

Riverside Park Trail Project

This trail project is a piece for a larger trail that would connect the east to the west on the southern end of the City. This section would connect the current paved section in Mandt Park to the paved section that runs behind Riverside Cemetery and to the possible fishing pier along Riverside Drive.

The Street and Parks Department have committed to providing equipment and manpower to create the 788 ft trail. The materials cost would come from funds currently held in the River and Trails Task Force account. The project could be started as early as this fall.

788 ft x 10 ft = 7880 sq/ft

Materials cost: \$1000

Construction by Streets and Parks
