About REAP

Since 2009, REAP has been working with the Duha Complex School, a rural public school in Eastern Rwanda, and the surrounding community, to help provide a path to a better future through education.

Founded by Edward M. Ballen, we now have six dedicated employees in rural Rwanda, one in the U.S., and a diverse group of committed advisors, friends and board members in the New York Metro area.

We've been able to change the lives of hundreds of needy children. With your help, we hope to reach thousands.

Planting Seeds of Hope

REAP is Unique...

In that we're addressing the needs of rural public education as well as the surrounding community.

Hand-in-hand with the community, we are developing interventions that dramatically improve education and future opportunities for the community's children.

Programs include:

- Nutrition
- Teacher Training
- STEM Training
- Library/Computer Lab
- Girls Empowerment
- Early Childhood Interventions
- Research-based Programming
- Infrastructure
- Community Engagement

With your support, we can continue to help children in rural Rwanda.

"A secure future for Rwanda begins with education and opportunity"

HOW REAP SUPPORTS THE STUDENTS OF DUHA...

◆MEET CELESTINE◆

Celestine (four years old) and her older sister begin each day by walking three miles up a red dirt road to Duha School. She is excited to be attending school, where she can now focus on her studies instead of her hunger.

Since the inception of REAP's Duha cow farm in 2013, a cup of porridge and milk is provided daily to each nursery school child, and malnutrition rates at the school have plummeted.

Celestine has just started learning her numbers and letters, but she loves spending time in the REAP-funded library, looking through pictures in the donated collections.

When she is her sister's age, she can use the REAP computer lab and participate in the reading enrichment programs and competitions on Saturdays, held by REAP staff members.
