Footnotes:
1 The systems map does not include data from designated HAP or BHAP programs, as the data could not distinguish between ES, TH, RRH, or PSH characteristics of each HAP or BHAP program. There were 618 entries from HAP or BHAP programs.

2 In general, data that accounts for less than 10% of the total number of entries in ES is not graphically represented on this map, unless it was intentionally added to show significance (e.g., People in ES came from other locations not listed on the map, such as 9 people from TH, and 1 person from a hotel/motel. The low number of ES entries from TH and hotel/motel are not graphically represented but they are included in the total calculations.)
