At the 2017 Vision Europe Summit „**Winners and losers of globalisation**” policy briefs on social, economic and governance aspects of globalisation will be presented. The innovative suggestions and policy proposals made in the policy briefs will be discussed with stakeholders from politics, business, civil society and academia in view of their possible implementation.

Vision Europe is a consortium of think tanks and foundations, launched in 2015, collaborating to address some of the most pressing public policy challenges facing Europe and its member states. Through research, publications and an annual summit, we aim to be a forum for debate and a source of recommendations to improve evidence-based policy-making at both national and EU level and to foster an appropriate European integration. Over the course of the past two years we addressed the pressing issues of the future of the welfare state as well as migration and refugee flows.

More information about the consortium and the summit can be found on our website: [www.vision-europe-summit.eu](http://www.vision-europe-summit.eu)
