In general, there were 432 people who entered into ES (emergency shelter) coming from a place not meant for human habitation. Of these, 132 people entered into ES because they were staying with friends or family. The length of stay (LOS) for people who entered ES is as follows: 253 people stayed for 30 days or less, 33 people stayed for 30-60 days, 39 people stayed for 60-180 days, and 6 people stayed for more than 180 days.

242 people went to an unknown destination after exiting from ES. This represents 73% of the total exits from ES.

The top five destinations after exiting from ES are:
1. TH (transitional housing) - 53 exits (14%)
2. PH (permanent housing) - 34 exits (10%)
3. ES Exits to PH, VI (33%)
4. ES Exits to Non-PH, known destinations: II, Institution (30%)
5. ES Exits to Non-PH, known destinations: III, Institution (9%)

There were 183 exits where data was not collected or no exit interview was conducted, and 80 exits where the client didn't know or refused to provide an exit destination.

The destinations after project exit are as follows:
I. Unknown (263)
II. Other Destinations (57)
III. Institution (52)
IV. Place Not Meant for Human Habitation (5)
V. Rental-Owned, No Subsidy (78)
VI. Friends/Family, Permanent (40)
VII. Rental-Owned, With Subsidy (22)

Footnotes:
1. The systems map does not include data from designated HAP or BHAP programs, as the data could not distinguish between ES, TH, RRH, or PSH characteristics of each HAP or BHAP program. There were 432 entries from HAP or BHAP programs.
2. All percentages on this map represent the percent of persons that entered or exited from each type of program: ES, TH, RRH, and PSH (e.g., Out of the 355 entries in ES, 132 people, or 37%, came from staying with friends or family).
3. In general, data that accounts for less than 10% of the total number of entries or exits per program is not graphically represented on this map, unless it was intentionally added to show significance (e.g., Out of the 79 people that entered the homeless system coming from a place not meant for human habitation, 70 went to ES, 8 went to TH, and 1 went to RRH. The low number of RRH entries (1) is not graphically represented but it is included in the total calculations).
4. Category Other II. Other Destinations (57) combines the following destination types in Data Element 3.12: Staying with friends or family (temporary tenure), Hotel or motel, Deceased, or Other.
