

RADIOGRAPH REPOSITORY

CONSIGNORS may contact Rexann Morrison for applications and submission details at 817-694-1711 or email rexannmorrison@yahoo.com. Asteris will provide Veterinarians with an online application for remote data submission. Consignors will receive a link for accessing statistics such as how many times a consignment has been viewed and for how long. Asteris charges a \$20 submission fee per horse. This fee will be withheld from the Consignor's account. Radiographs are not mandatory.

Asteris and the Sale Co. will require two items for submission of radiographs to the repository:

1. All radiographs must be acquired between August 10, 2017 and August 30, 2017. Radiographs will not be accepted after 5pm MST on August 30.
2. The veterinarian must verify the AQHA Registration papers and the Hip number as it appears in the Sale catalog for each consignment. Only licensed Veterinarians may view the radiograph with a buyer. There is no charge for viewing. The radiographs are the property of the consignor.

The Repository will be open for viewing in the metal barn just north of Barn #1 Thursday 8-31-17 from 8am to 5pm and Friday through Sunday from 9am until the last sale of the day. If any additional views are requested, the seller has first right of pay for the view and have that view included in the yearling's file. If the seller does not wish to pay for the additional view, then the new view is the property of the prospective buyer.

RHS will not review the Repository information and makes no warranty or assurance of any kind concerning the authenticity, sufficiency, quality, completeness or accuracy of Repository information, all of which shall be the responsibility of the Consignor. Knowledge of the Repository information therefore shall not be imputed to the Ruidoso Horse Sale Company. See *Thirteenth Condition of Sale-Arbitration* for specific provisions as applies to the Repository. In the event of a conflict, a panel of Veterinarians will be convened to determine appropriate action. RHS shall have no liability, shall give no opinions, and shall be held harmless from any loss incurred by either party. If the panel decision is not unanimous, majority shall rule. The panel's decision is final.

The Right of Rejection shall terminate immediately upon removal of the horse from the sale grounds.

Page 2 - RADIOGRAPH REPOSITORY, continued

Consignors will be held responsible for associating radiographs with the proper horse. If the horse name has been changed in the radiographs knowingly or unknowingly, or if the images have been tampered with, the consignor is responsible for any charges incurred from a dispute. If a discrepancy is found after a buyer purchases a horse, they have twenty-four hours to report it to Asteris and the Sale Co. During that time, the horse may not be moved from the premises for any reason other than a medical emergency. In an attempt to prevent "buyer's remorse" the buyer must pay Asteris and/or the sales company an \$800 deposit to investigate a disputed purchase.

Asteris will send the radiographs to three equine veterinarians of their choice for review; the veterinarians will not be diagnosing, but only verifying that the radiographs in comparison are from different horses.

If the Veterinarians determine that the original radiographs are from the horse in question, the buyer must pay all fees associated with the challenge process.

If it is found to be a different horse, the consignor will be held responsible for all charges including the \$800.00 deposit and the commission fee to the Sales Co from the resulting lost sale.

VETERINARIANS: Only Digital DICOM images will be accepted and only the 32 images as follows:

- BOTH FRONT FETLOCKS:** DP, DLPMO, DMPLO, flexed lateral medial.....8 shots.
- BOTH CARPI:** DLPMO, PLDMO (just off lateral), flexed lateral medial.....6 shots.
- BOTH HIND FETLOCKS:** DP, DLPMO, DMPLO, standing lateral medial.....8 shots.
- BOTH HOCKS:** Just off DP 10 degrees (slight DLPMO), lateral medial, PLDMO.....6 shots.
- BOTH STIFLES:** Lateral medial (getting the proximal tibia as well as the trochlear ridges of the femur and patella) and a plantar anterior as long as the condyles are visible.....4 shots.

Please label the studies in this manner: Patient = Hip # as shown in catalog (horse name not required.) Owner = Consignor as listed in the catalog. Accession # = Day the horse sells and Hip #, i.e. Day 1- #01. Neither Asteris nor the Sale Co. will be screening images for positioning or technique; this is the responsibility of the veterinarian at the time of acquisition.
