a family-owned business with over 50 years of experience, EZ Wall Premix has emerged as one of the leading manufacturers of stucco building materials in Texas. This experience and longevity has led to the development of a "family recipe" of how to create a better stucco product. By using this perfect combination of ingredients we can create stronger and more dependable structures whether they are homes or businesses.

Concentrate on the Future with EZ Wall Premix, Inc.

Concentrate on the Future

The use of EZ Wall Premix products has enhanced the creativity of many architects, contractors, and owners allowing them to achieve new designs and incorporate new technologies. These exterior facades created with EZ Wall Concentrate One Coat Stucco always showcase the quality of their structures.

Although Stucco dates back to ancient times, we are Concentrating on the Future to provide a newer, stronger, and more efficient Portland Cement Stucco.

Demand for new buildings created with EZ Wall Premix products is on the rise. These products provide the easiest and most affordable way to retrofit buildings and create new structures. These products are also beneficial because they are water resistant, fire resistive, and provide quality performance in a variety of climates. They can also be applied to any flat or curved surface either on the inside or outside of any structure and require low maintenance. In addition, EZ Wall Concentrate One Coat Stucco is a less costly material than brick, cut stone, or three-coat stucco.

EZ Wall Concentrate One Coat Stucco is a cost-effective and resilient alternative to brick, cut stone, or the three-coat system. At EZ Wall Premix, Inc. we pre-blend at our manufacturing facility, simplifying the mixing procedure. This allows us to offer a product with superior consistency and gives us great control over the mixing portions of the product. Our product is so versatile that a variety of products can be added to achieve the desired final look. In addition we can recommend a range of colors, textures, acrylic topcoats, elastomeric-acrylic finishes, and elastomeric paints.
