Building upon our previous three successful transit plans for the area, LSC Transportation Consultants, Inc. was retained to develop a Short Range Transit Plan (SRTP) for Summit County and the Park City Municipal Corporation. The study focused on enhancing services in the growing residential and commercial areas in unincorporated Summit County, improving service quality in the Park City area, implementing new connections to Salt Lake City and other communities, as well as capital facility, technology and vehicle improvements.

LSC reviewed and presented demographic factors, including the increasing transit needs of a growing general public, commuter, and elderly population. The firm also conducted an in-depth evaluation of current services and ridership patterns, including onboard surveys in both summer and winter. Detailed evaluations were conducted on a wide range of service, capital, institutional and management, and financial alternatives. At present, the final recommendations are being prepared that will guide the growth of services over the coming seven-year period and an implementation plan to accomplish that growth.
