Full stack web developer with a passion for creativity, green-tech and clean code. With a design background, I focus on the end-product just as much as the minute details of any given project. I'm a team player that likes to provide value as much as encourage those around me. Having recently graduated from the Flatiron school, I am looking for new opportunities to create and reach new heights.

---

## Skills

**Tech** - JavaScript, React, Redux, AJAX, jQuery, Ruby, Rails, HTML, CSS, Bootstrap, Semantic-UI, Git, SQL, PostgreSQL, TDD  
**Design** - Photoshop, Illustrator, InDesign, After Effects, Cinema 4D

## Technical Projects

**Our Garden** - Connecting local gardeners on a platform to sell or exchange their produce  
*JavaScript // Rails // React*   [Git](#) | [Video Demo](#)

- » Built functionality allowing users to login and sign-up with JWT token and b-crypt authorization
- » Possible for users to search for local gardeners and purchase their available produce
- » Added review creation and edit form for gardeners and basic shopping cart functionality - sans checkout
- » Designed using Semantic UI React, CSS and custom made graphics.

**Watchlister** - An app allowing users to search for their movies and create movie playlists.  
*JavaScript // Rails // React*   [Git](#) | [Video Demo](#)

- » Used React to establish a front-end interface
- » Designed asynchronous CRUD actions for watchlists, and movies models
- » Integrated The Movie Database API to allow users to search for movies
- » Created a server side API with Rails to persists user created actions as well as external API results

**Find-a-Date** - Online dating website that matches on gender and sexual orientation.  
*Ruby // Rails*   [Git](#) | [Video Demo](#) | [Heroku](#)

- » Implemented Ruby and Rails to create the application with our own API
- » Utilized the entire CRUD cycle, allowing users to create, edit and delete accounts
- » Built complex relationships using ActiveRecord framework
- » Designed using basic HTML and CSS principles

## Related Work Experience

**Graphic Designer (Freelance/Contract)** - Tri-State area  
*InstaGone // OptiJob // Surf Liquors* - 2012-2016

- » Designed online graphics, web elements and various print material.
- » Created CMS websites using Shopify and Squarespace, utilizing basic HTML and CSS
- » Experience with web design, wire frames and responsive/mobile layout
- » Worked in conjunction with developers, utilizing best practices while designing websites

**Production Manager** - Point Pleasant, NJ  
*Blazing Visuals Sign Shop* - 2013-2014

- » Lead designer who controlled work-flow from initial quote to final installation
- » Managed all high profile accounts
- » Handled all aspects of operations: communications, customer service, sales, managed large format printers and plotters, installations, quoting, inventory purchase, and oversaw all finished design work
