Our Online Software

Our online software programs are designed to provide school control over usage. The school administrator or teacher assigns students to classes by setting unique user names and passwords designed not to disclose identity and which are not accessible by the company. These usernames can be chosen by the school and designed to not identify the child. The programs do not require student email addresses.

Student work can be saved and shared, however, any work saved to the program can only be accessed by technical personnel for appropriate reasons and these completed projects can not be identified back to the specific student without the assistance of the school.

Information Collected

We respect the privacy of children, and do not collect any more personal information than reasonably necessary to enable them to use our programs. See our Privacy Policy for each product for complete policy disclosure.
