

Buy Myanmar timber with peace of mind

Best possible assurance of legality for Myanmar timber products

The MTE Verification Service

- Maximum possible level of evidence to support your due diligence.
- Verification of supply chain from harvest area to export of product from Yangon.
- Engagement with regulatory enforcement authorities directly on your behalf.
- Extensive contact network in Myanmar and S.E. Asia.
- Pay-as-you-go pricing model.

Evolving regulatory requirements and the challenge of obtaining verifiable supply chain documentation can make trading in Myanmar timber products daunting. Third party independent verification from DoubleHelix is a solution that supports and enhances your due diligence efforts.

DoubleHelix verifies that the maximum level of evidence is available for every shipment you buy. This includes information relating to area of harvest, transport of logs, purchase from Myanmar Timber Enterprise (MTE), and export from Yangon.

We have a good understanding of both the legal requirements and industry environment in Myanmar. This enables us to collect and verify the substantial amount of documentation along the supply chain back to point of harvest from a managed forest concession.

We verify

- Legal license and registration of all entities in the supply chain.
- Legal transport of logs from forest to mill.
- Legal purchase of logs from MTE.
- Legal trade of timber between all entities in the supply chain.
- Legal export of products from Myanmar.

DoubleHelix is strategically located in Southeast Asia and has developed a strong network within Myanmar that ensures we are up to date with trade and regulatory developments.

Benefits you enjoy

★ Confidence

Each shipment is traceable back to specific batches of logs purchased from MTE from identified harvest areas. Each shipment comes with a traceability docket.

🔍 Transparency

DoubleHelix reports clearly present and explain information about the entire supply chain. Legality documents are provided, together with an explanation of the purpose and meaning of each document.

Full reports are only available on request by Competent Authorities to maintain confidentiality.

👍 Simplicity

No action is required by you. DoubleHelix engages directly with Competent Authorities and provides all necessary information.

How we support your due diligence

- ✓ **Comprehensive risk assessment** of each supply chain, to identify exposure to risk and recommended mitigation measures. This process ensures we can provide transparency of harvest and trade for all verified products.
- ✓ **Onsite assessments** to collect and verify license, trade and transport documentation for each manufacturing entity. A report is provided at the end of the site assessment.
- ✓ **Traceability dockets** are issued for every shipment of verified product exported. The dockets state that the shipment has been verified by DoubleHelix and full documentation is available to authorities on request.
- ✓ On request by regulatory enforcement authorities, DoubleHelix compiles a **detailed verification report** specific to the verified shipment.

Pay as you go

Our pricing consists of a small fee to cover the costs of the initial risk assessment and site visits. Subsequent verification fees are charged per unit of product verified.

This means you pay as you buy, with lower pricing available at higher volumes.
