

A decorative border made of black lines representing a circuit board, with various components like resistors, capacitors, and traces. It frames the entire page.

GAME of PHONES

MINI GAME

Cut the next page so you have 12 separate cards. Shuffle them, then place the deck facedown in the center of a table. Grab your smartphones!

Each card instructs players to find, show, create or do something on their phones. Players are free to interpret cards as they wish, but the aim is always to impress the judge.

- Minimum 3 players, but no maximum!
- Oldest player draws first. The player drawing the card is the judge for that turn.
- The judge should read the card out loud, then place it faceup and begin timing for 60 seconds.
- The judge cannot play in the turn. They award the card to the player with the best response. They have the final say.
- Players can sit out turns if they wish (but be sure to make fun of them).
- Play moves clockwise.
- Repeat until someone has collected 3 cards to win the mini-game.
