We passed in the Senate! Now, as the bill moves through the Maryland House of Delegates, opponents are working to weaken or kill the chlorpyrifos ban bill.

Sign on to urge your delegates to pass a permanent chlorpyrifos ban in Maryland.

Chlorpyrifos is a toxic, nerve agent pesticide found to damage children's brain development, contaminate waterways, and injure wildlife, including honeybees. Help Maryland ban it now!

Use our easy sign-on to tell your delegates to pass a permanent chlorpyrifos ban, with no weakening amendments.

It just takes a minute to help protect Maryland's babies, children, pregnant women, farmworkers, and our local produce! Thank you!
