

### Unique Features

- Up to 5.000 inch OD capacity (4.000 inch pipe)
- 5 HP motor standard
- Electronic variable speed drive
- Self contained hydraulic system with fine feed adjustment
- Sliding stop
- 3 tool heads for OD, ID and facing
- Totally enclosed cutting area
- Compact design
- Through-The-Spindle stop rod
- Quality construction
- Name brand components for dependable service

### Available Options

- Custom heads and tool holders designed to fit your application
- 7.5 HP motor
- Coolant
- Center stop rod for solid parts

### General Information

- Heavy duty features for beveling thick wall pipe and tubing including J-bevels
- Rigid design for heavy cuts
- 24.000 (w) x 35.500 (d) x 60.000 (h) inches approx.
- Weighs 1400 to 1500 lb
- Head runs on linear ball rails
- Three bearing spindle
- Infinitely variable speed drive and feed controls
- Dependable hydraulic clamping and spindle feed
- Additional machines available for up to 8.000 inch pipe

37.5 deg bevel on 2.500 x 0.500 inch wall tubing cycle time 15 seconds

J-bevel on 2.500 x 0.312 inch wall tubing cycle time under 20 seconds

### Unique Features

Model C8H is a heavy duty hydraulic powered beveling machine with up to 8-3/4" OD capacity. With 20 HP, the C8H has the power to machine weld bevels and other forms on the end of heavy wall pipe and tubing within its range.

### General Information

- adjustable from 1 1/2" up to 8" pipe
- accurately machines weld bevel and faces pipe square
- fast cycle times, normally under 20 seconds
- adjustable cutter head with interchangeable carbide inserts set with gauges
- interchangeable grips for different sizes of pipe, tubing and solid bar
- electronic variable speed drive
- heavy duty construction utilizing machine tool-type linear rails
- hydraulic powered clamping and feed
- coolant system
- large chip drawer
