346 Janis Laser 20" Kids Bicycle

\$239.00

* Lightweight & durable aluminum Laser frame is easier to pedal than steel. * Two types of brakes: a standard rear coaster brake, which most youngsters are familiar with, and a rear V-brake which many are not. Having the rear coaster brake as a back-up, allows youngsters to get used to hand-braking without going cold-turkey on the coaster brake they are comfortable with. * Alloy rims are anodized black to provide even greater corrosion and rust resistance than the alloy already possesses. Before wheels are laced and trued, the rim sidewalls are ground to provide a smooth braking surface for the rear V-brake. * Laser 2.0 wheels built with 36 spokes in a 3-cross lacing pattern for a strong & durable wheel. * Mount knobby BMX tires that bite in the dirt, but also feature a rounded profile that rolls smoothly on neighborhood streets & driveways.
