

Downtown sidewalk repair update

The City of Dunsmuir as part of the downtown sidewalk/repair program will be repairing sidewalks in front of 5816 Dunsmuir Ave. and just south of 5701 Dunsmuir Ave., project is slated to begin late spring or early summer 2020. Project will involve removal of trees at the above locations and grinding down of stumps. Hazardous sections of sidewalk will be removed and then replaced with new sidewalk. New tree wells will also be installed at both locations. Replacement trees will be chosen from the approved "replacement" tree list which includes Eastern Redbud, Chinese Dogwood, Crape Myrtle and the Chanticleer Flowering Pear (if some listed trees are not available locally we will replace with the closest match we can find). These trees will not have the expansive root system that the existing trees currently have.

Removal of trees should be done by mid-April, grinding of stumps will occur once existing damaged sidewalk has been removed. Project completion is expected by mid-July (if everything goes right).

Any questions about the project, please contact the City of Dunsmuir at 5915 Dunsmuir Ave. 530 235 4822 or the Dunsmuir Public Works Department at 235 4437.

Thank you,

Bill Willman
