North Carolina Troopers Association announces endorsement of Robert Edmunds for Associate Justice on the North Carolina Supreme Court.

The North Carolina Troopers Association is proud to announce our official endorsement of Robert H Edmunds for Associate Justice on the North Carolina Supreme Court. Our Association strongly feels that Justice Edmunds is clearly the most qualified candidate for many reasons. Across his career Justice Edmunds has served as a private practice attorney, prosecutor, and United States Attorney for the Middle District of North Carolina. Justice Edmunds has served as a Judge on the North Carolina Court of Appeals and has served as an Associate Justice on the North Carolina Supreme Court since 2001. Justice Edmunds respects the sacrifices that are made by Troopers and other Law Enforcement officers. He also understands the dangers that we face each day so that our citizens can live in peace and safety. Justice Edmunds has taken the time to regularly meet with our association to discuss issues that are important to Troopers and He has also attended live action use of force training. Justice Edmunds will make decisions based on the Constitution and our laws. It is our experience that Justice Edmunds is fair and impartial in his decision making. He will follow the letter of the law and not attempt to legislate from the bench. Justice Edmunds is a man of honor and integrity. The citizens of North Carolina deserve fair and impartial decisions from our Supreme Court. They deserve the kind of decisions made by Justice Edmunds.

The North Carolina Troopers Association is made up of more than two thousand active and retired Highway Patrol employees. It was formed in 1977 to advance the principles of proper law enforcement and support the betterment of our criminal justice system. The NCTA membership strongly feels that North Carolina is a stronger, safer, and better place to live because of Justice Edmunds. The Troopers Association encourages you to vote for Justice Robert Edmunds on November 8th.
