

Photography/Scanning of Artwork

We take great care from the start to ensure that your piece is properly captured for the most accurate color and detail fidelity. All production files will be saved in TIFF format in the Adobe RGB color space, which is our preferred working space for color management.

Capture costs don't include the removal of your original artwork from its frame or any other special considerations that may be necessary to optimize the capture. If this is the case, we'll submit any additional charges to you for approval prior to beginning the work.

Digital capture: \$50/piece (up to 30" longest side)
\$75/piece (31" to 48" longest side)

Post-processing: \$60/hour (billed in 15-min. segments)*

* (Includes cropping, color adjustment, file set up, etc. See "Other Services.")

Fine Art Printing

Archival aqueous pigment prints (paper, canvas, and other substrates) are priced by the square foot and rounded to the nearest tenth. One-inch borders are standard on all fine art paper prints and should be included in the price.

For example, a 16" x 22" piece with one-inch borders would be an 18" x 24" print. To calculate the square footage, use this simple formula: $18 \times 24 \div 144 = 3.0$ square feet.

We recommend the following substrates for the best reproduction and stability. Epson's aqueous pigment inks are extremely stable, yet there can be differences in fine art papers and canvases. If your edition must be consistent, you should consider printing everything in the same run. Additional media are also available.

- Red River Aurora Fine Art \$10 / sq. ft.
- Angelica Universal Photomatte \$10 / sq. ft.
- Parrot Ultra Lustre Photo Paper \$10 / sq. ft.
- Red River Polar Pearl Metallic \$12 / sq. ft.
- Sunset Velvet Rag \$12 / sq. ft.
- Epson Somerset Velvet \$15 / sq. ft.
- Sunset Photo Metallic \$15 / sq. ft.
- Sunset Reserve Matte Canvas \$18 / sq. ft.
- Indian Dupion Silk \$18 / sq. ft.

Gallery Wrapping

Choose between 1.50" or 1.75" deep heavy duty (HD) stretcher bars. Artwork with colored or mirrored edges will require additional image processing. Your print will arrive with D-rings and wire installed, ready to hang.

- 1.50" bars.....\$7 / linear foot (3" border required)
- 1.75" bars (HD)\$8 / linear foot (3" border required)

UV Protective Topcoat

Required for best results, our environmentally friendly acrylic coatings will prevent your canvas prints from cracking during the stretching process as well as protect them from the effects of moisture, ultraviolet light (UV), humidity, abrasion, and fingerprints. Available in matte, satin, and gloss finishes.

Other Services

Retouching, Additions/Subtractions, & Color Correction

Includes dust and scratch removal; addition of information to the digital image file (e.g. solid color borders or mirrored areas of an image added to create adequate borders for a gallery wrap); subtraction of information from the digital image file (e.g. unwanted elements in a photograph, etc.); color correction to match the original artwork; and creation of print-ready files.

\$60/hour (billed in 15-minute segments)

Note Card Printing.

Choose from A2, A6, and A7 sizes. Boxed sets include ten (10) scored and folded cards with matching envelopes in a clear PVC presentation box. Individual cards are also available, each in a clear, biodegradable presentation bag. Folded sizes shown.

A2 (5.5" x 4.25"): \$13.00 (box) | \$1.30 (single w/ bag)

A6 (6.25" x 4.50"): \$14.00 (box) | \$1.40 (single w/ bag)

A7 (7" x 5"): \$15.00 (box) | \$1.50 (single w/ bag)

We use acid-free Polar Matte (60 lb.) stock. Other papers are available, so please call for pricing. For some first-time orders, a design and set up fee of \$30 may apply.
