Welcome to the 2018 Annual CCAE State Conference, All Stars of Adult Education. We are excited to host CCAE this year and provide you with a world class, big league conference in the heart of California’s San Joaquin Valley. It is a new era of adult education and this year’s conference reflects that. You will experience more space, more sessions, more presenters, and more fun than ever before. It’s a BIG DEAL. We swung for the fences for you, and this year’s conference is sure to be one for the books.

2018 CCAE State Conference Chairs
John Werner, Dr. Jose “Jo Jo” Reyes, and Karyn Ruiz

It is my pleasure to welcome you to the CCAE State Conference. This is a conference I look forward to every year because I’m always impressed by the people I meet and the passion they have for adult education and the students we serve. This year is particularly special as I feel there is reason for celebration. As we look back over the past few years we must acknowledge that we have accomplished much. We have added more courses, made many partnerships that enhance our services to our students, created pathways to college and careers, and built a strong positive reputation in Sacramento. And, there are many opportunities ahead. I don’t want to take anything away from the great workshops that I’m sure you will see, but in between those workshops, or even in those workshops, take a quick look around at all the new faces from various institutions and agencies, all with a common interest, our interest—our students.

On behalf of the CCAE State Board I want to thank you for your dedication to professional growth. Truly, as our economy, society, and our world continue to change there is no doubt we must do the same in terms of curriculum, teaching, and collaboration to truly prepare our students for success in this world.

Finally, I must acknowledge all the work that has been done to advocate for adult education funding and protection. This conference would look a lot different if not for the successes we have had in Sacramento. I want to encourage each of you to continue to advocate for adult education at the state level, but more importantly, locally with your legislators who, in many cases, do not know the great work that you are doing in their community. The population we serve, in many ways, is left silent if your voice is not heard. So, next week when you get back to your school, make a phone call to your legislator and invite him or her over to see just how good your school, staff, and students are and how your school is improving the community that your legislator represents.

Steve Curiel
CCAE President

Solving the Math Problem!

Every administrator/instructor we talk to confirms the lack of math skills on the part of many of their students. One remark that sticks with me is “no one knows math past the 5th grade.”

Math skills are a critical need in every adult school for GED/ABE/ASE/Careers and so much more. Every career specific instructor we speak to states the need.

Learn Math Quickly is now available STREAMED for blended, distance, or independent study. If you choose, each student in your school can have access to over 6 hours of video based live teacher presentations of addition, subtraction, multiplication, division, fractions, percent, ratio/proportion, geometry, and algebra plus with worksheets reproducible from flash drives.

Learn Math Quickly is used successfully by Adult Schools in class, in learning centers and in blended/distance learning programs using DVDs. (There remains a demand.) Every school that uses it gives rave reviews.

A recent quote, “I want to be an engineer. I started to study math and I was afraid. I’m 37 years old and I found the videos extremely easy. They took the fear out of math” Carlos Segura, Downey Adult School. March 28, 2017.

My favorite is from a student at Harbor Occupational Center, “It’s Clear.”
