

Morris Arboretum presents: Connections Beyond Our Garden *Talks on People, Plants and Place*

The Invention of Nature: **Alexander von Humboldt's New World**

Wednesday, November 9 • 2pm

Andrea Wulf

Vividly bringing the story of the visionary naturalist and explorer Alexander von Humboldt to life, Andrea Wulf will take us on a fantastic voyage in his footsteps and explore how his ideas went on to revolutionize science, conservation and preservation, nature writing, politics, art, and the theory of evolution. She will reintroduce us to this lost hero of science and forgotten father of environmentalism, and show us why understanding his vision of the world has become more necessary today than ever before.

Presented in partnership with the Ambler Theater and held at their location at 108 East Butler Pike, Ambler, PA
