San Luis Obispo County
Integrated Waste Management Authority
ORDINANCE NO. 2019-1

AN ORDINANCE REGULATING POLYSTYRENE AND EXPANDED POLYSTYRENE (EPS) FOOD CONTAINERS AND PRODUCTS

WHEREAS, the San Luis Obispo County Integrated Waste Management Authority ("IWMA") is a joint powers agency established pursuant to California Government Code Section 6500 and empowered by its member jurisdictions to exercise the members’ common powers to achieve the mandates imposed by the Integrated Waste Management Act of 1989 (AB 939) on a regional basis; and

WHEREAS, items made from Polystyrene and Expanded Polystyrene ("EPS") are not Biodegradable and in many cases, not Recyclable. Polystyrene and EPS break into small pieces and because they are lightweight, may be picked up by the wind even when they have been disposed of properly; and

WHEREAS, Polystyrene and EPS as litter are highly durable. Both Polystyrene and EPS litter are present in parks and public places, streets and roads, waterways and storm drains and may ultimately float, or be blown, into the Pacific Ocean; and

WHEREAS, take-out food and beverage packaging that is Reusable, Biodegradable, and Recyclable is the most responsible and sustainable choice for San Luis Obispo County’s tourist economy, its citizenry, and its environment. When products are reusable or recyclable, natural resources are spared, and less energy and resources are used to produce new products; and

WHEREAS, regulating the use of Polystyrene and EPS will help maximize the operating life of landfills and help protect the natural environment from contamination and degradation; and

WHEREAS, the IWMA Board of Directors considered taking action on Polystyrene and EPS at prior IWMA Board Meetings and has directed staff to develop an ordinance to prohibit the use of Polystyrene and EPS containers, trays, cartons, and non-encapsulated products.

NOW, THEREFORE, BE IT ORDAINED by the Board of Directors of the San Luis Obispo County Integrated Waste Management Authority as follows:

SECTION 1. Recitals.

The above recitals are true and correct and incorporated herein by this reference as the findings of the IWMA Board of Directors.
SECTION 2. Environmental Determination.

The proposed ordinance is exempt from the environmental review requirements of the California Environmental Quality Act (CEQA) pursuant to Section 15061(b)(3) of Title 14 of the California Code of Regulations because it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment. Further, the proposed Ordinance is exempt from CEQA on the separate and independent ground that it is an action of a regulatory agency for the protection of the environment because, among other things, it will regulate the use and sale of Polystyrene and EPS and reduce the amount of Polystyrene and EPS that enter local landfills and waterways. Thus, this Ordinance is categorically exempt from the requirements of CEQA under Section 15308 of Title 14 of the California Code of Regulations as an action by a regulatory agency for the protection of the environment.

SECTION 3. Definitions.

A. “Affordable” means that a Biodegradable or Recyclable product may cost up to fifteen percent more than the purchase cost of comparable Polystyrene and EPS alternatives.

meat trays, ice chests, shipping boxes, and packing peanuts. The Resin Code for polystyrene is
‘6’ or ‘PS,’ either alone or in combination with other letters. This definition applies to all

wrapping, platters, condiment containers, cartons, cups, drink ware, as well as non-encapsulated

beverage preparation technique (e.g., cooked, chopped, sliced, mixed, brewed, frozen, squeezed,
or otherwise prepared within an IWMA Member Jurisdiction). Prepared Food and Beverages
may be eaten either “dine-in” or “take-out” from the Food and Beverage Provider’s premises.

N. “Polystyrene” means a thermoplastic petrochemical material utilizing the styrene
monomer, including but not limited to, rigid polystyrene or Expanded Polystyrene, processed by
any number of techniques, including but not limited to fusion of polymer spheres (expandable
bead polystyrene), injection molding, Expanded Polystyrene molding, or extrusion-blown
molding (extruded polystyrene), and clear or solid polystyrene (oriented polystyrene). The Resin
