UNIVERSITY

**Postdoc in Cancer Immunotherapy Delivery Systems**

An NIH-supported postdoctoral research position is available in the Laboratory for Vaccine and Immunotherapy Delivery (LVID) in the Joint Department of Biomedical Engineering at NC State University and UNC-Chapel Hill. Our laboratory utilizes an interdisciplinary approach, including aspects of biomaterials, immunology, drug delivery, biochemistry and nanotechnology, to develop translatable vaccine and immunotherapy delivery platforms for the treatment of cancer. Applicants with expertise in any of the above disciplines are encouraged to apply.

Ideal candidates will have demonstrated experience with protein purification, protein-conjugation and biopolymer functionalization. Applicants must possess a doctorate in engineering, immunology, chemistry or life sciences.

The candidate should be self-motivated, have excellent communication skills and be able to work in a highly collaborative manner.

Interested candidates should send a cover letter, CV, and the names and contact information of three references electronically to Prof. David Zaharoff.

**Contact info:**

David A. Zaharoff, Ph.D.

Associate Professor

Joint Department of Biomedical Engineering | Pharmacoengineering Track

North Carolina State University | University of North Carolina-Chapel Hill

Adjunct Associate Professor

UNC School of Medicine | Department of Microbiology and Immunology

UNC Eshelman School of Pharmacy | Div. of Pharmacoengineering & Molecular Pharmaceutics

Member, UNC Lineberger Comprehensive Cancer Center

Member, NCSU Comparative Medicines Institute
