WRITING EXPRESSIONS

Write simple expressions that record calculations with numbers, and interpret numerical expressions without evaluating them.

Watch the corresponding YouTube video lesson for this problem at http://bit.ly/1ThliEc

5th Grade Mathematics

Write an expression that represents the phrase:

5 times the difference of 9 and 2
CHALLENGE QUESTIONS

Translate each verbal phrase into a numerical statement:
1.) 7 times the sum of 11 and 9
2.) The difference of 6 and the product of 3 and 4
3.) The quotient of 15 and 3 minus 2
4.) The sum of 4 and 6 divided by 2.

Translate each numerical statement into a verbal phrase:
5.) $3(11 - 7)$
6.) $\frac{7+1}{2}$
7.) $5 + (16 - 3)$
4.) $\frac{1}{2} + 8(4 + 1)$
