To Our Valued Customers:

In light of the amendment to S.O.L.A.S. regarding Verified Gross Mass (VGM), OCTS is pleased to inform you that we will be offering the following service:

- Scaling Service
- Verified, printed scale ticket sent by email

We are currently in the process of installing load cells on our top lift machines in both our Edmonton and Calgary depots. Edmonton will be in place by mid-June. We are still waiting for a completion date for our Calgary depot.

Once installation has been completed at our depots, we will offer scaling at a fee of \$75.00/container for all containers being drayed by OCTS. For all outside carriers the fee will be \$95.00/container. However up until the installation is complete we are offering to scale containers at a certified truck scale for a fee of \$125.00 (this includes the scaling of both empty and loaded containers plus the cost of the scale ticket).

Best Regards,

The Management Team at O.C.T.S. (2013) Corp.

Our Service is not a Courtesy; it is a Commitment.
