

# Premium Replacement Tensioner for Detroit Diesel Applications

**Continental Elite's Heavy-Duty Tensioner for Detroit Diesel applications is more than just an aftermarket technical solution.** It's a premium replacement part that outperforms the standard original equipment (OE) tensioners and keeps you on the road longer.

## The Continental Elite Heavy-Duty Tensioner's design delivers a number of benefits compared with OE tensioners:

- › Larger pivot bushing provides longer life
- › Labyrinth seals protect internal components from dirt and grime
- › Double-row bearings double the life of the tensioner
- › New and improved patented design allows for proper alignment and easy installation
- › Long tensioner arm reduces pivot bushing wear
- › No hydraulic struts, allowing quicker reaction to fluctuating power level requirements

## Application:

- › Detroit Diesel, DD13, DD15, DD16 engines
- › Freightliner Cascadia, Coronado
- › Western Star 4700, 4800, 6900 models

**Part number: 49603**
