

5-Year Plan (2018 to 2022) Snohomish Conservation District

For More Information Contact: Monte Marti. 425.377.7001. monte@snohomishcd.org

Organization of the Snohomish Conservation District (District)

A political subdivision of the State of Washington – authorities, powers and structure contained in RCW 89.08.

- The District was established in 1941 and is one of forty-five conservation districts in the State of Washington.
- The District is governed by the Board of Supervisors (Board). These five local members of the community volunteer to serve on the Board and serve without pay. Three members are elected by local citizens within the boundaries of the District, and two members are appointed by the Washington State Conservation Commission.
- The Board receives comments and input from the public during public meetings, and seeks additional input and advice from the community, partners, and agencies.
- The District prepares an annual work plan that identifies the activities and budget of the District.
- The policies, programs, and activities identified by the Board are implemented by the staff at the District.

Function of the District

To make available technical, financial and educational resources, whatever their source, and focus or coordinate them so that they meet the needs of the local land manager with conservation of soil, water and related natural resources.

Who we serve

The District serves the residents of Snohomish County and Camano Island, and supports the efforts of partners. The District provides education, technical and financial support to residents, and supports partners in the management of natural resources.

Mission of the District

The District's mission is to work cooperatively with others to promote and encourage conservation and responsible use of soil, water and related resources through education, technical and financial assistance. The conservation district is a non-regulatory agency that engages the community in the delivery and implementation of natural resource management.

Vision of the District

That the residents of Snohomish County and Camano Island understand how they impact natural resources; and that they take actions to protect, enhance, and responsibly use them. To find, and promote, the balance between protecting the natural environment and using natural resources.

Values of the District

- To use public funds in a prudent and efficient manner
- To inspire and implement meaningful improvements in natural resource management

5-Year Plan (2018 to 2022) Snohomish Conservation District

For More Information Contact: Monte Marti. 425.377.7001. monte@snohomishcd.org

- To implement Best Management Practices (BMP) that have a positive impact on natural resources
- To be accountable and available to the community to serve their natural resource management needs
- To be an effective leader in natural resource education and natural resource management
- To provide excellent service and leadership to individuals, the community, partners, and agencies
- To passionately serve and connect with the community
- To work together with individuals, the community, partners, and agencies to effectively manage our natural resources

We believe in ...

- Stewardship, service, friendliness, compassion, understanding, creativity
- Respect, communication, advocacy, innovation, inclusion

Natural Resource Priorities, Measures of Success and Goals:

Overall Priorities of the District are:

- To support an agricultural industry that is profitable and viable, and is a good steward of the natural resources that it controls.
- To recognize comprehensive natural resource management plans as important tools to address the complex resource management issues faced throughout the District.
- To assist landowners and land managers (regardless of parcel size) in the consistent implementation of management practices that address:
 - Water quality and quantity resource concerns
 - Soil health resource concerns (e.g., compaction and infiltration)
 - Maintenance and restoration of natural habitats
- To educate the public in the importance of a local and domestic food supply that is safe, and the importance of maintaining healthy and productive natural resources.
- To work with a diverse set of landowners/managers, tribes, groups, and agencies that value the complexity of our heritage and natural resources, and that strive to work together to address common goals and desired outcomes.

5-Year Plan (2018 to 2022) Snohomish Conservation District

For More Information Contact: Monte Marti. 425.377.7001. monte@snohomishcd.org

Strategic Priority	Goal	Objectives	Timeline
Overall Impact to Natural Resources	Improve the awareness and implementation of water quality and quantity, soil quality and vegetative land cover practices in priority watersheds through existing and innovative approaches.	1.1 Develop a funding strategy to identify priority areas within Snohomish County and on Camano Island. 1.2 Begin working with partners to identify priority areas and activities to focus efforts. 1.3 Complete an integrated planning effort that identifies priority areas within Snohomish County and on Camano Island. 1.4 Complete a marketing plan focused on the priority areas identified in the integrated planning effort. 1.5 Provide a minimum of 60% of services to the identified priority areas.	Spring 2019 Summer 2019 Summer 2020 Summer 2020 Fall 2022
Overall Impact to Natural Resources	Increase the awareness and implementation of practices that slow climate change and improve resiliency in rural and urban environments.	2.1 Include climate change resilience messaging into all District activities. 2.2 Actively participate in climate resilience planning with partners and identify projects that demonstrate the sequestration of carbon through land use and management choices. 2.3 Implement one example of each relevant and impactful climate change practice. 2.4 Implement 25 projects that sequester carbon through land use and management choices.	Summer 2019 Winter 2019 Fall 2020 Fall 2022
Overall Impact to Natural Resources	Increase actions that support the viability, sustainability and resilience of developed, natural and working lands.	3.1 Identify factors that impact viability, sustainability, and resilience of developed, natural and working lands. 3.2 Develop actions that support the increase of the viability, sustainability, and resilience of developed, natural and working lands.	Fall 2019 Fall 2020
Overall Impact to Natural Resources	Increase natural resource improvement	4.1 Conduct an inventory of existing partners to analyze the collective impact of the partnership and to develop actions for future	Fall 2019

5-Year Plan (2018 to 2022) Snohomish Conservation District

		staff member. 11.5 Develop training plans that identify knowledge gaps and funding sources to fill those gaps.	Fall 2018
--	--	---	-----------

Critical Geographic Areas:

- Snohomish Basin
- Stillaguamish Basin
- South County and Puget Sound Drainages
- Camano Island
- Port Susan and South Skagit Bay Drainages
- Sole source aquifers
- Lakes
- Small farm areas
- Urban/suburban areas
- Large forested areas
- Designated Resource Lands – Agriculture and Forestry

Trends Impacting Conservation in the Snohomish Conservation District

- Snohomish County is growing faster (by percentage) than any other county in Washington. Increased population and economic growth and development will increase pressure on existing natural resources.
 - Large continuous tracts of land will be increasingly pressured to be converted into rural and sub-urban housing increasing the land value of resource lands.
 - Local jurisdictions require more resources to provide services while protecting sensitive natural resources.
 - The average property size in rural areas is shrinking due to subdivision of large tracts of land.
 - Social, economic and cultural populations of Snohomish County and Camano Island continue to change.
- Uncertain commodity, fuel, and supply markets reducing a producer’s ability to plan long-term.
- Movement toward “buy local” food sourcing, and an expansion of community/personal gardens and other “grow your own” foods.
- Regulatory framework, governmental spending, and global economics create uncertainty for natural resource landowners and/or managers.
- Climate change impacts on the water cycle (floods, sea level rise and summer drought), plant communities (invasive species, diseases) and temperature (changing growing season) will create uncertainty with natural resource land managers.

5-Year Plan (2018 to 2022) Snohomish Conservation District

For More Information Contact: Monte Marti. 425.377.7001. monte@snohomishcd.org

- Grant funding from Federal and State sources can change priorities and initiatives, potentially eliminating funding for District programs.

Strategies, Services & Products to Address Trends

The District currently provides technical, financial and educational resources to residents within Snohomish County and Camano Island focusing on the sustainable use of natural resources. These services include: connecting local experts to landowners, one-on-one technical assistance, financial assistance through cost-sharing programs, educational information about implementing best management practices on their own property, working to educate youth on natural resource issues and partnering with other Natural Resource groups to multiply the District’s impact on the resources. These activities will continue for the duration of this strategic plan.

In the next 5 years the District’s Board of Supervisors and Staff will:

- Incorporate new strategies into the District’s suite of services to address emerging issues such as climate change, energy conservation, water conservation, soil health and intensive resource management.
- Expand promotion of its Lawn to Lettuce program to encourage the “buy local” movement and increase community and personal production of food within the urban/sub-urban landscape.
- Develop new engagement strategies to work more efficiently and effectively with landowners.
- Work with local jurisdictions to create a more predictable regulatory environment.
- Request advice and comment on existing programs to identify emerging trends within the local community.
- Expand the services provided to local schools to bring youth outside and provide high-quality educational experiences.
- Provide increased services to historically underserved communities.

Natural Resource Data:

Natural resource data has been collected and used from federal, state, local and non-governmental sources (USDA Natural Resource Conservation Service, Snohomish and Island Counties, Department of Ecology, Department of Natural Resources, cities, and others).

Snohomish County Land Use			Camano Island Land Use		
Land Use Type	Acres	Percent of Watershed	Land Use Type	Acres	Percent of Watershed
Urban	209,398.55	12.54%	Urban	-	0.00%
Cropland	21,659.05	1.30%	Cropland	-	0.00%
Pastureland	107,590.06	6.44%	Pastureland	3,677.95	19.09%
Forest	1,241,695.83	74.36%	Forest	15,322.73	79.55%
Water	18,501.71	1.11%	Water	32.02	0.17%
Other	70,930.96	4.25%	Other	230.17	1.19%
Total Acres	1,669,776.16		Total Acres	19,262.87

Staffing Expertise Needed:

- Natural resource management specialists to address:
 - Urban resources
 - Small acreage resources
 - Natural habitat resources
 - Commercial agriculture resources
 - Forestry resources
 - Water quality resources
- Professional engineers
- Outreach and engagement specialists to address:
 - Youth education
 - Adult education
 - Marketing and Community education
- Financial and operational specialists to address:
 - Project management
 - Grant management
 - Financial management
 - Personnel management

Annual Budget Needs

As of 2018, the District leverages local Rates and Charges and WA State Conservation Commission Base funding to secure State and Federal Grants and Interlocal Agreements from local jurisdictions. Currently, the District leverages each \$1 of base funding to secure about \$2 of grant funding. The District recognizes that leveraging at this rate has risks due to changes in grant funding levels. To address this, the District is seeking an increase in its Rates and Charges to target a \$1 base funding to \$1 grant funding ratio. The District also recognizes that the budget in the table below is a snapshot of the Fiscal Year 2019 work plan and will vary as grant funding is secured or expires.

5-Year Plan (2018 to 2022) Snohomish Conservation District

For More Information Contact: Monte Marti. 425.377.7001. monte@snohomishcd.org

Future issues that will impact the District include increasing inflation and costs of supplies. It is estimated that over the next 5 years, inflation will be approximately 2% per year. This predicts costs will increase approximately 10% or \$467,400, using the FY2019 budget. More stable funding is necessary to provide predictability of services for residents within the District's borders.

Snohomish Conservation District 5-year Plan - Budget 2019

Farm Planning and Rural Resource Management	\$1,353,000
Community Conservation	\$693,200
Habitat Conservation	\$1,483,500
Outreach and Education	\$590,000
District Operations	<u>\$555,000</u>
TOTAL	\$4,674,700
