AWARD WINNING EDUCATIONAL PRODUCTS

## Letter from the Founder

Dear Customer,

Two fond memories I have growing up are road trips and week night dinners with my parents. In the car, they would talk about the river we were driving by and how long or wide it was and what lived in it. They would mention the Indian reservation nearby or the name of the mountains, or what the weather forecast was. We would sing songs together. At dinner, there was always discussion about something, even if it was an argument between my big sister and parents. When thinking back, I don't remember an ounce of silence! There was always some underlying education.

Kids learn so much from the immediate family, maybe because they are with them most, at the table, in the car, or on a trip.

We can learn something every day! Tot Talk's products are meant to stimulate parent/child interaction. We hope the products inspire conversations at the table or away from the table that lead to great learning, adventure and fun!

Thank you for all of your support!
