

Directions for Audio Geography Center Label Template "OL 991"

1. Keep the file in PDF or JPEG format
2. The resolution is 150 dpi don't change it!
3. Extend any "bleed" past the outside edge of the label
4. I've found that labels that rely on the center hole, or outer edge don't come out as planned most of the time.
5. Please use less than 50% fill, when white paper is loaded with black ink, it never looks good.
6. Return the image to me, without the template lines.
7. There are 6 circles on the template, use the left 3 for side A, and the right 3 for side B. If your record is one sided, fill up the whole template please!
8. Please return in PDF format, exactly 8.5"x11", 150 DPI.

If you need design help, or any serious editing, we can provide that.
There will be a \$20 base fee for any editing or layout work.
Additional designing and other considerations may be quoted individually.

If you have any questions, send me an email: tragwag@gmail.com

Thanks,

-Tyler Bisson
